Developmental Mathematics

L. George Saad, Ph.D. Professor Emeritus Long Island University

PLACEMENT TEST D

How to Use the Placement Test

The Placement Test pamphlet is composed of three parts; the student's Placement Test, the educator's Placement Guidelines, and the Placement Key. The educator's Placement Guidelines and the Placement Key are contained on the inside of the front cover and the inside of the back cover of the pamphlet, respectively. The student's Placement Test is enclosed as the eight-page contents of the pamphlet. Please remove the cover of the Placement Test pamphlet for the educator, so the student does not have access to the Placement Key. Give the eight-page Placement Test to the student for completion, and use the following Placement Guidelines and Placement Key to check his or her work. It's as easy as 1, 2, 3!

Placement Guidelines

Placement Test D covers the theoretical concepts, basic facts, and practical skills in *Developmental Mathematics* Levels 11, 12, and 13. The specific Placement Test questions that address these levels are as follows:

- **Level 11 Three-Unit Numbers:** Multiplication and Division Skills Ouestions 1–25
- **Level 12 Thousands and Large Numbers:** Concepts and Skills Ouestions 26–48
- **Level 13 Decimals, Fractions and The Metric System:** Concepts and Skills Questions 49–66

The student should attempt to complete the entire Placement Test until he or she cannot proceed without aid. After the student completes the questions, the educator should analyze the responses that address a specific level, item by item, and evaluate the quality of the student's performance. Typical results show a decrease in the quality of the student's performance in the more complicated concepts tested toward the end of the Placement Test. If *most* of the answers given are correct, then the student has successfully passed the current level of the Placement Test. However, if *most* of the answers are incorrect or if the student is hesitant in giving his or her answers, then the student is in need of practice, and he or she should begin the *Developmental Mathematics* curriculum with the current level. Good luck!

Mathematics Placement and Scoring System (MPASS)

Mathematics Programs Associates (MPA) has developed an automated computerized version of the *Developmental Mathematics* placement and scoring framework, available on disk and on the World Wide Web. Visit our Internet distributor at www.greatpyramid.com and find the placement (MPASS) mechanism within the mathematics section of the product module. You can also learn more about MPA and *Developmental Mathematics*.

PLACEMENT TEST D

Computations: Large Numbers and Decimals

Name:____ Date:

$$1.a. 4 \times 210 =$$

c.
$$5 \times 80 =$$

c.
$$8 \times 35 =$$

d.
$$2 \times 413 =$$

$$3. a. 20 \times 4 =$$

c.
$$40 \times 5 =$$

5. a.
$$10 \times 30 =$$
 b. $70 \times 10 =$

b.
$$70 \times 10 =$$

$$c. 60 \times 10 =$$

d.
$$10 \times 48 =$$

$$f. 14 \times 10 =$$

$$6. a. 20 \times 40 =$$

b.
$$90 \times 30 =$$

$$c. 50 \times 60 =$$

7. a.
$$30 \times 32 =$$

c.
$$2)600$$

19. You have 35 twenty dollar bills.	
You want to exchange them for fifty dollar bills.	
How many fifty-dollar bills do you get?	
20. In your piggy bank, you have 39 dimes and 97 nickels.	
You want to exchange them for quarters.	
How many quarters do you get?	
21. You had 25 sets of marbles with 36 marbles in each set.	
You put the marbles together, and then made as	
many sets as you could with 27 marbles in each set.	
What was the result?	
22. You started with a number, added 236, and then divided by 28.	
The result was 29.	
What number did you start with?	
23. $A = 800 - (32 \times 24)$	
What number is A?	
$24. X + (25 \times 30) = 965$	
What number is X?	
25. You divide a number by 28.	
The answer is 25 and a remainder.	
a. What is the smallest number you divide?	
b. What is the largest number you divide?	

26.a.
$$6,000 + 2,000 =$$
 _____ b. $5,000 + 5,000 =$ ____ c. $9,000 + 6,000 =$ ____

b.
$$5,000 + 5,000 =$$

c.
$$9,000 + 6,000 =$$

$$27.a. 9,000-4,000 =$$
 b. $10,000 + 2,000 =$ c. $11,000 + 6,000 =$

c.
$$11,000 + 6,000 =$$

28.a.
$$4 \times 2,000 =$$
_____ b.

o.
$$3 \times 6,000 =$$
____ c.

$$8 \times 50 =$$

x 45

x 32

x 89

- 41. a. 8) 9,848 b. 5) 9,020

- c. 3) 1,820
- 42. a. 291) 1746 b. 542) 2168

c. 652)3260

- 43. a. 34) 9758 b. 235) 6497

c. 45) 9045

44.	a. How many nickels do you	
	get for \$9?	
	b. How many quarters do you	
	get for 420 dimes?	
45.	a. How many quarters do you	
	get for \$39?	
	b. How many dimes do you	
	get for 42 quarters?	
46.	You have 25 twenty-dollar bills	
	and 60 ten-dollar bills.	
	You exchange all your money	
	for fifty-dollar bills.	
	How many fifty-dollar bills do you get?	
47.	You have 30 one-hundred dollar bills	
	and 80 five-dollar bills.	
	You exchange all your money	
	for twenty-dollar bills.	
	How many twenty-dollar bills do you get?	
48.	You have \$80.	
	You have 60 quarters and the rest	
	in nickels.	
	How many nickels do you have?	

49. a.
$$3.6 + 1.7 + 0.9 =$$

b.
$$7.3 + 2.7 + 9 =$$

b.
$$3.6 + 2.65 + 2 =$$

51. a.
$$35.8 - 23.1 =$$

b.
$$91 - 48.7 =$$

52. a.
$$38.49 - 12.76 =$$

b.
$$51.8 - 26.84 =$$

54. a.
$$6 \times 3.8 =$$

c.
$$24)300.00$$

62. Express in dollars.

a

b.

c.

- 63. The sum of two numbers is 7. One of the numbers is 2.009. What is the other number?
- 64. You bought items for \$5.75. How much change do you get from \$10?
- 65. You have \$3.26.
 You want to buy a notebook for \$2.35 and candy for \$1.59.
 How much more do you need?
- 66. The cost of 6 cans of fruit at \$1.25 per can is the same as the cost of 5 lbs. of grapes. What is the price of one pound of grapes?

PLACEMENT KEY D

Although some of the answers may seem obvious, we have included the answers to all of the Placement Test questions within the following table.

of the Fracement Test questions within the following table.								
Level 11		Level 12		Level 13				
Question	n Answer	Question	1 Answer	Questio	n Answer			
1a	840	26a	8,000	49a	6.2

Mathematics Programs Associates (MPA),

a Long Island-based family enterprise providing educational products and consulting services, exists today primarily due to the vision and determination of its founder, Dr. L. George Saad. During the early 1950s, Dr. Saad taught mathematics education at the University of Ain-shams in Cairo, Egypt. In 1954, with an innovative idea for selfteaching, he enrolled as a doctoral candidate at the University of Birmingham in England. During the following three years, Dr. Saad devoted his research to the elementary and secondary students' understanding of basic mathematics, and he developed the methodology for a self-teaching mathematics program. In 1957, Dr. Saad received the Ph.D. in mathematics education. He then returned to Cairo and began the development of a government-sponsored mathematics curriculum for use throughout the country's elementary school system. In 1959, samples of Dr. Saad's materials were tested in the Cairo schools and, a few years later, his curriculum was being used throughout the country and in other Middle Eastern nations. Due to his popularity in the Middle East, in 1969, Dr. Saad was invited to the United States as a visiting professor at the State University of New York, and in the same year, accepted a professorship at Long Island University. In 1970, with an inspiration to repeat his success, Dr. Saad immigrated his family to the United States and began working on the rudiments of a self-teaching mathematics workbook series. In 1974, he incorporated MPA in New York to design, develop and distribute his work. Today, educators and students in the United States, and many other nations throughout the world, are benefiting from Dr. Saad's lifelong achievement,
