Rock Climbing Risk Management Plan

Lutanda Yarramundi

| School: | Year: | _Dates: |
|----------|---------------------|---------|
| Program: | _Supervising Staff: | |

Activity Context

The rock climbing wall at Lutanda Yarramundi is located next on the side of the Activity tower facing the road. Rock climbing is a fun way to challenge participants in their confidence, teamwork and trust. Participants belay each other as they attempt to climb as high up the wall as possible.

| Leader to Participant Ratios | Participation Requirements | Equipment |
|--|--|--|
| For groups 13yo and above: | | Participants are required to wear/have the following: |
| 1 Activity Facilitator to 17 participants | | Sun protection (sunscreen, shirt etc.) |
| Far man 0, 10 m | Minimum Age: 8yo | Closed toe footwear |
| For groups 8-13yo: | Destrictions many such as differences since a start second | Adequate water |
| 1 Activity Facilitator to 17 participants. An extra supervising adult is recommended | Restrictions may apply under differing circumstances | Any medication required |
| For all groups with participants under 18yo: | | The following personal protective equipment is provided and |
| Group is required to have a supervising adult present | | must be worn by participants using the course: – Harness (worn by all participants when climbing) |
| | | Helmets (worn by an participants when climbing) Helmets (worn by anyone in the area between the |
| Higher ratios may be required depending on differing group requirements or circumstances | | tower and the belay posts) |

| Activity Facilitators | Emergency |
|--|---|
| Activity Facilitators are trained and signed off as competent to run activity by Activities Manager | is conducted on site and first aid is located nearby Ambulance time is 15 minutes |
| Activity Facilitators hold current first aid and CPR certificates | Activity Facilitators carry the following equipment: – First Aid Kit |

Risk Management Plan

| | Existing Control Measures | | Risk Rating | | |
|---|--|----------|--------------|--------------|--|
| Hazard / Risk Description | | | Consequence | Risk Rating | |
| Activity Specific – Risk factors specifically | v associated with activity at Lutanda Yarramundi | | • | | |
| Fall from heightBy participant | Participants attached to a belay line whenever they are climbing Participants wear safety harnesses while climbing Equipment protected from sharp edges with protective equipment Equipment rated and maintained for loads well above actual load placed upon it Belayers are closely monitored by Activities Facilitator at all times when a climber is off the ground Misbehaviour when belaying is never tolerated and participants may be asked to cease the activity | Rare | Catastrophic | Satisfactory | |
| Slipping/Tripping Around the activity area | Area cleared by facilitator prior to activity Ropes a hung up on belay posts when not in use during the session | Possible | Minor | Satisfactory | |
| Cutting/Scratching On equipment, trees etc. | Equipment setup to best avoid unnecessary contact with participants Regular inspections of tower for hazards | Possible | Minor | Satisfactory | |
| Impact Injury caused by hitting wall, caused by slipping Landing on ground too hard | Participants briefed on and demonstrated proper way to climb Participants briefed on and demonstrated proper way to belay Activity Facilitator provides instruction during climbing to help placement of feet Activity Facilitator monitors belayers at all times throughout the activity | | Moderate | Satisfactory | |
| Entanglement Jewellery Hair Loose Clothing Scarves etc. Fingers | All loose clothing, jewellery and other objects that may become entangled are to be removed for the activity Long hair is to be tied back for the activity in low pony tail or braids Participants briefed on where to place hands on rope / away from equipment Belayers briefed to keep fingers away from belay post to prevent getting stuck | | Minor | Satisfactory | |
| Falling Objects • Loose equipment kept away secured at top of tower Causing injury; eg; equipment, objects • Participants briefed on safety near bottom of tower carried by participant etc. • Participants required to wear helmets for activity • Helmets required to be worn by anyone between the tower and the belay posts | | Unlikely | Moderate | Satisfactory | |
| Rope Burn • Participants briefed and instructed on proper technique for climbing For climber or belayer • Belayers help control decent after participant has finished climbing • Belayers are instructed to belay hand over hand and not let the rope slide through their hands | | Unlikely | Minor | Satisfactory | |
| Chafing • List of appropriate clothing provided to group prior to camp Caused by harness rubbing on skin • Participants asked to change into appropriate clothing prior to activity to prevent harness resting on skin • Explanation on how to fit harness is given and checked by Activity Facilitator | | Possible | Minor | Satisfactory | |
| People – Risk factors associated with the p | | | | | |
| Participant Behaviour • Clear behaviour expectations set at start of activity sessions Inability or decision to not follow directions or cooperate • Clear behaviour expectations set at start of activity sessions Maintaining supportive environment • Maintaining supervision | | Unlikely | Major | Satisfactory | |

Rock Climbing Risk Management Plan – Lutanda Yarramundi

| Hazard / Risk Description | Existing Control Measures | | Risk Rating | | |
|---|--|----------|--------------|--------------|--|
| hazaru / Kisk Description | | | Consequence | Risk Rating | |
| | Outline consequences of inappropriate behaviour Removal of individual from activity or cancellation of activity | | | | |
| Participant Ability Unable to complete activity due to: Fear / Anxiety Complacency / Overconfidence Physical Ability | Possible | Moderate | Satisfactory | | |
| Activity Facilitator Unsafe practices leading to an injury to a participant caused by: • Poor supervision by Activity Facilitator | Activity Facilitators must follow Standard Operating Procedures at all times Activity Facilitators are trained and signed as competent, by a qualified Activities Instructor. Vigilant supervision required by Activity Facilitators at all times Communication equipment available readily at activity sessions | Unlikely | Major | Satisfactory | |
| Group Leader Unsafe practices including: • Poor supervision by group leaders | Groups briefed on requirement to provide supervising adult for participants under 18 years old prior to camp and activities Activity Facilitators will stop or cancel activity without adequate supervision from Group Leader | | Major | Satisfactory | |
| Observers Injury to Guests or others observing activity while it is running | Observers not allowed to participate in activity without activity briefing | | Major | Satisfactory | |
| Unsupervised Users Injury toGuests on site when activity is not running; Members of public accessing camp land (unauthorised) | oGuests on site when activity is ning; Activity equipment locked away when not in use Equipment not left out after of before activity | | Major | Satisfactory | |
| Equipment - Risk factors associated with th | he equipment used for the activity | | | | |
| Structure Failure Safety of the Activity tower, end pole and anchors | Activities tower built by advanced rigger Regular inspections of structure and anchors performed by activity staff Yearly inspections by external assessor performed | Rare | Catastrophic | Satisfactory | |
| Equipment Failure Activity Facilitators trained in selection, use, inspection, care & maintenance of activity equipment Activity Facilitators perform check of equipment prior to each activity Participants briefed on proper use of equipment All equipment clearly stored and labelled for activity intended for Equipment regularly inspected and maintained Equipment stored, maintained and retired according to manufacturer instructions Equipment used certified by manufacturer as suitable for use | | Rare | Major | Satisfactory | |
| Environment – Risk factors associated with | | | | | |
| Exposure to UV rays Causing sunburn | Sun smart strategies are encouraged | Possible | Minor | Satisfactory | |
| Exposure to Heat Causing dehydration, heat stroke etc. | Sun smart strategies are encouraged Participants are encouraged to drink water, carry water bottles | Unlikely | Moderate | Satisfactory | |

Rock Climbing Risk Management Plan – Lutanda Yarramundi

| Useend / Disk Description | Existing Control Measures | | Risk Rating | | |
|---|--|------|--------------|--------------|--|
| Hazard / Risk Description | | | Consequence | Risk Rating | |
| | Guests are briefed on location of water filling locations on arrival Activities modified / cancelled if necessary or alternative activities arranged | | | | |
| Cold / Wet Weather Causing hypothermia etc. | Weather conditions regularly monitored for adverse conditions Participants briefed on wearing suitable protective clothing Activities modified / cancelled if necessary or alternative activities arranged | Rare | Moderate | Satisfactory | |
| Lightning Strike | Weather conditions regularly monitored for adverse conditions Activities delayed / cancelled during lightning storm, participants moved to safe area Activities modified / cancelled if necessary or alternative activities arranged | | Catastrophic | Satisfactory | |
| Injury or Allergic Reaction caused by organism | | | Major | Satisfactory | |
| Injury caused by contact with natural features | | | Minor | Satisfactory | |

Risk Ratings

This risk assessment is measured according to the following risk ratings:

Likelihood Ratings

Likelihood is the description of the probability and frequency. The likelihood of the risks occurring as outlined in Lutanda Mt Yarramundi risk management plans is determined after the control measures have been implemented

| Score Description Broad description of frequency | | Time framed description of frequency | | |
|--|----------------|---|-------------------------------------|--|
| 1 | Rare | The event may occur, but only in highly exceptional circumstances | Not expected to occur for years | |
| 2 | Unlikely | Could occur at some time | Expected to occur at least annually | |
| 3 | Possible | Might occur at some time | Expected to occur at least monthly | |
| 4 | Likely | Will probably occur in most circumstances | Expected to occur at least weekly | |
| 5 | Almost certain | Is expected to occur in most circumstances | Expected to occur at least daily | |

Consequence Ratings

The outcome of an event or situation expressed qualitatively or quantitatively, being the human impact, damage to infrastructure, disruption to public or financial loss.

| Score | Description | Injury or impact details | |
|-------|---------------|--|--|
| 1 | Insignificant | Little or no injury requiring no medical attention; Minimal impact on environment; Insignificant adjustments to program; Insignificant damage to property, normal wear; Some difficulty in retaining competent staff; Expected running costs incurred | |
| 2 | Minor | Minor injuries requiring first aid / some medical attention; Minor impact to plants / animals, no disruption to ecosystems; Rescheduling / replacement of program activities to client satisfaction; Damage requiring small repairs, low cost; Some difficulty in attracting, developing, resourcing and retaining competent staff; Minor costs incurred (<\$250) | |
| 3 | Moderate | Serious injuries requiring hospitalisation / ongoing medical attention; Ecosystem / landscape self repairs within 12mo; Significant disruption / cancellation of program events; Damage requiring moderate repairs or replacement, moderate cost; Significant difficulty in attracting, developing, resourcing and retaining competent staff; Moderate costs incurred (<\$1,000) | |
| 4 | Major | Injuries that are life threatening or causing long term disability; Ecosystem / landscape self repairs within 36mo; Program disruption causing loss of program; Damage requiring high cost/projects for repair/replacement; Guest experience and program is majorly affected by lack of competent staff; Major costs incurred (<\$15,000) | |
| 5 | Catastrophic | Fatality; Irrecoverable loss of ecosystem / landscape; Program disruption causing broad loss of reputation; Massive damage, significant replacement of infrastructure required; Programs unable to be fulfilled due to lack of competent staff; Massive costs incurred (>\$15,000) | |

The consequence of an incident occurring may vary greatly depending on the individual circumstances of each incident.

Example – A student trips and falls – a detailed analysis of falls might show that although falls occur weekly, more serious injuries from falls only occur once or twice a year. In the main most of the other falls have relatively minor outcomes. Therefore the incident could be scored either according to the severity of the actual outcome, or according to the most likely or typical outcome for that type of incident.

Both approaches are valid, however to ensure consistency Lutanda Yarramundi has adopted an approach to record the most likely or typical outcome for all incidents.

Rock Climbing Risk Management Plan – Lutanda Yarramundi

Risk Rating Matrix

All identified risks are recorded in the following risk matrix according to likelihood and consequence. The purpose of this matrix is to provide a snapshot of all identified risks and establish the level of risk to determine if further treatment is required.

| | Consequences | | | | |
|--------------------|-------------------|-----------|--------------|-----------|------------------|
| Likelihood | 1 - Insignificant | 2 - Minor | 3 - Moderate | 4 - Major | 5 - Catastrophic |
| 1 - Rare | 1 | 2 | 3 | 4 | 5 |
| 2 - Unlikely | 2 | 4 | 6 | 8 | 10 |
| 3 - Possible | 3 | 6 | 9 | 12 | 15 |
| 4 - Likely | 4 | 8 | 12 | 16 | 20 |
| 5 - Almost certain | 5 | 10 | 15 | 20 | 25 |

Risk Treatment

| 1-4 Lov | v Risk | 10 -14 High Risk |
|-----------------|---|---|
| • | Risk does not generally need to be managed any further (current controls are adequate), however the risk needs to be monitored for changes in circumstances and current control effectiveness. Risk generally may be accepted. | Risk is unacceptable, risks must be further treated or removed to bring rating to medium Risks are to be re-assessed by Activities Manager |
| 5-9 Medium Risk | | 15+ Extreme Risk |
| • | Risk needs to be regularly monitored for any changes and control/treatment effectiveness. Risk may be accepted after consideration. | Unacceptable risk, urgent attention is required to treat or remove risks Management to consider elimination of activity |

Risk Assessment Conducted by: *Jemima Robinson* Position: *Activities and Hosting Manager, Lutanda Mt Victoria* Date of Risk Assessment: 27th January 2016 Date of Review: *January 2017* Document Revision: *Version 1*
