STEPS FOR ACTUAL BIDDING PROCEDURE

1. Go to www.indiaauction.com and Enter Login ID and Password. When a bidder logs in on www.indiaauction.com it is deemed that the bidder has accepted the Terms & Conditions of the Seller.
2. After successful login the bidder will be able to view all the details about the auction. The bidder will also view the list of the lots kept for auction. The bidder can select the lots of his interest as well as can prioritize the same for bidding preference.

3. The bidding screen will be available to the bidder to start bidding. There will be lot number and Lot name describing the lot on hyperlink. Current bid column will show the highest bid for the lot. Your bid column will show the bid amount for the lot by the bidder. The bid screen will also show the CMD details for each lot. Three cell colours are used to easily recognize the status of sale and bidders position in the lot for that auction. The Minimum Bid Price/ Base Price has been recorded against each lot. The software will not accept any bid lesser than the Minimum Bid Amount.
4. Bidder can click on the bid button in the row of the lot to bid for that lot. *(The Bid should be placed without any decimal or Comma marks)* This will lead to a pop up window to enter the bid amount for the lot. The bid amount should be greater than the current bid amount for that lot. If the bidder himself is the highest bidder, he can still improve his offer for that lot.
5. Bidder can also avail of the facility of autobid for bidding for the most interested lot. The bidder has to click on the Autobid option in front of the lot. This will open a pop up window where he has to give the directions to the system about maximum price he is willing to pay for the lot and increment on the price quoted by the highest bidder other than him.
6. The system will automatically bid for the lot on behalf of the bidder, immediately after receipt of any higher bid from other bidder. This will save the time of the bidder to monitor the bidding. This will also ensure quicker bid for the lot and chances of winning are higher. Bidder can reset the autobid limits anytime during the bidding process.
7. **The auction follows dynamic closing i.e. Time Extension provision. Bids placed on any lot in the last one minute of that lot's scheduled closing time will extend the close time of that lot by additional 3 minutes. This process will continue till there is no bidding activity in the last one minute for that lot.**
8. At the closure of auction the Results will be flashed immediately on close of the Auction on the bidder screens. Highest bids are taken only Subject to Approval from the seller. The bid value last accepted by the system will be taken for deciding the status. Only if two bidders bid with same amount, the first request received by the server will be the winning request

A NOTE OF CAUTION FOR THE BIDDERS

Bidding during the last minutes of auction may encounter certain unforeseen problems such as time lag, heavy traffic, system/ power failure at the user end etc.

In order to avoid such problems and also not to lose out bidding, the bidders keen on buying any particular lot, are advised not to postpone the bidding to the last moment and to opt for the autobid options. This option is provided to overcome such technical difficulties.

In the autobid option the bidders can quote the maximum price they are willing to pay along with the incremental value of bidder's choice. This option will provide enough flexibility so that they need not sit before the computer throughout the auction process and need not worry about the technical problems.
