

# Adult Day Care and Structured Day Provider Self-Assessment

## Instructions

You must submit a separate assessment for each of the following:

- a. Structured Day Program services provided in facility-based service sites including each satellite for which licensure is required under Minnesota Statutes, section 245D.27.
- b. Adult Day Services provided in:
  - Adult Day Care: licensed adult day centers and
  - Family Adult Day Services: licensed adult foster care or family adult day services homes

## Note:

The term “day service site” will be used to reference the location of services for Structured Day Program Services provided in a facility-based service site and Adult Day Care Services provided in an adult day center, adult foster home or family adult day services home.

The term “day service program” will be used to reference services (Structured Day or Adult Day Care) provided within the day service site.

Staff with personal knowledge of the Adult Day Care and/or Structured Day Program service site, must provide the information.

Submit all provider self-assessments electronically on or before **May 29, 2015**. Additional instructions are available.

Responses should be as accurate as possible. Immediate compliance with the new federal requirements is not required. The state will offer a transition period for providers who are not yet, but intend to, comply with the new requirements.

## Purpose of provider self-assessment

The Centers for Medicare and Medicaid (CMS) issued a new rule governing HCBS waiver services effective March 17, 2014. The rule defines settings in which HCBS services may be delivered, settings that are not HCBS and settings that are presumed not to be HCBS. Minnesota submitted a transition plan to CMS indicating how it will come into compliance with the new rule.

The rule and transition plan require Minnesota to complete an assessment of all provider owned and controlled settings to determine their level of compliance with the new requirements. CMS requires states to follow-up with on-site monitoring and to assure on-going compliance. Completion of this provider self-assessment is the first step in the process.

## The provider self-assessment is designed to:

1. Provide the state with information that will be used to develop measurable criteria for HCBS services in the future.
  2. Identify sites that are not in currently in compliance with the rule.
  3. Identify settings that are presumed not to be HCBS.
  4. Help providers understand changes needed to comply with the rule.
