

Springfield Public Schools Research Proposal and Data Agreements Form

We strongly recommend that you read all documents posted under the [Research Proposal Submission Process](#) and [External Data Request Process](#) links on the Assessment, Research, and Accountability (ARA) Department webpage to obtain a comprehensive understanding of the processes and procedures for conducting research within and/or obtaining data from Springfield Public Schools.

The following terms and conditions apply to **all** proposals submitted to Springfield Public Schools:

- **Participation in studies must be voluntary**, except as required by federal/state mandate or required evaluations related to District-held grants or contracts.
- **Research activities should not interfere with instructional time.**
- Research cannot be conducted in any school without the approval of the school's principal. Principals have been instructed that research cannot be conducted in the schools without an official approval letter from the Chief Information Officer of Springfield Public Schools.
- The approval letter from the Chief Information Officer authorizes the Researcher or Principal Investigator to commence the study, **but does not obligate a participant, school, division, or office to take part in the study.**
- No changes in scope (e.g., timeframe of study, number of schools included, number of participants, etc.), procedure, or instrumentation may be made without authorization once a letter of approval has been issued. Requests for amendments must be made directly to the Administrator of the ARA Department before the proposed changes are enacted.
- All state and federal laws must be observed, including the Family Educational Rights and Privacy Act (FERPA) and the Protection of Pupil Rights Amendment (PPRA).
 - [FERPA](#)
 - [PPRA](#)
- Institutional Review Board (IRB) review for all research with human subjects is **required**. IRB documentation may come from either university IRBs or independent IRBs.
- The invitation to participate in research (i.e., consent form) is to be printed on the researcher's stationary, and not on that of any office or school of Springfield Public Schools, in order to avoid any perceived coercion. Also, school administrators or staff should not be mentioned as endorsing the research; language may only indicate that the researchers may have been given permission by school administrators to seek participants for the study.
- All persons having one or more contacts with one or more students must adhere to the [Criminal Offender Record Information \(CORI\) policy of Springfield Public Schools](#). [CORI forms](#) are located on the Springfield Public Schools website. CORI clearances must be dated prior to the date of the review of the research proposal. **No person will be allowed into the school setting without a CORI clearance on file with the related research proposal in the ARA Department.**
- Strict confidentiality must be maintained to protect all participants involved. For purposes of your project, you may share the data solely with the other persons listed on

- You agree that you shall not pursue any course of conduct that represents a conflict of interest with respect to Springfield Public Schools or the research process, including but not limited to the receipt of any gifts or other inducements in any manner that may affect or may reasonably appear to affect your impartiality. Except as otherwise disclosed to and independently approved by the ARA Department. No School District employee may benefit in any manner from this agreement.

- If approved, Springfield Public Schools will specify the expiration date of this agreement. Springfield Public Schools may terminate this agreement if you breach it. If you have not published your research by the date this agreement expires, you may not thereafter use the data in your research.
