## ABOUT THE CONFERENCE

The Asia Pacific Forum/Conference was initiated by The Institution of Structural Engineers Malaysia Division in 2005. Since then, this annual forum/conference has been hosted by other Regional Groups of The Institution of Structural Engineers in various parts of the Asia Pacific region with interesting themes as listed below.

- 2005: "Seminar on Special Structures", Kuala Lumpur, Malaysia
- 2006: "Recent Advances in Structural Engineering", Shanghai, China
- 2007: "Innovations in Structural Engineering", Singapore
- 2009: "Advances in Steel Structures", Hong Kong
- 2010: "Structural Excellence and Sustainability", Shanghai, China
- 2011: "Structural Engineering for Extreme Events", Gold Coast, Australia
- 2012: "Cradle-to-Cradle Structures in Transportation Engineering", Kuala Lumpur, Malaysia

The IES/IStructE Joint Committee is pleased to organise the 8<sup>th</sup> IStructE Asia-Pacific Conference on Structural Engineering with a theme on Future Cities. The conference features an impressive list of lectures on future structures, sustainable energy and water resource developments, and eco-cities that will undoubtedly interest structural engineers, contractors, city planners and architects. There are ample opportunities during coffee breaks and lunches for delegates to discuss the engineering problems and innovative solutions directly with the principal engineers/designers of future cities. Participants will receive 6 PDUs, 3 STUs or 4 CPDs points for attending this conference.

## LECTURES

8 invited lectures will be presented during the 1-day conference. The topics and speakers for the lectures are:

- **Archibiotic** – Mr Vincent Callebaut (Vincent Callebaut Architectures, France)
- **Planning for an Open Pit Underground Habitat** – A/Prof Joseph Lim Ee Man (Department of Architecture, School of Design and Environment, National University of Singapore)
- **Singapore's Sustainable Development Journey for the Built Environment : From Building Life-Cycle Approach** - Mr Jeffery Neng Kwei Sung (Centre Director, Centre for Sustainable Building & Construction, Building & Construction Authority)
- **Punggol Eco-Town: The Future is Now** – Er. Dr. Johnny Wong (Group Director, HDB Building Research Institute)
- **Sustainable Technologies for an Eco-city** – Dr Terence Goh (SIM University)
- **Extraordinary Possibilities for Future Concrete Structures** – Prof Tim Ibell (Head of the Department of Architecture and Civil Engineering, Bath University, UK)
- **Current Situation and Research of Structural Design for High-rise Buildings** – Prof James Ding (Tongji University, China)

- **How Singapore Prepares for the Future and How the Engineering Profession can contribute to Building Future Cities** – Mr Lim Teck Leong (URA, Singapore)

## WHO SHOULD ATTEND?

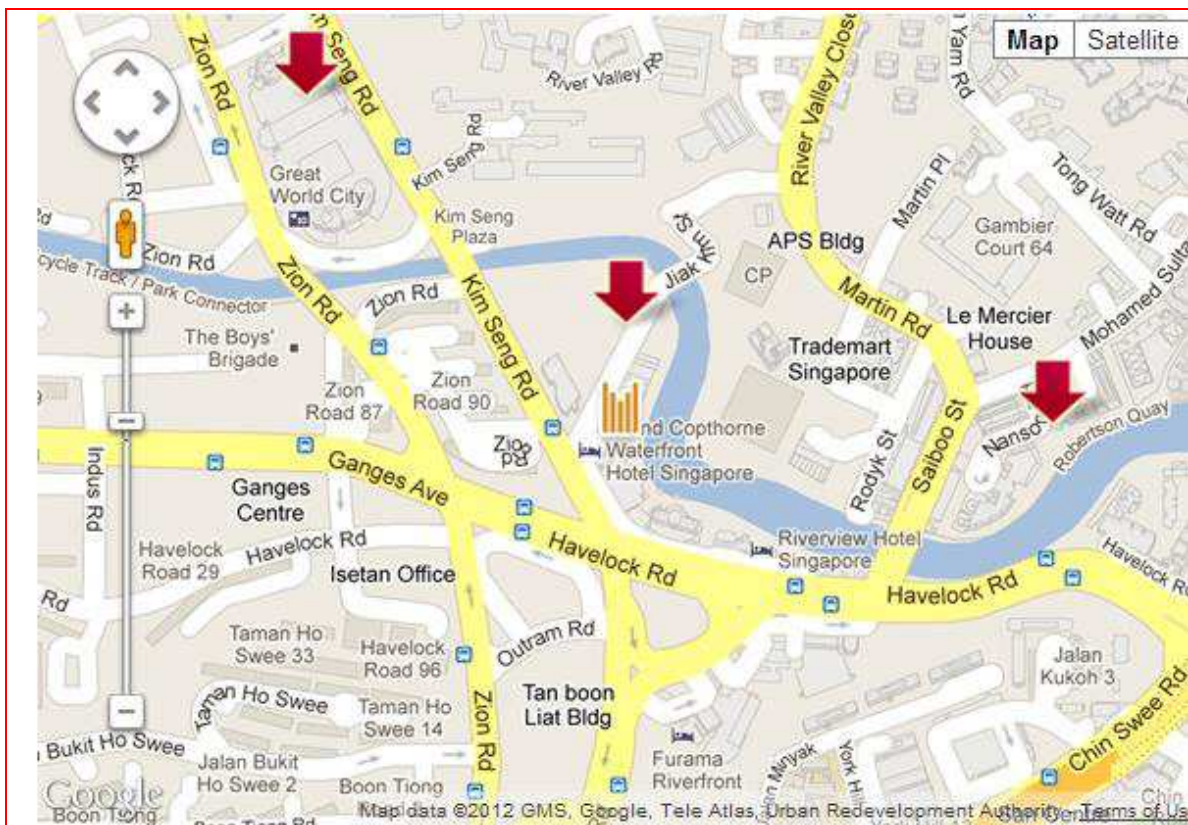

Participants are expected to be practicing engineers, contractors, researchers, city planners, architects and other construction professionals, who wish to upgrade their knowledge on city planning, analysis, design and construction of structures and infrastructure and to get insights of future city developments. Students are particularly welcomed.
