

1ST CHECK	FINAL MARK
2ND CHECK	

NAME: \_\_\_\_\_  
 CLASS: \_\_\_\_\_

DATE: 2011

**TASK 2**

**LOOK AT THE CHART BELOW. COMPARE AND/OR CONTRAST PEOPLE'S SMOKING HABITS BETWEEN 1960 AND 2000 (75-100 WORDS)**

**MODEL ANSWER:**

The line graph shows changes in male and female smoking habits between 1960 and 2000. In 1960, many men smoked. However, this number gradually decreased and went from 600 men in a thousand in 1960 to just 150 men in 2000. In contrast, less than 100 women in a thousand smoked in 1960. This number rapidly rose and reached a peak of 350 in 1975. This remained steady until a sharp fall in 1995 when the number went down to 150. In conclusion, there has been a very noticeable change in male and female smoking patterns.
