*If student is below points needed for promotion during 1st or 2nd trimester, the student is at risk of retention. Document all specific interventions provided to the student and outcomes of the interventions. A score less than 65 during the third trimester indicates the student is at risk of retention, but does not necessarily require the student be retained in 3rd grade. Documentation of interventions and outcomes as well as an analysis of the student's academic performance and needs will also be completed.
