GAWDA Professional Compliance Seminar Agenda

Tuesday – (8:00 AM- 12:00 PM)(Spring Session):

Chart Inc. will be presenting a four-hour class on the operation and maintenance of your standard liquid cylinder. During the class you will receive a refresher on design and safe handling of liquid cylinders, proper filling techniques, and the internal workings of a liquid cylinder. Each participant will also participate in the final piping and construction of a tank from the point of being a complete shell to the plumbing and labeling of the tank. A plant tour will follow to allow the class participants to see the variations in tank size and design, as well as miscellaneous equipment also produced at this manufacturing plant.

- **Cryogenic Container Training**
 - Cylinder Design & Operation
 - Safe Handling & Hazards
 - Saturation Pressure/Performance
 - Customer Repair & Maintenance
 - Pressure and Level Gauges
 - Relief Valves
 - And more
 - Plant Tour

Tuesday – (2:00 PM- 5:00 PM):

- **DOT Compliance (Mike Dodd)**

Updates on the following topics:

- GHS
