Oral Technical Presentation Evaluation Form

Provide a grade (A highest, F lowest) and score (10 highest, 0 lowest) for sub-items. Provide a grade and score (maximum = 100) for each major category (I-XIV). Write *NA* for "not applicable" or "no answer".

	er's Name: tation Title	Presentation type Date	e	
	<u>CATEGORY</u>	<u>FEATURES</u>	<u>Score</u>	Grad
I	OVERALL GRADE	A grade that suitably accounts for ALL aspects of the presentation.		
п	% UNDERSTOOD	What presentation % was clearly audience-understood?		
III	INTEREST Factor	Level of speaker-generated audience interest in the topic		
IV	IMPACT	Gauge the overall presentation IMPACT (on audience)		
11		Gauge the overall presentation hourself (on addrence)		
V	TECHNICAL	Overall Technical Content Assessment		
•	Technical detail	Speaker had command of technical material		
		Models used (level and details) were appropriate and correct		
		Technical information was accurate and adequate.		
		Technical concepts, details UNDERSTOOD (as presented))		
VI	SPEAKER IMAGE	Speaker acquired positive image w/ audience; appeared to		
<u>.</u>		be "in command" of the presentation information		
		Dress style suitable for "environment"		
		Mannerisms ok?		
VII	MECHANICS	Overall assessment of "MECHANICS"		
	Routine Mechanics	Introduced Topic, <i>laid foundation</i> , audience <i>oriented &</i>		
		motivated		
		Pres. title, speaker's name, references, acknowledgements		
	Delivery Mechanics	Delivery Quality (overall)		
		Smooth, well integrate, organized Delivery		
		Speaker clearly in command of topic		
		Audience-responsive mechanics		
	Visual Mechanics	Visuals (overall)		
		High visual contrast used		
		Information hierarchy techniques used	-	
		Bullets kept short		
		Fonts easily read (font size, contrast, color)		
		Key features well labeled	-	
		The "best" labels were used (short, symbolic, accepted, etc.)		
		Best use of color Figures well rendered		
				-
		Figures, transparencies, tables not too busy Title page, table of contents, modules, summary and		ł
		conclusion pages included		
		Focus techniques employed well		
		Tight editing was evident		
		Extraneous information (not supporting of objectives) absent	+	1
		Endencous mornation (not supporting of objectives) absent

VIII	ORGANIZATION	Overall assessment of the information organization	
		Presentation organization fundamentals (title page, intro, body,	
		summary/conclusion, transparency quality, etc.)	
		Objectives clear and well supported by presentation	
		information	
		"Tight presentation". No extraneous information (edited to	
		directly support objectives only)	
		Appearance of a logical, systematic and smooth flow.	
		KISS principle employed (short and simple, as appropriate)	
		Model complexity assembled with absolute clarity	
IX	CONCEPT	All concepts were presented in best form with best	
	MANAGEMENT	representation?	
		Component ideas (modules = building blocks) were	
		appropriately distinct and emphasized	
		Simplicity used (wherever feasible)	
		Complex ideas assembled using layering methods	
		Visual rather than verbal descriptions (where feasible)	
		Good use of key models	
		Idea complexity level most appropriate for objectives and time	
		available	
		Complexity managed well (layering, etc.)	
		Technical information presented at correct level for time,	
		objectives and audience level.	
		Analogies and examples best used to clarify difficult concepts.	
X	Assembly/Integration	The information was assembled in the best manner for	
		audience understanding.	
		Time managed well	
		Organization: Information assembly was ideal	
		Module size was appropriate	
		Integration of modules (transitions) was ideal	
XI	Presentation		
	Dynamics		
	Dynamics	Overall presentation had an intellectual dynamic feel?	
		No pronouns used (labels and nouns always used)	
		Pointer and other focus techniques well employed	
		Presentation delivery "speed" was ideal	
		Eye contact, listener awareness, etc, were good.	
		Speaker walked audience through figures	
XII	Analytical	Manage of mathematics and "theoretical" aspects	
XIII	Discussion/Questions	Discussion Management	
		Answered questions directly	
		Clarified/repeated questions when appropriate/needed	
		Figures used to support question answers/discussion	
		Encouraged/stimulated questions & discussion	
XIV	Other
