SCHEDULING YOUR SURGERY

SCHELDULING YOUR SURGERY IN AN "ON CALL" PROCESS

Please be aware that your surgery time is variable. All surgeries are scheduled for a specific date not a specific time. Patients are on call for their procedure and will be called with a 2 hour on call time frame the evening prior to surgery.

If you are not available for your surgery when the O.R. is prepared for your procedure, additional O.R. charges may apply at the rate of $250.00/hour. The next patient may be called in to take your slot if you cannot be reached in a reasonable amount of time. This is necessary due to the extremely high cost of the operating room personnel and anesthesia time.

Thank you for your attention to this matter.

I agree to the above terms and conditions regarding the scheduling of my surgical procedure. I also agree to be available on call the entire day of my surgery.

SUPPLEMENTS TO DISCONTINUE DURING THE PERI-OPERATIVE PERIOD

2 (TWO) WEEKS PRIOR TO SURGERY

Although many of the nutritional supplements may be beneficial when used appropriately, their use around the time of surgery may increase risks and complications of surgery and anesthesia. Please discontinue use of these products 2 weeks prior to surgery and for 2 weeks after surgery to diminish these risks.

- **Aspirin *(Excedrin and arthritis pain formula – all varieties contain aspirin in them)**
- **Advil / Motrin / Ibuprofen**
- **Aleve / Naprosyn / Naproxen**
- **Bilberry** (vaccinium myrtillus) – has anti platelet activity, will increase bleeding and bruising.
- **Cayenne** (capsicum annuum) – temperature regulation may deteriorate.
- **Dong Quai** (angelica sinensis) – may increase bruising and bleeding.
- **Echinacea** (Echinacea augustfolia) _ decreases effectiveness of liver enzyme used to degrade anesthetics. Can prolong arousal from anesthesia.
- **Feverfew** (tanacetum parthenium) – may increase bleeding and bruising
- **Fish Oil** – may increase bleeding.
- **Garlic** (allim sativum) – may increase bleeding and bruising.
- **Ginger** (zingiber officinate) – may increase bleeding and bruising.
- **Ginkgo Biloba** (ginkgo Biloba) – one of the strongest anticoagulants, will increase bleeding and bruising.
- **Ginseng** (panaz ginseng/panax quinquefolium) – may increase bleeding and bruising.
- **Hawthorne** (cratagus laevitata)- interacts with heart medications.
- **Kava Kava** (piper methysticum)- may delay arousal from anesthetics.
- **Licorice Root** (clycyrrhiza glabra) –may increase blood pressure and electrolyte disturbances.
- **Ma Huang** (ephedra sinica) – increases arrhythmias, high blood pressure and death.
- **Melatonin** - may delay arousal from anesthetics.
- **Red Clover** (trifolium pretense) - may increase bleeding and bruising.
- **St. John's Wort** (hypericum perforatum) – multiple adverse drug interactions.
- **Valerian** (valeriana afficinalis) – decreases effectiveness of anesthetics and pain medications.
- **Vitamin E -** may increase bleeding and bruising.
- **Yohimbe** (corynanthe yohimbe) – may prolong arousal from anesthesia

Please ask your physician prior to beginning supplementation after surgery. Each patient may heal differently and treatment should be individualized in the post-operative period.

Thank you for your attention to this very important matter. Each of us has the mutual goal of the best surgical outcome, and with your attention and compliance with the suggested treatment you may increase the odds of an exceptional recovery and final result.

Consent to Photograph

1. I hereby authorize Dr. Steven T. Constantine and/or his employees or associates to photograph me, take motion pictures, television pictures, videotape, electronic, digital or computer recordings or reproductions of me. (All of the aforementioned will be hereinafter referred to as photographic or electronic reproductions). This authorization includes the taking of photographic or electronic reproductions of any part of my body.
2. The photographs shall be used for my medical records, and if in the judgment of my physician, medical research, education or science will be benefited by their use, such photographs and information relating to my case may be published and republished, either separately or in connection with each other, in professional journals or medical books, or used for any other purpose which may deem proper in the interest of medical education, knowledge or research; however, provided that it is specifically understood that in any such publication or use I shall not be identified by name.
3. I authorize the use of any such photographic or electronic reproductions of me for any purpose, including by not limited to scientific or educational purposes, including publications or reproduction in all forms of media, whether public or private including the internet; however, provided that it is specifically understood that I shall not be identified by name. I understand that I may be identifiable from such photographic or electronic reproductions.
4. I understand that I may refuse to consent to the taking of photographic or electronic reproductions or that I may limit the taking or use of any such photographic or electronic reproductions without prejudice to my care. I do not impose any limitations except (list any limitations you wish to impose):_____
   _____
   _____
5. Unless the patient states otherwise in writing, this consent will be considered valid for the taking of all photographs or electronic reproductions for up to three years after the date of signing and it will not be necessary to obtain any further written consent for photographs or electronic reproductions during that three year period of time.
6. In any provision of this consent is held invalid or enforceable, the remaining provisions shall remain in full force and shall not be affected by the invalidity of any other provisions.

I understand all of the above information and have reviewed all of this material with my physician. All of my questions at this time have been answered.

MINOR SOFT TISSUE SURGERY

I.V. AND GENERAL SEDATION ONLY

If you have elected to have I.V. sedation to make your surgery more comfortable and alleviate your fears, please follow these important instructions:

1. Do not eat or drink (including water) past midnight the night prior to your scheduled surgery. Our surgeries are scheduled for morning hours to make this fast easier on the patients. If for any reason your appointment must be late in the day, you may have liquid up to eight hours prior to your scheduled appointment.
2. A responsible adult must be available to accompany you. 24-hour care is necessary. You must make arrangements for a ride home.

ALL PATIENTS

The following instructions apply to all minor surgery patients including those undergoing I.V. sedation or local anesthetic:

1. Do not wear make-up, earrings or contact lenses the day of surgery. Leave your valuables at home.
2. Thoroughly wash the area to be treated the night prior to surgery and again just before coming for your surgical appointment. If a special soap is necessary, your nurse will provide it for you after you schedule your surgery date.
3. If you do take medicine each morning, take your normal medicine the day of surgery with a small sip of clear water. It is especially important that you take your blood pressure or heart medicines if you normally take those. Do not take any anti-inflammatory medicines (aspirin, Motrin, Celebrex, Vioxx, Ibuprofen, Naprosyn, Aleve, Advil, Excedrin, etc), or blood thinner medicines (Coumadin, Warfarin, etc.) FOR AT LEAST TWO WEEKS prior to your surgery. If you are unsure about a medication please call our office.
4. Extra-STRENGTH Tylenol will be sufficient for relief of any minor pain you may experience. Always report any rashes, itching or hives as they may be reactions to your medications. Discontinue use if any of these symptoms appear.

Consent for Chemical Peel

Patient Name: _____ Date: _____

I have been informed that I have the following conditions(s):

_____
_____

The procedure(s) to treat my conditions(s) has/have been described as:

_____
_____

PLEASE INITIAL EACH PARGRRAPH AFTER READING. IF YOU HAVE ANY QUESTIONS, PLEASE ASK YOUR DOCTOR BEFORE INITIALING:

I HAVE BEEN TOLD AND UNDERSTAND THAT:

____1. Chemical face peel is a process by which certain chemicals are applied to the skin of the face in an attempt to improve the appearance of lines, wrinkles, skin blemishes and certain other localized cosmetic skin conditions.

____2. During the face peeling process I will experience some discomfort and swelling, and my face will be covered with a crust which will usually separate within one to two weeks.

____3. My skin may have a reddish appearance which may persist for several weeks or longer, and that at the junction of treated and untreated areas there may be a different color or blotching of the pigmentation and changed texture of the skin may persist.

____4. Scarring can occur which may result in permanent disfigurement.

____5. Chemical face peel will not stop the aging process, and that further treatment may be necessary, depending upon aesthetic and cosmetic conditions.

____6. Other:

_____
_____

____7. No guarantee or assurance has been given to me that the proposed treatment will be curative and/or successful to my complete satisfaction. Due to individual patient differences, there is a risk of failure or relapse, my condition may worsen, and selective re-treatment may be required in spite of the care provided.

____8. I have had an opportunity to discuss my past medical and social history, including drug and alcohol use, with my doctor and have provided full information. I recognize that withholding information may jeopardize the planned goals of surgery.

____9. I agree to cooperate fully with my doctor's recommendations while under treatment, realizing that my lack of cooperation can result in a less-than-optimal result.

____10. If any unforeseen condition should arise during surgery that may call for additional or different treatment from that planned, I authorize my doctor to use surgical judgment to provide appropriate care.

INSTRUCTIONS FOR CARE OF STITCHES

SUPPLIES NEEDED

- **Bacitracin Ointment**
- **Cotton Tip Applicators (Q-tips)**
- **3% Hydrogen Peroxide, Fresh Bottle**

SUTURE LINE CARE

1. Mix 2 tablespoons peroxide with 2 tablespoons tap water in small container.
2. Use cotton tip applicators and peroxide solution to clean all blood and material from cuts. DO NOT leave any crusts or blood on stitched areas. Repeat for a minimum of 4 or 5 times per day.
3. Cover all cuts and abrasions with Bacitracin. Do not allow any area to dry out or scab over.
4. Do not apply any bandages or other materials unless otherwise instructed.
5. Do not use soap or shampoo near areas until instructed to do so.
6. Please clean areas thoroughly and apply Bacitracin just prior to any appointment. Make certain you have done your best – failure to do so is the most frequent cause of complications such as excessive scarring, wound infection and breakdown, etc.

IMPORTANT

Faithful adherence to post-operative stitch care will help to minimize swelling, discomfort and scarring. If you do have problems, do not hesitate to contact our office for assistance.

FINANCIAL POLICY REGARDING REVISION AND COMPLICATIONS

Every cosmetic and reconstructive surgeon has a few patients who will require revision or have some complications requiring additional surgery. As you have been or will be told, one cannot guarantee a result. In cosmetic procedures there are certain problems that will happen statistically no matter how well the care or how careful the doctor and team. Examples of problems that may be encountered are bleeding, an unfavorable scar or body conformation after a surgical procedure. In both of these cases, it may be necessary to return the patient to surgery, either on an emergency basis (as in the case with bleeding) or an elective basis (as in the case of scarring). It is our policy as a predetermined courtesy to our patients not to charge a surgeon's fee for complications or revisional surgery within 6 months from the original surgery date. We do, however, expect the patient to pay whatever other expenses arise as a result of treatment in hospital or outpatient settings. If the revisional surgery occurs in our office facility, the patient is responsible for the expense of the facility and anesthesia.

A Surgery Revision fee is $800.00 for the 1st area and $500.00 for any additional area.

We hope that no complication arises and no revisional surgery is necessary in your case. However, no cosmetic surgeon can guarantee this to his patients. It is important for the patient undergoing an elective surgical procedure to understand this financial policy. If you have any questions regarding this policy, the office staff would be happy to discuss it with you.

My signature below indicates that I understand and agree to the above policy.
