MOSMAN HIGH SCHOOL CONTRIBUTIONS 2012

With the agreement and support of the Mosman P&C Association the school seeks financial contributions from all parents and guardians in order to be able to provide the wide range and high quality of educational programs to which the Mosman community is accustomed. The strong support the school has enjoyed over the years and the reputation it has gained in the community are due in considerable measure to opportunities available to students within the curriculum itself, the student welfare program and in extra curricular activities. To be able to offer these opportunities incurs a large annual cost to the school, which it seeks to defray through annual Government funding, parent contributions, P&C and other fund raising and sponsorship ventures. Funding from all these sources is essential in assisting us to cover all our expenses for the coming year.

STUDENT ASSISTANCE

The school is relying on the financial support of all parents in order to maintain all current programs. Parents experiencing financial hardship are welcome to write to the Principal in confidence to outline the situation and to seek assistance in the form of payment by instalment, support for fees, exemptions or perhaps to organize alternative ways of supporting the school. Student assistance is available for students in some cases and applications are available from the school office.

GENERAL SCHOOL CONTRIBUTION

Funds raised are being expended upon the following:

- The purchase of books for class use
- The upgrading of technological equipment (video recorders, cameras, editing equipment, computers in classrooms – laptop computers, sound and lighting equipment, digital cameras, data loggers)
- Enhancing sport opportunities (equipment, uniforms, competition entrance fees, ground hire, etc)
- Purchase and maintenance of music equipment, music scores, etc
- The maintenance of high standard learning environments (eg computer rooms, textile and design rooms, kitchens, science laboratories, visual arts rooms, performance space, music tutorial and classrooms)
- The production of suitable teaching/learning materials which cater for the students' individual differences and different learning styles
- Resourcing of new syllabuses

Subject contributions, however, cover subject costs incurred by your son/daughter, and must be paid if your son/daughter has chosen a particular elective. Again arrangements can be made to pay these off in instalments or seek financial assistance.

P&C ASSOCIATION DONATION FOR SCHOOL PROGRAMS

In order to spread the P&C fundraising load as evenly and fairly as possible and as an alternative to some more traditional fundraising activities, the P&C is requesting a donation from each family to assist in raising funds for school projects. These donations will be collected by the school (with the School Contributions) and transferred to P&C funds.

GROUND MAINTENANCE LEVY

The P&C ground's maintenance levy helps to minimize the necessity for parent working bees, which help keep the grounds looking attractive.

THE BUILDING FUND – TAX DEDUCTIBLE

The tax deductible Building Fund enables parents to claim any contribution to this fund as a tax deduction. Money donated to this fund is used for the outdoor sporting facility project.
