NOTES ON COMPLETING THESE FORMS

The form(s) in this packet contain “form fields” created using Microsoft Word. “Form fields” facilitate completion of the forms using your computer. They do not limit your ability to print the form “in blank” and complete with a typewriter or by hand.

It is also helpful to be able to see the location of the form fields. Go to the View menu, click on Toolbars, and then select Forms. This will open the forms toolbar. Look for the button on the forms toolbar that resembles a “shaded letter “a”. Click in this button and the form fields will be visible.

In order to use the form fields properly, it is necessary to “lock or protect” the document. If you wish to make any changes in the body of the form, it is necessary for you “unlock” or “unprotect” the form.

This is done by clicking on “Tools” in the Menu bar and then selecting “unprotect document”. You may then be prompted to enter a password. If so, the password is “uslf”. That is uslf **in lower case letters without the quotation marks**.

It is very important to understand that, once the document is unprotected, any data entered in the form fields will be lost when the document is again protected. If changes are necessary, unlock the document, using the password “uslf” if necessary, and make any changes that you feel are required. Then protect the document once again.

After any required changes and re-protecting the document, click on the first form field and enter the required information. You will be able to navigate through the document from form field to form field using your tab key. Tab to a form field and insert your data. Inserting data will result in the default line disappearing. You will have sufficient space to enter any required information.
