The Depositary will not be involved in the management, administration or Net Asset Value calculation of the Fund, nor will it monitor compliance with the Memorandum of such valuation or of the net asset value calculation of the Fund's shares or of the calculation of the prices at which any shares of the Fund are allotted, issued or redeemed. Potential Investors should not rely upon the Depositary in deciding whether or not to invest in the Fund.

Under the Depositary Agreement, the Fund will indemnify and hold the Depositary harmless against all actions, proceedings, claims, costs, charges, demands, outstanding liabilities or commitments which may be incurred by the Depositary in connection with the performance of its obligations unless the Depositary is in wilful default of its duties under the terms of the Depositary Agreement.

The Depositary shall be entitled to have recourse to the assets of one cell of the Fund, including the right to sell or otherwise dispose of the assets of the cell of the Fund held by the Depositary, and appropriate all or part of the cash proceeds thereof with a view to meeting and discharging the cost of any indemnity to which it is entitled under the provisions of the Depositary Agreement or at law or otherwise. The right to sell or dispose of assets shall be limited to assets within individual cells"

6. BROKERS

The Fund may appoint brokers through which it will transact its trades. Agreements will be entered into on the Brokers' standard terms and conditions of appointment and the Fund will be able to remove the Broker in accordance with such agreements.

7. AUDITOR

The Fund has appointed Deloitte Limited as the Auditor of the Fund. Deloitte Limited was incorporated in Gibraltar on the 18th December 2006. Its registration number is 97704 and registered office and operating address are at 22/24 John Mackintosh Square, Gibraltar. Deloitte Limited are approved under Financial Services (Auditors) Act 2009 to act as auditors.

At each Annual General Meeting the Fund shall appoint an Auditor or Auditors to hold office from the conclusion of that meeting until the conclusion of the next Annual General Meeting.

The Auditor may be removed by the Directors in accordance with terms of their agreement with the Fund.

V. GENERAL RISK FACTORS

Investors who invest in Participation Shares of Aero Fund PCC Limited will be exposed to certain general risks associated with investing in a Gibraltar Experienced Investor Fund. Investors to any current Cell of Aero Fund PCC Limited or any other Cell established in the future will be exposed to the same general risks.

Specific Risk Factors associated with the underlying investments made by each specific Cell are set out in Part B of this private placement memorandum.

Investors will not have an opportunity to select or value any of the investments of each Cell. All Cell investments will be selected by the Directors or their advisers as described in the investment objectives, strategies and policies of each Cell and as set-out in Part B of this private placement memorandum.

At any point in time, the Participation Shares may be worth less than the price paid for them. Investment in Participation Shares is intended only for, and limited to, the professional or sophisticated Investor who can afford the risks inherent in this type of investment.

There may be a change in government regulation or policies which materially adversely affects the Fund's activities. This is true with respect both to the regulation and policies of the Government of Gibraltar as well as that of the governments of any countries where the Fund invests.

Prospective Investors are recommended to review this private placement memorandum in its entirety before deciding whether to invest in Participation Shares and should specifically consider the following general risks together with the specific ones associated with each Cell detailed in Part B of this private placement memorandum:

Investment in the Fund. The Shares of the Fund have not been registered, listed or admitted to trade on any stock exchange nor is any such registration, admission or listing currently being contemplated.

Exchange rate. The Fund accepts subscriptions, pays redemptions and computes its Net Asset Values in the base currency of each Cell. However, many or all of the Fund's investments may be in instruments denominated in currencies other than in the base currency of the Cell. Accordingly, currency exchange rates are expected to play an important role in the Fund's return to Investors. A change in the value of currencies against the base currency of a Cell will result in a corresponding change in base currency value of the Fund's assets denominated in these currencies.

Regulatory supervision. The Fund and its Administrator are subject to the authority of the Financial Services Commission of Gibraltar (the "FSC"), but the Fund's investments are not monitored or supervised by the FSC or any other regulatory body (although if the Fund shall invest in listed companies such companies may be regulated by the local regulators). As an Experienced Investor Fund the Fund will provide annual audited accounts to the FSC and will comply with the relevant regulatory regime, details of which can be found at the FSC's website: www.fsc.gi. The Board of Directors shall ensure that all material changes to information provided to the Authority in connection with the Fund is notified to the Authority within 20 days of the change taking place.

Taxation. The Board of Directors will attempt to structure the Fund in a manner that is tax efficient. However, there can be no assurance that such structure will be tax efficient in general or for any particular Investor or that any particular tax result will be achieved. In general, tax laws, treaties, rules and procedures are extremely complex and are subject to changes on a frequent basis, which in some cases may reduce existing tax benefits, and may also have a retroactive effect. Accordingly, each potential Investor is urged to consult his, her or its own tax advisor regarding the applicability, effects and implications of the various tax laws with respect to the potential Investor.

U.S. Investors who are eligible to invest in the Fund (see Investors' Suitability for more details) should be aware that the Fund may be treated as a "passive foreign investment company" for U.S. federal income tax purposes and that they may be subject to adverse tax consequences. Potential

U.S. purchasers should consult their own tax advisers regarding the potential tax consequences of an investment in the Participation Shares.

Reliance upon Directors and/or the Investment Manager. The success of the Fund will be dependent to a large extent upon the efforts and skills of the Directors and the appointed Investment Manager, their associates and/or advisors.

Lack of Operating History. Although the Directors of the Fund are experienced investment professionals, it should be noted that the Fund is recently formed and has no operating history as such.

Substantial Expenses. The Fund and each Cell will pay various fees and other costs regardless of whether it is profitable. Each Cell must therefore generate significant net investment income in order to break even.

Effect of Redemption. If significant redemptions of Participation Shares are requested it may not be possible for a Cell to liquidate its investments at the fair value of the investments when the request for redemption is received, resulting in a decreased value of the investments.

Limited Liquidity/Redemptions. The shares of the relevant Cell are likely to be illiquid as there is no anticipated secondary market for such shares.

The Board may, in its absolute discretion, refuse to redeem any Participation Shares if in its opinion the relevant Cell does not have sufficient cash resources to complete the redemption. This will restrict the ability of Investors to redeem.

Protected Cell Company. The Fund is a protected cell company for the purposes of the Protected Cell Companies Act 2001 (the "PCC Act") which means that under Gibraltar law, provided the conditions laid down in the PCC Act are complied with, assets attributable to each Cell of the Company shall only be available to creditors in respect of that cell and the assets of that cell shall be protected from creditors of the Company who are not creditors in respect of that cell. Potential Investors should be aware that the segregation of assets and liabilities in this manner under Gibraltar law might not necessarily be recognised in jurisdictions where the Company's assets are located.

Loss of Investment. Any investment may not perform as well as forecast, either because of changes in the economic climate or otherwise, resulting in the total loss of the Fund's investment.

Political, Economical and Environmental Risks. The Net Asset Value of the Fund may be affected by uncertainties such as political or diplomatic developments, social and religious instability, changes in government policies, taxation and interest rates, acts of god, war or acts of terror and other political and economic developments in law or regulations and, in particular, the risk of, and change in, legislation relating to the level of foreign ownership of a project.

Gibraltar Investor Compensation Scheme. Investors in Gibraltar Experienced Investor Funds are not protected under the provisions of the Financial Services (Investor Compensation Scheme) Act 2002 and are therefore not entitled to recover losses.

Counterparty Risk. Any monies or assets held by counterparty on behalf of the Fund may be at risk and be unrecoverable if the counterparty defaults.

THE FOREGOING LIST OF RISK FACTORS DOES NOT PURPORT TO BE A COMPLETE EXPLANATION OF THE RISKS INVOLVED IN THIS OFFERING. ADDITIONAL RISK FACTORS IN RELATION TO A PARTICULAR CELL ARE DETAILED IN THE APPLICABLE PART B OF THIS PRIVATE PLACEMENT MEMORANDUM. PROSPECTIVE INVESTORS SHOULD READ THIS ENTIRE MEMORANDUM AND CONSULT WITH THEIR PROFESSIONAL ADVISERS BEFORE DETERMINING WHETHER TO INVEST IN THE FUND.

VI. FEES AND EXPENSES

1. INITIAL ORGANISATION COSTS

Costs and expenses associated with the initial organisation of the Fund, including government incorporation charges and professional fees and expenses in connection with the preparation of the Fund's information documents, and the preparation of its corporate documents and contracts, did not exceed €50,000 and have been paid by the Fund out of the initial proceeds of the offering of the Fund's shares. Such organisational costs and expenses will be amortised by the Fund over a period of 60 months.

It is important to note that under International Financial Reporting Standards the amortisation of such costs are not allowed and such costs should be expensed in full in the audited financial statements of the Fund in order for the financial statements to be prepared in accordance with IFRS. The Directors acknowledge that amortising such costs are in line with industry practice.

The initial organisational costs will be split between each individual Cell pro-rata based on their net assets or otherwise as the Board of Directors may, in their absolute discretion, determine.

2. FEES OF THE DIRECTORS

The Fund will pay aggregate directors fees (the "Directors Fees") to Raymond Joubaud, Ian Angus and Alexandra Assal of £16,000 per annum. The Directors Fees will be accrued on each Valuation Day and paid quarterly in arrears. The Directors Fees will be split between each Cell as specified in Part B of this private placement memorandum.

The Fund, in respect of each Cell, shall pay Ralf Huber an annual directors' fee of 0.10% of the AUM of each Cell. The directors' fee shall be accrued on each Valuation Day and paid quarterly in arrears as from 1st May 2012 as specified in Part B of this private placement memorandum.

The Fund in respect of each Cell may also pay directors fees based on management and/or based on performance, details of which are set out in Part B of this private placement memorandum.

Disbursements and "out of pocket expenses" such as telecommunication, facsimile and mail costs are charged separately.

3. FEES OF THE INVESTMENT MANAGER

The Fund with respect to each Cell shall pay Huber & Company Limited ("Huber & Co"), as the Investment Manager of the Fund, an investment management fee ("Investment Management Fee"), details of which are disclosed in Part B of this private placement memorandum.

4. FEES OF THE ADMINISTRATOR

The Fund with respect to each Cell will pay Velay Financial Services Limited, as the Administrator of the Fund, an administration fee ("Administration Fee") as set out in Part B of this private placement memorandum.

5. FEES OF THE COMPANY SECRETARY

The Fund with respect to each Cell will pay Velay Financial Services Limited, as the Company Secretary, a company secretarial fee (“Company Secretarial Fee”) as disclosed in Part B of this private placement memorandum.

6. FEES OF THE DEPOSITARY

The Fund with respect to each Cell will pay Lombard Odier & Cie (Gibraltar) Limited (“LO&C”) as the Depositary, a depositary fee (“Depositary Fee”) as disclosed in Part B of this private placement memorandum

Disbursements and “out of pocket expenses” such as telecommunication, fax, mail and office costs are charged separately.

7. OTHER OPERATING EXPENSES

The Fund, or, in the discretion of the Directors, the relevant Cell, will bear all other expenses incidental to its operations and business, including:

- i. Bankers’ transfer fees; and
- ii. Brokerage commissions; and
- iii. Fees of the Fund’s legal advisers and the auditors; and
- iv. Any income tax, withholding taxes, transfer taxes and other governmental charges and duties occurring for the Fund; and
- v. The costs of printing and distributing any prospectuses, reports as well as notices to the Investors.

The Fund’s legal, audit and other running expenses are estimated not to exceed €50,000 per annum. These expenses will be split equally between the Cells or otherwise as the Directors may, in their sole and absolute discretion, shall determine.

8. TRANSACTIONAL COSTS

For its trading activities, the Fund may use the services of one or more brokerage firms to execute and clear its transactions and to carry its accounts. The Directors will select the brokers for the Fund and will negotiate fees and commissions. The Fund will pay all expenses incurred in connection with its trading and investment activities, including but not limited to all execution, other transaction costs and expenses, custody expenses and all other related expenses and costs.

The Directors may negotiate and receive rebates of commission in respect of each brokerage transaction. Any rebates received shall be for the benefit of the Fund.

9. DIVISION OF FEES BETWEEN CELLS

The fees payable to the Directors, Auditor, legal advisers and other general running expenses shall be split between the Cells on a pro-rata based on their net assets, or otherwise as the Directors

may, in their sole and absolute discretion, shall determine that a different allocation is fair and reasonable.

The fees payable to the Investment Manager, Administrator, Company Secretarial and Depositary shall be paid separately by each Cell as set out in Part B of this private placement memorandum.

VII. INVESTORS RIGHTS, SUBSCRIPTIONS AND REDEMPTIONS

The rights and obligations of the holders of Participation Shares are governed by the Articles of Association of the Fund. Prospective Investors should examine the documents carefully and consult with their own legal counsel concerning their rights and obligations before subscribing for Participation Shares. Copies of the Articles of Association are available for inspection by an interested Investor at the Administrator's office during normal business hours on any Business Day. The following statements and other statements in this private placement memorandum concerning the Articles of Association and related matters are only a summary, do not purport to be complete, and in no way modify or amend the Articles of Association.

1. SHARE CAPITAL AND VOTING RIGHTS

Characteristics of Shares

Subject to restrictions contained in the Gibraltar Companies Acts, the Articles and as set out in this Memorandum, all authorised but unissued shares in the share capital of the Fund are under the control of the Directors who may (without prejudice to any special rights for the time being conferred on the holders of any shares or class of shares in the Fund), allot and dispose of, or grant options over the shares, to such persons on such terms (and with such rights or restrictions whether in regard to dividend, return of capital, voting or otherwise as the Fund may determine) and in such manner as the Directors think fit.

The Fund has an authorised share capital of €21,000 divided into:

- a) 2,000,000 Class A redeemable preference shares ("Class A Participation Shares") of €0.001;
- b) 2,000,000 Class B redeemable preference shares ("Class B Participation Shares") of €0.001;
- c) 2,000,000 Class C redeemable preference shares ("Class C Participation Shares") of €0.001;
- d) 2,000,000 Class D redeemable preference shares ("Class D Participation Shares") of €0.001;
- e) 2,000,000 Class E redeemable preference shares ("Class E Participation Shares") of €0.001;
- f) 10,000,000 Nominal Shares of €0.001 (collectively "Nominal Shares"), each which may be issued as separate classes of Nominal Shares;
- g) 1000 Ordinary Shares of €1 each (the "Ordinary Shares").

Participation Shares. Each class of Participation Share shall be constituted as a separate cell for the purposes of the PCC Act. In the event of a winding-up of the Cell, each Participation Share carries an entitlement, with respect to the assets of the Cell in which it has been constituted, to a return of the nominal capital paid up in respect of each share in priority to the repayment of the nominal capital paid up on the Nominal and Ordinary Shares. Only Participation Shares carry the right to share in surplus assets legally available for distribution.

Save as provided herein and in the Articles of Association of the Fund, Participation Shares of the same class issued in respect of a Cell shall rank *pari passu* in all respects. However, as set out in the Articles, separate classes of Participation Shares may have different rights as to redemptions and distributions, in accordance with the applicable Cells. Further details as to the Subscription and Redemption policies of each Cell are set out in Part B below.

The holders of Participation Shares are not entitled to be invited to, participate in or vote at any General Meetings of the Fund, except in a meeting on a resolution to change the Memorandum and Articles of Association of the Fund so far as such a change adversely affects the rights and obligations of the respective class of share, or at separate class meetings of the holders of the relevant Participation Share or any class thereof.

The rights of Participation Shares are deemed not to be varied by (a) the creation of a new Cell, the issue or redemption of any other Participation Shares within the same Cell or other Cells, in accordance with the Articles; (b) a reduction of issued share capital of any class of Shares (other than the affected Class); (c) the exercise by the Directors of their discretion under the Articles or, if the Fund should be wound up, the exercise by the liquidator of their powers under the Articles; (d) the payment of a dividend on other class of Participation Shares; (e) the removal and appointment of an investment manager or (f) the removal and appointment of any Director.

If at any time the Participation Shares in issue are divided into separate classes, different amounts of dividends may be payable in respect of the separate classes. No dividend shall be declared or paid other than from the profits or gains of the relevant Cell.

Ordinary Shares. The Ordinary Shares shall have voting rights but shall not participate in any profit or distribution of the Fund that is attributable to any of the Cells (save for the repayment of the nominal amount paid up on them in the event of liquidation of the Fund). All Ordinary Shares will be owned by the Facel Asset Management Company S.A

Nominal Shares. Nominal Shares are required in order to maintain the same issued share capital of the Fund following the redemption of Participation Shares. In order to allow such redemption without reducing the Fund's issued share capital, Nominal Shares will be issued at par to the Administrator allowing the redemption of the Participation Shares after set-off of such nominal amount from the redemption proceeds. Nominal Shares shall have no voting rights except on a resolution to wind up the Fund and shall not participate in any profit or distribution of the Fund (except the repayment of the amount paid up on the Nominal Shares in the event of liquidation of the Cell or the Fund).

All Classes of Shares. All shares are, when issued, shall be fully paid and non-assessable. No shares have pre-emptive, conversion, exchange or other rights or privileges, save as set out in the Memorandum and Articles of Association of the Fund.

The Fund shall hold its Annual General Meeting each year in addition to any other meeting which may be called in that year. Such meetings may be held at such time and place as may be determined by the Directors.

The Directors may at any time convene a separate meeting of any class of holders of Shares. A separate meeting of any class may also be convened by such requisitionists as provided in section 159 of the Companies Act. Notices of every general meeting of the Fund shall be given in the manner authorised in the Articles to every member. The Articles provide further details of the manner in which meetings of the Fund will be held.

No Investors of any class have rights in respect of any specific property or assets of the Fund or of any Cell. No Investors, for example, have any right to vote at any meeting called by a Fund or other vehicle whose securities or interests are owned by the Cell in question or by the Fund.

Investors are not directly liable for the debts of the Fund, and are not obliged to contribute towards the assets of the Fund (or of any Cell) in any amount in excess of the price which they have agreed to pay for their shares and have not done so yet.

Protected Cell Company. The Fund is a protected cell company for the purposes of the PCC Act, which means that under Gibraltar law, provided the conditions laid down in the PCC Act are complied with, assets attributable to each Cell of the Fund shall only be available to creditors in respect of that Cell and shall be protected from creditors of the Fund who are not creditors in

respect of that Cell. However, potential Investors should note that the Fund and the Cells are one legal entity and assets and property in the Cells are legally the property of the Fund; therefore the segregation of assets and liabilities in the manner set forth above under Gibraltar law might not necessarily be recognised in jurisdictions where the Fund's assets are located and a Cell's assets may be subject to attack by any third party.

2. SUBSCRIPTIONS

Participation Shares will be available for subscription in each Cell as set out in Part B of this private placement memorandum.

The minimum initial subscription that will be accepted from a new Investor in the Fund will be €100,000, or its equivalent, or €50,000, or its equivalent if the new Investor has been advised by a Professional Adviser to invest in the Fund and the Administrator has received confirmation of such advice.

The Board reserves the right to alter the above-mentioned minimum subscription requirements and any other subscription requirements at its absolute discretion. The Board also reserves the right to receive tradable securities in lieu of or in addition to cash for payment of Subscription monies. The Directors, on the recommendation of the Administrator, shall determine the cash value of any such *in specie* subscription as at the Valuation Date.

The Board may, on an exceptional basis and provided that it is satisfied, at its sole discretion, that the terms of any such subscription would be for the benefit of the remaining Investors, elect that instead of subscribing for Participation Shares in cash, the subscription shall be made *in specie* by the transfer to the applicable Cell of certain investments, provided that:

- (a) in the case of a person who is not an existing Investor no Participation Shares shall be issued until the person concerned shall have completed and delivered to the Administrator the Subscription Agreement required under this Memorandum (or otherwise) and/or otherwise satisfied all the requirements of the Directors and Administrator as to such person's application;
- (b) the nature of the investments transferred into the Cell are such as would qualify as investments of such Cell in accordance with the investment objectives, policies and restrictions of such Cell;
- (c) no Participating Shares shall be issued until the investments shall have been vested in the Depository to the Depository's satisfaction; and
- (d) any exchange shall be effected upon the terms (including provision for paying any expenses of exchange and any preliminary charge as would have been payable for Participation Shares issued for cash) that the number of Participation Shares issued shall not exceed the number which would have been issued for cash against payment of a sum equal to the value of the investments concerned calculated in accordance with the procedures for the valuation of the assets of the Fund. Such sum may be increased by such amount as the Directors may consider represents an appropriate provision for duties and charges which would have been incurred by the Fund in the acquisition of the investments by purchase for cash or decreased by such amount as the Directors may consider represents any duties or charges to be paid to the Fund as a result of the direct acquisition by the Fund of the investments.

Subscription Amounts and relevant documentation should be received at least two Business Days prior to the relevant Subscription Day. The acceptance of subscriptions is subject to confirmation of the prior receipt of cleared funds credited to the Cell's subscription account with the Depository. The Board reserves the right to reject subscriptions in its absolute discretion. Any interest earned by the Fund on Subscription Amounts will be for the benefit of the applicable Cell and the Investor shall have no right to receive interest or other sums from the Cell in respect of such sums.

A Subscription Fee may be charged by the Administrator on subscription to the Fund as set-out in Part B of the private placement memorandum.

Subscriptions Received in Non-Base Currency

Subscriptions received in non-base currency of the Fund will be accepted by the Fund and valued as follows:

- The Directors will make an assessment if the non-base currency received can be used by the Fund;
- Any non-base currency received that can be used by the Fund will be accepted in the non-base currency and shall remain in non-base currency and be valued according to the exchange rates produced by Bloomberg on the date the Participation Shares are issued;
- Any non-base currency received that cannot be used by the Fund will be exchanged into base currency within at least two (2) Business Days of the date the Participation Shares are issued and the amount of base currency obtained as a result of the exchange is the rate assigned to the respective Investor;
- The Directors may at their discretion apply a combination of the aforementioned treatments for the non-base currency subscriptions. The value of which will be pro-rate among the non-base currency Investors at each date the Participation Shares are issued; and
- The determination of whether or not the non-base currency can be used by the Fund will be at the sole and absolute discretion of the Directors.

3. REDEMPTIONS

Detailed description of the manner and terms for the redemption of Participation Shares in respect of each Cell are set out in Part B of this private placement memorandum.

The Directors may, in their absolute discretion refuse to redeem any Participation Shares if in their opinion the respective Cell does not have sufficient cash resources to complete the redemption and/or in the event the Directors believe that such an action will be materially detrimental to the remaining Investors, as described in "suspension of redemption" below. The Directors will notify the Investor of such refusal. The Directors shall not be required to sell any assets or borrow any monies to obtain the resources to redeem any Participation Shares. If the Fund does not complete the redemption on the first Redemption Day requested then the Redemption Notice shall be deemed withdrawn by the member who shall be required to submit a new Redemption Notice in order to redeem the shares.

Save if allowed in relation to a Cell, a partial redemption request for an amount of less than €10,000 or equivalent will not be accepted. The Board has the right to require the compulsory redemption of all Participation Shares held by an Investor who is a U.S. Person, or otherwise, at its sole discretion. Any such compulsory redemption will be made at the Net Asset Value per Share on the Valuation Day next following the issuance of a notice of redemption to the Investor.

Save if otherwise decided in relation to a Cell, the redemption price is equal to the Net Asset Value of the applicable Participation Shares of the Cell at the relevant Redemption Day.

The Board may, on an exceptional basis and provided that it is satisfied, at its sole discretion, that the terms of any such exchange would be for the benefit of the remaining Investors and with the agreement of an Investor seeking the realisation of Participation Shares in any Fund, elect that instead of the Participation Shares being redeemed in cash, the redemption shall be satisfied *in specie* by the transfer to the Investor a portion of the underlying investments which equal to an amount not exceeding the amount which otherwise would have been payable on a cash

redemption. The shortfall (if any) between the value of the investments transferred on a redemption in specie and the redemption proceeds which would have been payable on a cash redemption shall be satisfied in cash.

If the discretion conferred upon the Board by the above paragraph is exercised, the Board shall notify the Depository and shall supply to the Depository particulars of the investments to be transferred and the amount of cash to be paid to the Investor. All stamp duties, transfer and registration fees in respect of such transfers shall be payable by the Investor.

The redemption proceeds will be normally remitted within five Business Days, unless otherwise specified in Part B hereto, after the approval by the Board of the relevant Net Asset Value on the Valuation Day on which the redemption is based, without interest for the period from this date to the payment date.

The proceeds of the redemption will be retained and held by the Fund in its bank account in trust for the relevant Investor (but without interest or further obligation whatsoever), and will be paid against surrender of the certificate or certificates (if issued) representing the Participation Shares previously held by such person or the proffering of such other evidence as to title as the Directors may require. In the normal course of events, the Fund or its service providers will retain all share certificates at the time of issue or transfer of Participation Shares in order to assist in the redemption procedure.

Redemption payments will be made in the base currency of the Cell and will be remitted to the Investor by wire transfer to such account as specified by the Investor in his Redemption Notice.

A Redemption Fee may be charged by the Administrator on redemption of Participation Shares as set-out in Part B of the private placement memorandum.

The Board reserves the right to vary any of the redemption requirements of the Fund.

4. SUSPENSION OF REDEMPTIONS AND SALE

The Board may suspend the calculation of the Net Asset Value of the Participation Shares and consequently may suspend the sale of Participation Shares and the right of Investors to require the Fund to redeem Participation Shares, and/or in their discretion refuse to redeem Participation Shares in any of the following events:

- a) When any securities exchange or organised inter-dealer market on which a significant portion of a Cell's assets is regularly quoted or traded is closed (other than for holidays) or trading thereon has been restricted or suspended;
- b) When as a result of political, economic, military or monetary events or any circumstances outside the control, responsibility and power of the Fund, disposal of the assets of a Cell is not reasonable or normally practicable without being seriously detrimental to Investors' interests;
- c) If it is not reasonably practicable to determine the Net Asset Value of the Participation Shares on an accurate and timely basis;
- d) If, as a result of exchange restrictions or other restrictions affecting the transfer of funds, transactions on behalf of a Cell are rendered impracticable or if purchases and sales of a Cell's assets cannot be effected at normal rates of exchange;
- e) Upon the decision to liquidate and dissolve the Fund or any Cell; or
- f) In the event the Directors deem such action will be materially detrimental to the remaining Investors.

5. REGISTRATION AND TRANSFER OF SHARES

The Fund will maintain a current list of the registered names and addresses of the Fund's Investors at the registered office of the Fund in Gibraltar.

Share certificates representing Participation Shares (if such certificates were issued) will be held by the Administrator in trust for the Investors, unless an original share certificate has been specifically requested by the Investor.

Transfers of Participation Shares can only take effect by serving upon the Fund an instrument of transfer signed by or on behalf of the transferor and the transferee. In the event that any share certificates in respect of Participation Shares which are to be transferred are held by Investors, those share certificates must be endorsed by the Investor and returned to the Fund.

The Fund has designated the Administrator under the terms of the Administration Agreement to perform the above-mentioned duties in connection with the registration and transfer of Participation Shares.

Any transferee will be required to provide the Administrator the same information which would be required in connection with a direct subscription in order for a transfer application to be considered by the Administrator. Violation of applicable ownership and transfer restrictions may at the discretion of the Board result in compulsory redemption of the relevant Participation Shares.

The Participation Shares are not listed nor proposed to be listed on any securities exchange. As of the date of this private placement memorandum it is not anticipated that there will be any secondary market for trading in the Participation Shares.

Participation Shares may not be transferred to any U.S. Person.

6. DIVIDEND POLICY

The dividend policy of each Cell is set out in Part B of this private placement memorandum.

VIII. INVESTOR SUITABILITY

Experienced Investors

The Fund is an Experienced Investor Fund as defined under the Financial Services (Experienced Investor Funds) Regulations 2012. No person shall be accepted as an Investor in the Fund, unless they are deemed to be an “experienced investor” in accordance with the Financial Services (Experienced Investor Funds) Regulations 2012.

An “experienced investor” is a person or body who, at the time of the investment falls into one of the following categories–

- (i) a participant in a fund that has re-domiciled to Gibraltar where the Financial Services Commission of Gibraltar has permitted the inclusion of such participant either in respect of a specific fund or generally in respect of funds or a category of funds from a certain jurisdiction.

The Financial Services Commission of Gibraltar may, with the prior approval of the Minister, approve other categories or descriptions of experienced investor where it considers that it is reasonable to expect that persons within that category or description at the time of the investment are sufficiently experienced to understand the risks associated with an investment in the Fund.

U.S Investors

Unless consented to by the Directors, Participation Shares may be purchased only by persons who are not “U.S. Persons” as defined below and are not, directly or indirectly “U.S. Shareholders” as defined in Section 957 of the United States Internal Revenue Code.

Each prospective Investor will be required to certify that the Participation Shares are not being acquired directly or indirectly for the account or benefit of a U.S. Person, unless such U.S. Person is an “Accredited Investor” as defined in Regulation D under the U.S. Securities Act of 1933 and a “Qualified Client” as defined under the U.S. Investment Adviser Act of 1940.

“Accredited Investor” means:

- a bank, insurance company, registered investment company, business development company, or small business investment company;
- an employee benefit plan, within the meaning of the Employee Retirement Income Security Act, if a bank, insurance company, or registered investment adviser makes the investment decisions, or if the plan has total assets in excess of \$5 million;
- a charitable organization, corporation, or partnership with assets exceeding \$5 million;
- a director, executive officer, or general partner of the company selling the securities;
- a business in which all the equity owners are accredited investors;

It is the responsibility of each Investor to verify that the purchase of and payment for the Participation Shares is in compliance with all relevant laws of the Investor’s jurisdiction of residence.

IX. NET ASSET VALUATIONS

The value of the assets and liabilities attributable to classes of Participation Shares and the method of valuation of such assets and liabilities shall be determined by the Directors.

In accordance with the Fund's Memorandum and Articles of Association Net Asset Valuations in respect of each Cell will be calculated by the Administrator at the close of business in Gibraltar on each Valuation Day, based on the guidelines set forth herein and as determined by the Board which may consult with and rely on the advice of the Administrator and/or the Auditors, and shall be approved by the Board.

1. NAV CALCULATION METHODOLOGY

Net Asset Value calculations are determined in the following manner:

Aggregate Net Asset Value. The Aggregate Net Asset Value of the relevant Cell at a particular Valuation Day is computed by subtracting from the total value of the assets attributable to the Cell an amount equal to all liabilities and contingencies for which the Administrator determines that reserves or accruals should be made.

Net Asset Value per Share. The Net Asset Value per Share on any Valuation Day is equal to the Aggregate Net Asset Value of the relevant Cell divided by the total number of Participation Shares outstanding in respect of such Cell on the Valuation Day, calculated prior to the recording of issuances and redemption of Participation Shares requests for which have been delivered effective as of that date. The Net Asset Value per Share will be rounded to two decimal places.

Methods of Valuation

Calculations are made by the Administrator as set out herein in accordance with international accounting standards, including provision for proper accruals and reserves.

Equities are valued on the Valuation Day at the last traded price on the principal exchanges on which the equities are traded. For derivatives and long option positions, the Net Asset Value will be calculated based on the closing price for the relevant day. For short option positions, the Net Asset Value will be calculated based on the closing price for the relevant day. For bonds, both long and short, the Net Asset Value will be calculated based on the closing price as stated on Bloomberg or such other reputable reporting agency.

If an investment is quoted, listed or normally dealt in on more than one regulated market, the Directors may, in their absolute discretion, select any one of such markets for the foregoing purposes (provided that the Directors have determined that such market constitutes the main market for such investment or provides the fairest criteria for valuing such securities) and once selected a market shall be used for future calculations of the Net Asset Value unless the Directors otherwise determine.

Foreign Exchange Rates

The Fund's accounts are maintained in EUROS and the accounts for each of the Cells are maintained in the base currency of that Cell. Assets and liabilities denominated in other currencies are translated at the rate of exchange in effect at the relevant Valuation Day and translation adjustments are reflected in the results of operations. Portfolio transactions and income and expenses are translated at the rates of exchange in effect at the time of each transaction.

X. GIBRALTAR ANTI-MONEY LAUNDERING AND DATA PROTECTION REQUIREMENTS

Anti-Money Laundering

As part of the Fund's responsibility for the prevention of money laundering and protection of the Investor, the Fund shall require a detailed verification of an Investor's identity and origin of their investment funds, and is required to document the investment objectives, financial situation, knowledge and experience of the Investor as follows:

An individual shall be required to produce a copy of a passport and a copy of an identification card and proof of residence certified by a lawyer, accountant, or banker. The Fund may require that such document be certified by a notary public.

The Administrator may request an Investor produce a letter of reference from a banker, lawyer or accountant in the attached format. Please note the different formats for individual and corporate Investors.

An individual shall be required to complete a Subscription form detailing their investment objectives, their financial situation (including origin of funds and expected activity on the account) and their knowledge and experience of financial investments.

In the case of corporate applicants, they shall be required to complete a Subscription form detailing (for their beneficial owners) their investment objectives, their financial situation (including origin of funds and expected activity on the account) and their knowledge and experience of financial investments.

The Fund or the Depositary reserves the right to request such information as is necessary to verify the identity of an applicant, origin of funds and appropriateness of the investment. In the event of delay or failure by the applicant to produce any information required for verification and protection of Investor purposes, the Fund may refuse to accept the application and the subscription monies relating thereto.

Any information supplied to the Fund will, subject to any legal restrictions, be made available by the Fund to the Administrator and Depositaries.

Data Protection

As part of the application process all Investors are required to submit various documents to the Administrator. These are required to enable completion of the application process and to comply with all relevant legislation. Any information received will be kept by the Administrator in accordance with any applicable Data Protection legislation and, in the normal course of business, will not be made available to anyone other than the Administrator and the Company.

However, it may become necessary to transfer data at any time to comply with legislation in force either now or at any time in the future (see under 'Anti Money Laundering Legislation' for further details). Further, should the administrative functions, in whole or in part, be transferred to another entity, data will be transferred to the extent necessary for such new entity to carry out its functions effectively.

By subscribing to the Fund all Investors should note the above, and also note that, by completion of the application form, they are agreeing to any transfer of data carried out for any of the reasons

given above, or for any reason that the Administrator deems necessary to comply with legislation in force at the time.

Further, the Investors, the Company and its service providers consent that any and all data required by the Administrator (in its capacity as such or in its capacity as Registrar or Company Secretary) in exercise of its duties on behalf of the Fund may be transferred to and/or from the Administrator (in its capacity as such or in its capacity as Registrar or Company Secretary) in accordance with any applicable data protection legislation.

XI. TAXATION

The following is a summary of certain material Gibraltar tax consequences to purchasers of Participation Shares. This summary does not discuss all the aspects of Gibraltar tax law that may be relevant to a particular Investor in light of his or her personal investment circumstances or to some types of Investors subject to special treatment under Gibraltar law. To the extent that the discussion is based on new tax legislation that has not been subject to judicial or administrative interpretation, we cannot assure you that the tax authorities will accept the views expressed in the discussion in question. The discussion is not intended, and should not be taken, as legal or professional tax advice and is not exhaustive of all possible tax considerations. In addition, the tax discussion herein assumes that the Fund will not conduct its business in Gibraltar or with Gibraltarians.

1. THE FUND

The affairs of the Fund and its Cells will be managed so as to minimise the possibility of any tax liability arising in Gibraltar. There can be no assurance that all potential tax liability will be fully eliminated.

The Fund may apply to the Commissioner of Income Tax for a certificate of exemption from income tax under the Income Tax (Allowances, Deductions and Exemptions) Rules, 1992. There can be no assurance that the Fund will obtain an exemption certificate.

However, even if the Fund does not obtain the certificate of exemption set forth above, and although the Fund is managed and controlled in Gibraltar, it will not be liable for Gibraltar income tax on profits arising from property situated outside of Gibraltar or profits which are generated by sources of income the activities of which take place outside Gibraltar. The Fund will also not be liable for Gibraltar income tax on dividends from quoted companies or dividends arising from unquoted companies in which it has a 10.00% holding as long as the Fund has a relevant participation in a subsidiary that is registered and managed within the European Union.

Dividends, interest and capital gains (if any) the Fund receives with respect to its investments may be subject to taxes, including withholding taxes, in the countries in which the issuers of investments are located.

No stamp duty is currently levied in Gibraltar on the issue or transfer of Shares in the Fund. There is a capital duty of £10 on the creation of share capital of the Fund and on any increase thereof, the costs of which form part of the establishment expenses which are borne by the Fund.

There is no withholding tax on dividends distributed by the Fund. Accordingly, payments made on the issuance of dividends may be paid without deduction of any withholding taxes to Investors.

No death duties, capital gains tax, gift, inheritance or capital transfer taxes are presently levied in Gibraltar. Investors that are not fiscally resident in Gibraltar are not liable to Gibraltar tax on dividends or capital gains received as a result of their ownership of the Participation Shares.

2. THE INVESTORS

Persons interested in purchasing the Participation Shares should inform themselves as to any tax consequences particular to their circumstances and arising in the jurisdiction in which they are resident or domiciled in connection with the acquisition, ownership, redemption or disposition of the Participation Shares.

Each Investor should consult a tax adviser as to his or her own tax position.

INVESTMENT OBJECTIVE

Cell A - Aero Fixed Income - seeks to achieve a positive absolute return through investment in fixed income vehicles which will, in the opinion of the Board of Directors, give above market returns while retaining a good level of security. The Board of Directors will implement different strategies it feels will make the best return such as barbell/bullet, duration, maturity and/or credit strategies, but it is anticipated that the Cell will not be involved in active trading and turnover.

SUBSCRIPTIONS

The Fund is offering Class A Participation Shares for subscription at a net price per Share equal to the Net Asset Value per Share at the close of business on the Valuation Day immediately preceding the relevant Subscription Day.

Class A Participation Shares may be subscribed for on each Subscription Day after the Subscription Agreement and any monies due in respect of such shares have been received by the Fund.

The minimum initial investment by each Investor is €100,000, or its equivalent, or €50,000, or its equivalent, if the Investor has been advised by a Professional Adviser to invest in the Fund and the Administrator has received confirmation of such advice. Additional subscriptions are permitted, subject to a minimum of €10,000 per transaction or its equivalent.

A Subscription Fee of up to 1.00% may be charged by the Administrator on subscription to Class A Participation Shares. The Subscription Fee is based on the value of, and added to the purchase price of the Class A Participation Shares. The Board reserves the right to vary any of the subscription requirements of the Cell.

Further information in respect of subscriptions to each Cell is contained in this Part B of this private placement memorandum.

REDEMPTIONS

Class A Participation Shares may be redeemed at the Net Asset Value per Share on the Redemption Day, following the expiry of not less than fifteen days' Redemption Notice from the Investor to the Fund. period.

The minimum redemption amount is €10,000 or equivalent. The Redemption Fee is based on the value of, and subtracted from the redemption proceeds of the Class A Participation Shares. III. INVESTMENT OBJECTIVES AND RESTRICTIONS

Investment Objective

Aero Fixed Income seeks to achieve a positive absolute return through investment in fixed income vehicles which will give above market returns while retaining a good level of safety. The fixed-income vehicles will include, but will not be limited to, bonds, notes, subordinated debt, fixed-income funds and non-bearing interest debt from issuers such as Governments, agencies, municipalities, supranational entities and corporations. The Board of Directors will implement different strategies it feels will make the best return such as barbell/bullet, duration, maturity and/or credit strategies, but it is anticipated that the Cell will not be involved in active trading and turnover.

Investment Restrictions

The following investment restrictions will apply to the Cell:

- No more than 20% of the gross assets of the Cell may be invested in the securities of any one issuer at the time of purchase. If the portfolio grows and the securities of a single issuer in the Fund's portfolio increases above 20%, the Fund will not be required to sell securities to reduce its holding to 20%. The 20% limit is only required to be observed at the time when the investment is made. However, this restriction shall not apply to securities issued or guaranteed by a government, government agency or instrumentality of any European Union or OECD Member State or by any supranational authority of which one or more European Union or OECD Member States are members. The restriction will also not apply to new issues.
- The Cell will not employ leverage or take a credit loan in cash from any bank or financial institution.
- There will not be a minimum rating required for the Cell to be able to invest in a fixed income vehicle.

IV. INVESTOR INFORMATION

The Directors of the Fund in relation to Cell A agree to compute and provide the following reports to Investors, or their nominees, each in a form acceptable to the Directors and prepared in accordance with International Accounting Standards.

Net Asset Value: The Net Asset Value per Share of the Cell on each Valuation Day will be computed by the Administrator and reported to the Investors within 5 business days of the Net Asset Value having been approved by the Directors.

Audited Statements: Annual audited financial statements will be provided, upon request, within six months of the financial year-end.

Whilst the Cell will endeavour to provide the aforementioned by the time deadlines stated, the Cell shall not be held liable for any delays in providing the relevant reports and/or publishing the relevant information which result from unexpected contingencies, such as delays in receiving necessary information from which to prepare such reports or information; equipment failure; fire or other physical damage to office or equipment or power failures.

The audited financial statements shall be kept at the administrator's office and filed with the FSC within 6 months of the financial statement period end, or any such other time as determined by the FSC.

V. SPECIFIC RISK FACTORS

In addition to the risk factors set forth in Part A of this private placement memorandum, the following additional specific risk factors exist in connection with the Cell's investment policy to invest fixed-income vehicles.

Management Risk. The success of the Cell's investments in fixed-income vehicles is subject to the ability of the Board of Directors to achieve the Portfolio Fund's investment objectives.

Inflation Risk. Inflation risk is the risk that the value of assets or income from fixed-income investments will be worth less in the future as inflation decreases the value of money. Inflation also tends to lead to higher interest rates which in turn cause bond prices to fall.

Non-Diversification Risk. If the Cell's investment in fixed-income vehicles represents a relatively significant percentage of the Cell's portfolio, the value of the portfolio will be more impacted by a loss on that vehicle than if the portfolio were more diversified.

Interest Rate Risk. Interest rate risk is the risk that the value of fixed-income vehicles will fall if interest rates increase. These securities typically fall in value when interest rates rise and rise in value when interest rates fall. Fixed income securities with longer periods before maturity are often more sensitive to interest rate changes. Hence when interest rates rise, fixed-income vehicles prices fall and conversely when interest rates fall, fixed-income vehicles prices rise. The longer the time to a bond maturity, the greater the interest rate risks.

Natural Disasters. The financial markets are often severely affected by natural disasters such as earthquakes, hurricanes and tsunamis. In the event of a natural disaster in a region of high economic output, financial markets normally sell-off, resulting in a severe decline in market value of all securities. Natural disaster therefore could be detrimental to the Net Asset Value of the Cell.

Economic Climate. The reporting of weak economic data such as unemployment figures, house buying, consumer confidence, gross domestic product, inflation etc. can have a direct or indirect impact on the value of a chosen stock.

Past Performance. Past performance is no indication of future performance, although investment decisions may contribute some weight to a stocks past performance when deciding to invest in the stock.

Taxation Risks. Taxation risk involves the taxation laws of the jurisdiction in which a corporation is domiciled. Local tax laws may impose withholding taxes or other taxes on the payment of dividends on a stock or the payment of interest on a fixed-income security.

Political Risk. The value of a specific stock may be affected by uncertainties such as political or diplomatic developments, social and religious instability, changes in government policies, taxation and interest rates, acts of god, war or acts of terror and other political and economic developments in law or regulations and, in particular, the risk of, and change in, legislation relating to the level of foreign ownership of a project.

Counterparty Risk. Any monies or assets held by counterparties on behalf of the Fund may be at risk and be unrecoverable if the counterparty defaults.

Default Risk. Default risk is the risk that the issuer of the fixed income vehicle defaults with any payment in relation to the fixed income vehicle issued. Lenders and Investors are exposed to default risk in virtually all forms of credit extensions. The global economy is currently experiencing a "sovereign debt crisis" whereby certain member states of the European Union are on the verge of technically defaulting on their sovereign debt.

Emerging/Developing Country Risks. The relevant Cell may invest in certain emerging market countries which are more speculative in nature, are subject to greater market fluctuations and risk of loss than normally associated with investments in more developed and more politically and

economically stable jurisdictions with more sophisticated capital markets and regulatory regimes, such as the United States and Western Europe.

Currency Exchange Risk. Investments may be made which are denominated in currencies other than the base currency of the Cell. Due to currency exchange, there is a risk that any gains in investment value will be off-set against a change in exchange rate.

The Foreign Account Tax Compliance Act (FATCA). FATCA is U.S legislation relating to combating tax evasion and the recouping of tax revenues. FATCA requires that non-U.S foreign financial institutions identify and disclose their U.S members or be subject to a 30.00% withholding tax on any U.S sourced income paid on or after the 1st January 2014. Further detail regarding the implementation of this legislation is pending; however, Investors should be aware that certain information on Investor required on subscription of shares to the Fund could be disclosed to U.S authorities.

THE FOREGOING LIST OF RISK FACTORS DOES NOT PURPORT TO BE A COMPLETE EXPLANATION OF THE RISKS INVOLVED IN THIS OFFERING. PROSPECTIVE INVESTORS SHOULD READ THIS ENTIRE MEMORANDUM AND CONSULT WITH THEIR PROFESSIONAL ADVISERS BEFORE DETERMINING WHETHER TO INVEST IN THE FUND.

III. INVESTMENT OBJECTIVES AND RESTRICTIONS

Investment Objectives

Cell B - Aero Patrimony - seeks to achieve a positive absolute return through investment in equities such as stocks, certificates, warrants, funds, funds of funds, ETFs, future bonds and commodities and option contracts (exchange-traded or OTC), or any equity related vehicle that the Board of Directors deems appropriate. The Fund will only invest in those markets, which in the sole judgement of the Board of Directors at the time of making such investments have sufficient liquidity to enable the Board of Directors to open and close positions without causing excessive movements. The strategy will be of a buy and hold approach, with a bias on value. The Fund on behalf of the Cell could, opportunistically, engage in some active trading (i.e. buying/selling a position several times a week), but this will be the exception rather than the norm.

Investment Restrictions

The following investment restrictions will apply to the Cell:

- No more than 20% of the gross assets of the Cell may be invested in the securities of any one issuer at the time of purchase. If the portfolio grows and the securities of a single issuer in the Fund's portfolio increases above 20%, the Fund will not be required to sell securities to reduce its holding to 20%. The 20% limit is only required to be observed at the time when the investment is made. However, this restriction shall not apply to securities issued or guaranteed by a government, government agency or instrumentality of any European Union or OECD Member State or by any supranational authority of which one or more European Union or OECD Member States are members. The restriction will also not apply to new issues;
- The Cell will not employ leverage or take any credit loan in cash from any bank or financial institution;
- A minimum cash position of 5.00% of the Gross assets of the Cell will be available for redemptions at any time;
- The Cell will not take legal or management control of the issuers of underlying investments;
- The Cell will not invest in real Estate;
- The Cell will not invest in physical commodities other than gold & precious metals;
- There is no limitation on trading liquid currencies.
- The manager can invest 0 – 40.00% in defensive assets.
- The manager can invest 0 – 60.00% in dynamic assets taking into consideration macro economic structures.

IV. INVESTOR INFORMATION

The Directors with respect to Cell B agree to compute and provide the following reports to Investors, or their nominees, each in a form acceptable to the Directors and prepared in accordance with International Accounting Standards.

Net Asset Value: The Net Asset Value per Share of the Cell on any Valuation Day will be computed by the Administrator and reported to the Investors within 5 days of the Net Asset Value having been approved by the Directors.

Audited Statements: Annual audited financial statements will be provided, upon request, within six months of the financial year-end.

Whilst the Cell will endeavour to provide the aforementioned by the time deadlines stated, the Cell shall not be held liable for any delays in providing the relevant reports and/or publishing the relevant information which result from unexpected contingencies, such as delays in receiving necessary information from which to prepare such reports or information; equipment failure; fire or other physical damage to office or equipment or power failures.

The audited financial statements shall be kept at the administrator's office and filed with the FSC within 6 months of the financial statement period end, or any such other time as determined by the FSC.

V. SPECIFIC RISK FACTORS

In addition to the risk factors set forth in Part A of this private placement memorandum, the following additional specific risk factors exist in connection with the Cell's investment policy to invest mainly in equities and their derivatives:

Speculative Position Limits. Some exchanges have established speculative position limits, which govern the maximum position, which any person may hold or control. It is possible that the Investment Manager may have to modify trading strategies or liquidate positions in order to avoid exceeding speculative position limits. Such modification or liquidation, if required, could adversely affect the Cell's objective to achieve capital appreciation.

Forward Markets. Although the forward markets, including the foreign currency markets, may not necessarily be more volatile than the markets in other assets, the forward markets offer less protection against defaults in trading than is available when trading occurs on an exchange. Forward contracts are not guaranteed by an exchange or clearing house, and therefore, a non-settlement or default on the contract would deprive the Cell of unrealised profits or force the Fund to cover its commitment for purchase and resale, if any, at the current market price.

The low margin normally required in forward trading permit an extremely high degree of leverage, since margin requirements for futures trading in some cases are as little as 2.00% of the face value (or "exposure") of the contracts traded. Therefore the gross value of positions held may be several times the value of the assets under management. Consequently, even a slight movement in the prices of commodities to which the assets under management are exposed could result in immediate and substantial losses to the Investor .

Management Risk. The success of the Cell's investments in fixed-income vehicles is subject to the ability of the Board of Directors to achieve the Portfolio Fund's investment objectives.

Non-Diversification Risk. If the Cell's investment in fixed-income vehicles represents a relatively significant percentage of the Cell's portfolio, the value of the portfolio will be more impacted by a loss on that vehicle than if the portfolio were more diversified.

Natural Disasters. The financial markets are often severely affected by natural disasters such as earthquakes, hurricanes and tsunamis. In the event of a natural disaster in a region of high economic output, financial markets normally sell-off, resulting in a severe decline in market value of all securities. Natural disaster therefore could be detrimental to the Net Asset Value of the Cell.

Economic Climate. The reporting of weak economic data such as unemployment figures, house buying, consumer confidence, gross domestic product, inflation etc. can have a direct or indirect impact on the value of a chosen stock.

Past Performance. Past performance is no indication of future performance, although investment decisions may contribute some weight to a stocks past performance when deciding to invest in the stock.

Taxation Risks. Taxation risk involves the taxation laws of the jurisdiction in which a corporation is domiciled. Local tax laws may impose withholding taxes or other taxes on the payment of dividends on a stock or the payment of interest on a fixed-income security.

Political Risk. The value of a specific stock may be affected by uncertainties such as political or diplomatic developments, social and religious instability, changes in government policies, taxation and interest rates, acts of god, war or acts of terror and other political and economic developments in law or regulations and, in particular, the risk of, and change in, legislation relating to the level of foreign ownership of a project.

Counterparty Risk. Any monies or assets held by counterparties on behalf of the Fund may be at risk and be unrecoverable if the counterparty defaults.

Emerging/Developing Country Risks. The relevant Cell may invest in certain emerging market countries which are more speculative in nature, are subject to greater market fluctuations and risk of loss than normally associated with investments in more developed and more politically and economically stable jurisdictions with more sophisticated capital markets and regulatory regimes, such as the United States and Western Europe.

Currency Exchange Risk. Investments may be made which are denominated in currencies other than the base currency of the Cell. Due to currency exchange, there is a risk that any gains in investment value will be off-set against a change in exchange rate.

The Foreign Account Tax Compliance Act (FATCA). FATCA is U.S legislation relating to combating tax evasion and the recouping of tax revenues. FATCA requires that non-U.S foreign financial institutions identify and disclose their U.S members or be subject to a 30.00% withholding tax on any U.S sourced income paid on or after the 1st January 2014. Further detail regarding the implementation of this legislation is pending; however, Investors should be aware that certain information on Investors' subscription of shares to the Fund could be disclosed to U.S authorities.

THE FOREGOING LIST OF RISK FACTORS DOES NOT PURPORT TO BE A COMPLETE EXPLANATION OF THE RISKS INVOLVED IN THIS OFFERING. PROSPECTIVE INVESTORS SHOULD READ THIS ENTIRE MEMORANDUM AND CONSULT WITH THEIR PROFESSIONAL ADVISERS BEFORE DETERMINING WHETHER TO INVEST IN THE FUND.

A partial redemption request for an amount of less than €10,000 or equivalent will not be accepted. Redemption of Participation Shares resulting in a remaining balance with a Net Asset Value of less than €100,000 or equivalent will give the Board the right to require the compulsory redemption of all the Participation Shares held by the relevant Investor. The Board further has the right to require the compulsory redemption of all Participation Shares held by an Investor who is a U.S. Person (see "Investor Suitability"), or otherwise at its sole discretion. Any such compulsory redemption will be

made at the Net Asset Value per Share on the Valuation Day next following the issuance of a notice of redemption to the Investor.

A Redemption Fee of 1.00% may be charged on the redemption of Class B Participation Shares of the Cell. The Redemption Fee is based on the redemption proceeds. III. INVESTMENT OBJECTIVES AND POLICY

Investment Objective

Cell C - Aero Asia - seeks to achieve long term capital appreciation by investing at least two-thirds of its net assets in equity and equity-linked securities (including ETF, warrants, futures and options) of issuers that have their principal activities in Asia ex Japan or are organized under the laws of Asian countries or derive a significant portion of their earnings from Asian countries ex Japan. These issuers will usually be listed on the stock exchanges in Asia or on any regulated stock exchange. The cash at disposal could be invested in deposit or in short terms bonds. Cell C may, for example, invest in Asian jurisdictions such as Hong Kong, South Korea, Taiwan, China, Singapore, Indonesia, Philippines, Malaysia, India, Singapore, Thailand and Vietnam.

Cell C is dedicated to value investing, taking a bottom-up stock picking approach. As a "Long only" non-benchmarked Fund, no leverage is used in order to achieve long-term capital appreciation through investment primarily in equity and equity-linked securities of companies listed on the stock exchanges in Asian Markets ex Japan and in companies listed on any regulated stock exchange with significant assets in or significant earnings derived from Asia. The cash at disposal could be invested in deposit or in short terms bonds.

Investment Restrictions

The following investment restrictions will apply to the Cell:

- The Cell will not employ leverage or take any credit loan in cash from any bank or financial institution;
- A minimum cash position of 5.00% of the Gross assets of the Cell will be available for redemptions at any time;
- The Fund will not invest directly in real estate but will be able to invest in securities of companies which hold and are involved in real estate.

IV. INVESTOR INFORMATION

The Directors in relation to Cell C agree to compute and provide the following reports to Investors, or their nominees, each in a form acceptable to the Directors and prepared in accordance with International Accounting Standards.

Net Asset Value: The Net Asset Value per Share of the Cell will be computed by the Administrator on each Valuation Day and reported to the Investors within 5 days of the Net Asset Value having been approved by the Directors.

Audited Statements: Annual audited financial statements will be provided, upon request, within six months of the financial year-end.

Whilst the Cell will endeavour to provide the aforementioned by the time deadlines stated, the Cell shall not be held liable for any delays in providing the relevant reports and/or publishing the relevant information which result from unexpected contingencies, such as delays in receiving necessary information from which to prepare such reports or information; equipment failure; fire or other physical damage to office or equipment or power failures.

The audited financial statements shall be kept at the administrator's office and filed with the FSC within 6 months of the financial statement period end, or any such other time as determined by the FSC.

V. SPECIFIC RISK FACTORS

In addition to the risk factors set forth in Part A of this private placement memorandum, the following additional specific risk factors exist in connection with the Cell's investment policy:

Speculative Position Limits. Some exchanges have established speculative position limits, which govern the maximum position, which any person may hold or control. It is possible that the Investment Manager may have to modify trading strategies or liquidate positions in order to avoid exceeding speculative position limits. Such modification or liquidation, if required, could adversely affect the Cell's objective to achieve capital appreciation.

Forward Markets. Although the forward markets, including the foreign currency markets, may not necessarily be more volatile than the markets in other assets, the forward markets offer less protection against defaults in trading than is available when trading occurs on an exchange. Forward contracts are not guaranteed by an exchange or clearing house, and therefore, a non-settlement or default on the contract would deprive the Cell of unrealised profits or force the Fund to cover its commitment for purchase and resale, if any, at the current market price.

The low margin normally required in forward trading permit an extremely high degree of leverage, since margin requirements for futures trading in some cases are as little as 2.00% of the face value (or "exposure") of the contracts traded. Therefore the gross value of positions held may be several times the value of the assets under management. Consequently, even a slight movement in the prices of commodities to which the assets under management are exposed could result in immediate and substantial losses to the Investor .

Management Risk. The success of the Cell's investments in fixed-income vehicles is subject to the ability of the Board of Directors to achieve the Portfolio Fund's investment objectives.

Non-Diversification Risk. If the Cell's investment in fixed-income vehicles represents a relatively significant percentage of the Cell's portfolio, the value of the portfolio will be more impacted by a loss on that vehicle than if the portfolio were more diversified.

Natural Disasters. The financial markets are often severely affected by natural disasters such as earthquakes, hurricanes and tsunamis. In the event of a natural disaster in a region of high economic output, financial markets normally sell-off, resulting in a severe decline in market value of all securities. Natural disaster therefore could be detrimental to the Net Asset Value of the Cell.

Economic Climate. The reporting of weak economic data such as unemployment figures, house buying, consumer confidence, gross domestic product, inflation etc. can have a direct or indirect impact on the value of a chosen stock.

Past Performance. Past performance is no indication of future performance, although investment decisions may contribute some weight to a stocks past performance when deciding to invest in the stock.

Taxation Risks. Taxation risk involves the taxation laws of the jurisdiction in which a corporation is domiciled. Local tax laws may impose withholding taxes or other taxes on the payment of dividends on a stock or the payment of interest on a fixed-income security.

Political Risk. The value of a specific stock may be affected by uncertainties such as political or diplomatic developments, social and religious instability, changes in government policies, taxation and interest rates, acts of god, war or acts of terror and other political and economic developments in law or regulations and, in particular, the risk of, and change in, legislation relating to the level of foreign ownership of a project.

Counterparty Risk. Any monies or assets held by counterparties on behalf of the Fund may be at risk and be unrecoverable if the counterparty defaults.

Currency Exchange Risk. Investments may be made which are denominated in currencies other than the base currency of the Cell. Due to currency exchange, there is a risk that any gains in investment value will be off-set against a change in exchange rate.

The Foreign Account Tax Compliance Act (FATCA). FATCA is U.S legislation relating to combating tax evasion and the recouping of tax revenues. FATCA requires that non-U.S foreign financial institutions identify and disclose their U.S members or be subject to a 30.00% withholding tax on any U.S sourced income paid on or after the 1st January 2014. Further detail regarding the implementation of this legislation is pending; however, Investors should be aware that certain information on Investor required on subscription of shares to the Fund could be disclosed to U.S authorities.

Investments in Emerging Markets / Asian Markets. The Fund will invest in jurisdictions which could be considered more speculative in nature and subject to greater market fluctuations and risk of loss than normally associated with investments in more developed and more politically and economically stable jurisdictions with more sophisticated capital markets and regulatory regimes, such as the United States and Western Europe.

These risks include:

- currency devaluations and other currency exchange rate fluctuations;
- political uncertainty and instability;
- more substantial government involvement in the economy;
- higher rates of inflation;
- less government supervision and regulation of the securities markets, and participants in those markets;
- controls on foreign investment and limitations on repatriation of invested capital and on an Investor 's ability to exchange local currencies for convertible currencies (there is a risk that exchange controls may be introduced which would prevent the Fund being able to withdraw funds from a country);
- greater price volatility, substantially less liquidity and significantly smaller market capitalisation of securities markets;
- custody and settlement systems which may be less developed. In addition, accounting, auditing and reporting standards, practices and disclosure requirements may differ from those in more developed markets in that less information is available to Investors and such information may be out of date;
- risks regarding the preservation and security of private ownership rights in various countries;
- disputes between parties over the assets in which the Fund has invested. The resolution/outcome of such disputes in the local courts could be unpredictable. Such disputes have taken place within certain countries;
- the banking system and the local banks are not as stable as western banks;
- the liberalisation of trade and other business activities witnessed during the recent years is likely to continue in the opinion of the Directors, but one can of course not rule out a reversion. Any reversion to previous policies by the different countries could have an adverse impact on the Fund;

- accounting, auditing and financial reporting standards and requirements are in many respects less stringent and less consistent than those applicable in most Western countries. Less information is available to Investors investing in these countries than to Investors investing in Western companies and assets;
- there is still a serious corruption problem and there may be risks of regime change which may result in new legislation and other regulations being introduced which might have an adverse impact on the assets of the Fund;
- a common complaint of foreign companies doing business in emerging Asian markets, or with Asian companies, is about the difficulty of collecting full payment on time. Some Asian jurisdictions do not have a credit infrastructure that provides systematic and reliable resources to the credit history of companies and individuals.
- legal systems which do not provide adequate and effective protection. The application of laws is inconsistent in different provinces and cities, and court verdicts are difficult to enforce. Cost of litigation is high, and penalties are low. Contracts are not fully respected and difficult to enforce. Bear in mind that the conclusion of a contract is just the beginning of real negotiation.
- Asia is a very diverse market. The consumer culture, cuisine and local languages are dramatically different in provinces from north to south and from east to west. The overall market has been growing rapidly but regional economy has developed at very different paces.

VI. FEES AND EXPENSES

In addition to the Fees set out in Part A of this private placement memorandum, the following fees apply to this Cell.

1. INITIAL ORGANISATION COSTS

The Fund with respect to Cell C will pay a proportional part of the costs and expenses associated with the initial organisation of the Fund as set-out in Part of this private placement memorandum, pro-rata based on the Net Assets Value of Cell C as against any other Cell or otherwise as the Board of Directors may, in their absolute discretion, determine. These costs include government incorporation charges and professional fees and expenses in connection with the preparation of the Fund's information documents, and the preparation of its corporate documents and contracts, which are expected not to exceed €50,000 and are to be paid by the Fund out of the initial proceeds of the offering of the Fund's shares. III. INVESTMENT OBJECTIVES AND RESTRICTIONS

Investment Objective

World Global Bond seeks to achieve a positive absolute return through investment in international fixed income vehicles which will give above market returns while retaining a good level of safety. The international fixed income vehicles will include, but will not be limited to, bonds, notes, subordinated debt, fixed income funds and non-bearing interest debt from issuers such as Governments, agencies, municipalities, supranational entities and corporations, currency markets. Cell D may invest in inflation indexed bonds and in units of UCITS and other collective investments (UCIs) up to 20.00% of its assets. The Board of Directors will implement different strategies it feels will make the best return such as barbell/bullet, duration, maturity and/or credit strategies, but it is anticipated that the Cell will not be involved in active trading and turnover

Investment Restrictions

The following investment restrictions will apply to the Cell:

- No more than 20% of the gross assets of the Cell may be invested in the securities of any one issuer at the time of purchase. If the portfolio grows and the securities of a single issuer in the Fund's portfolio increases above 20%, the Fund will not be required to sell securities to reduce it's holding to 20%. The 20% limit is only required to be observed at the time when the investment is made. However, this restriction shall not apply to securities issued or guaranteed by a government, government agency or instrumentality of any European Union or OECD Member State or by any supranational authority of which one or more European Union or OECD Member States are members. The restriction will also not apply to new issues.
- The Cell will not employ leverage or take a credit loan in cash from any bank or financial institution.
- There will not be a minimum rating required for the Cell to be able to invest in a fixed income vehicle.

IV. INVESTOR INFORMATION

The Directors of the Fund in relation to Cell D agree to compute and provide the following reports to Investors, or their nominees, each in a form acceptable to the Directors and prepared in accordance with International Accounting Standards.

Net Asset Value: The Net Asset Value per Share of the Cell will be computed by the Administrator on each Valuation Day and reported to the Investors within 5 business days of the Net Asset Value having been approved by the Directors.

Audited Statements: Annual audited financial statements will be provided, upon request, within six months of the financial year-end.

Whilst the Cell will endeavour to provide the aforementioned by the time deadlines stated, the Cell shall not be held liable for any delays in providing the relevant reports and/or publishing the relevant information which result from unexpected contingencies, such as delays in receiving necessary information from which to prepare such reports or information; equipment failure; fire or other physical damage to office or equipment or power failures.

The audited financial statements shall be kept at the administrator's office and filed with the FSC within 6 months of the financial statement period end, or any such other time as determined by the FSC.

V. SPECIFIC RISK FACTORS

In addition to the risk factors set forth in Part A hereto, the following additional specific risk factors exist in connection with the Cell's investment policy to invest fixed-income vehicles.

Management Risk. The success of the Cell's investments in fixed-income vehicles is subject to the ability of the Board of Directors to achieve the Portfolio Fund's investment objectives.

Inflation Risk. Inflation risk is the risk that the value of assets or income from fixed-income investments will be worth less in the future as inflation decreases the value of money. Inflation also tends to lead to higher interest rates which in turn cause bond prices to fall.

Non-Diversification Risk. If the Cell's investment in fixed-income vehicles represents a relatively significant percentage of the Cell's portfolio, the value of the portfolio will be more impacted by a loss on that vehicle than if the portfolio were more diversified.

Interest Rate Risk. Interest rate risk is the risk that the value of fixed-income vehicles will fall if interest rates increase. These securities typically fall in value when interest rates rise and rise in value when interest rates fall. Fixed income securities with longer periods before maturity are often more sensitive to interest rate changes. Hence when interest rates rise, fixed-income vehicles prices fall and conversely when interest rates fall, fixed-income vehicles prices rise. The longer the time to a bond maturity, the greater the interest rate risks.

Natural Disasters. The financial markets are often severely affected by natural disasters such as earthquakes, hurricanes and tsunamis. In the event of a natural disaster in a region of high economic output, financial markets normally sell-off, resulting in a severe decline in market value of all securities. Natural disaster therefore could be detrimental to the Net Asset Value of the Cell.

Economic Climate. The reporting of weak economic data such as unemployment figures, house buying, consumer confidence, gross domestic product, inflation etc. can have a direct or indirect impact on the value of a chosen stock.

Past Performance. Past performance is no indication of future performance, although investment decisions may contribute some weight to a stocks past performance when deciding to invest in the stock.

Taxation Risks. Taxation risk involves the taxation laws of the jurisdiction in which a corporation is domiciled. Local tax laws may impose withholding taxes or other taxes on the payment of dividends on a stock or the payment of interest on a fixed-income security.

Political Risk. The value of a specific stock may be affected by uncertainties such as political or diplomatic developments, social and religious instability, changes in government policies, taxation and interest rates, acts of god, war or acts of terror and other political and economic developments in law or regulations and, in particular, the risk of, and change in, legislation relating to the level of foreign ownership of a project.

Counterparty Risk. Any monies or assets held by counterparties on behalf of the Fund may be at risk and be unrecoverable if the counterparty defaults.

Default Risk. Default risk is the risk that the issuer of the fixed income vehicle defaults with any payment in relation to the fixed income vehicle issued. Lenders and Investors are exposed to default risk in virtually all forms of credit extensions. The global economy is currently experiencing a "sovereign debt crisis" whereby certain member states of the European Union are on the verge of technically defaulting on their sovereign debt.

Emerging/Developing Country Risks. The relevant Cell may invest in certain emerging market countries which are more speculative in nature, are subject to greater market fluctuations and risk of loss than normally associated with investments in more developed and more politically and

economically stable jurisdictions with more sophisticated capital markets and regulatory regimes, such as the United States and Western Europe.

Currency Exchange Risk. Investments may be made which are denominated in currencies other than the base currency of the Cell. Due to currency exchange, there is a risk that any gains in investment value will be off-set against a change in exchange rate.

The Foreign Account Tax Compliance Act (FATCA). FATCA is U.S legislation relating to combating tax evasion and the recouping of tax revenues. FATCA requires that non-U.S foreign financial institutions identify and disclose their U.S members or be subject to a 30.00% withholding tax on any U.S sourced income paid on or after the 1st January 2014. Further detail regarding the implementation of this legislation is pending; however, Investors should be aware that certain information on Investor required on subscription of shares to the Fund could be disclosed to U.S authorities.

THE FOREGOING LIST OF RISK FACTORS DOES NOT PURPORT TO BE A COMPLETE EXPLANATION OF THE RISKS INVOLVED IN THIS OFFERING. PROSPECTIVE INVESTORS SHOULD READ THIS ENTIRE MEMORANDUM AND CONSULT WITH THEIR PROFESSIONAL ADVISERS BEFORE DETERMINING WHETHER TO INVEST IN THE FUND.

The redemption price is equal to the Net Asset Value per Share of the Class D Participation Shares in respect of the Cell at the relevant Valuation Day.

The Directors may, in their absolute discretion refuse to redeem any Participation Shares if in their opinion the respective Cell does not have sufficient cash resources to complete the redemption and/or in the event the Directors believe that such an action will be materially detrimental to the remaining Investors, as described in "Redemption" and "Suspension of Redemption" in Part A above. The Directors will cause the Cell to notify the Investor of such refusal. The Directors shall not be required to sell any assets or borrow any monies to obtain the resources to redeem any Participation Shares. If the Fund does not complete the redemption on the first Redemption Day requested then the Redemption Notice shall be deemed withdrawn by the member who shall be required to submit a further notice of redemption to redeem any shares.
