

2015 UDSMR® Webinar Series

Strengthening Partnerships: Documentation and IRF-PAI Coding

This webinar series will focus on strengthening the partnership between the rehab physician, the rehab coder, and the PPS coordinator. With the impending changes to compliant codes and the implementation of ICD-10 on October 1, 2015, now is the time to reeducate staff members and foster the partnerships that will help your facility successfully document each patient's admission and stay. The PPS coordinator cannot prioritize the conditions on the IRF-PAI without clear, concise physician documentation and IRF-PAI codes that are as specific as possible. This series will help facilitate the necessary changes at your facility and remove the stress associated with a crisis-motivated educational process. Attendees will discuss operational challenges and practices in the industry, and the presenter will provide solutions designed to help strengthen the understanding of these urgent issues.

This continuing nursing education activity was approved by the New Hampshire Nurses Association Commission on Continuing Education, an accredited approver by the American Nurses Credentialing Center's Commission on Accreditation.

It has been approved for 4.5 nursing contact hours.

Attendance at the entire workshop is required for continuing education credits—partial credit will not be awarded. Each participant is required to complete a course evaluation.

Week 1: Objectives

- Review 60% rule compliance
 - Current compliance
 - Future compliance
- Choosing and documenting an admission IGC and etiology
 - Comprehensive pre-admission screen
 - Documenting the reason for IRF admission
- Identifying comorbid conditions and tiers
 - Active conditions being monitored or treated
 - Tiered comorbidity list
- Identify common documentation trends, challenges, and recommended solutions
 - PAPE
 - Progress notes
 - IOPOC
 - Team conference

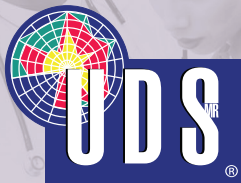

Week 2: Objectives

- Identify common challenges for the HIM coder
- Rehab coding knowledge
 - Lack of communication with their partners
 - Lack of physician query process
- Identify facility-specific limitations
 - Remote coders
 - Lack of an assigned rehab coder
 - No capability to code concurrently

- Discuss coding practices that help justify the importance of a strong HIM coder
 - Concurrent coding
 - Dedicated IRF coder
 - Query process
 - Communication with IRF team

Week 3: Objectives

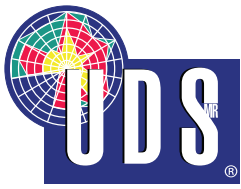

- Discuss IRF-PAI data entry timeline
 - At admission
 - Throughout the rehab stay
 - After discharge
- Demonstrate software features that can help validate and prioritize the codes on the IRF-PAI
 - Advanced Comorbid Conditions dialog
 - Prioritize feature
 - ICD-9-CM lookup
- Illustrate how facility reports can be used to track the facility's coding compliance with admission impairments, etiologies, tiers, and the 60% rule
 - Rehab Metrics Report
 - Etiologic by Impairment Group Code Listing
 - Percentage of Cases by Comorbidity Tier
 - Presumptive Eligibility Estimation Report
