**Dulles Corridor Metrorail Project
PHASE 2**

10

Silver Line Test Shaft Equipment Mobilization Begins at Washington Dulles International Airport

On Wednesday, February 12, weather permitting, Dulles Corridor Metrorail Project crews will begin to move construction equipment to the grassy area located between the eastbound Dulles International Airport Access Highway (DIAAH) and the ramp from Aviation Drive to the eastbound DIAAH (see map). This work is in preparation for the construction of two 60-foot deep test shafts for Phase 2 of the Silver Line through Washington Dulles International Airport.

Drivers may experience intermittent lane and shoulder closures. Drivers should be attentive to signage and barricades along the eastbound DIAAH, and on the ramp from Aviation Drive to the eastbound DIAAH, as large, slow-moving vehicles may be exiting and entering the highway at various times throughout the day.

The work will continue in the same area throughout next week.

Those interested in receiving up-to-date information on the progress of the Dulles Corridor Metrorail Project - Phase 2 can sign up at www.dullesmetro.com.
