Comments: _____

- 1) Use a new or clean container for the sample.
- 2) Select a point on the system that will have representative flowing fluid.
- 3) Flush the line and valve to remove any debris or trapped fluid.
- 4) Collect a four ounce sample in an unbreakable container.
- 5) Cap and inspect to be sure the container does not leak.
- 6) Label all samples clearly with system identification.
- 7) Include the analysis request form in the package with the sample.
- 8) Include as much information about the system and fluid requirements as possible.
- 9) Send sample by U S Mail or UPS to:

Interstate Chemical Company, Incorporated
