SEMINAR
SERIES

First Attack Fire Equipment

Understand the new maintenance Standard relating to:

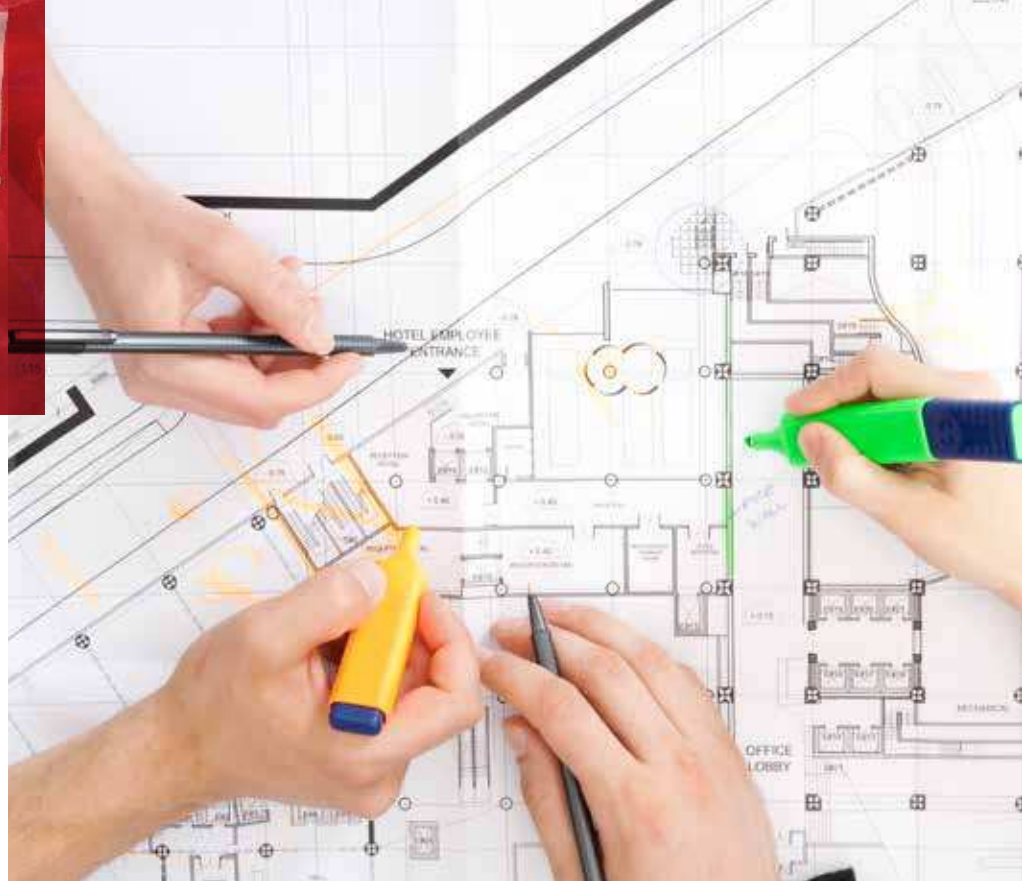

Delivery Layflat Fire Hose
Fire Hose Reels
Portable & Wheeled Fire Extinguishers
Fire Blankets

WA 19 JUL VIC 22 JUL NSW 26 JUL

This series of seminars will provide detailed insight into the technical content of the Standard and highlight how the new Standard will affect the day to day operations of many businesses and the industry as a whole.

THE SEMINAR

The release of AS 1851-2012 (Routine service of fire protection systems and equipment) introduces changes that affect many companies throughout the fire protection industry. This series of seminars, developed through feedback received at the December forums, will provide detailed insight into the technical content of the Standard and highlight how the new Standard will affect the day to day operations of many businesses and the industry as a whole.

This fourth series will address activities for first attack fire equipment included in AS1851-2012. The session will include technical content on delivery layflat fire hose, fire hose reels, portable & wheeled fire extinguishers and fire blankets.

In addition to the technical information, all seminars will provide valuable information on the administrative requirements detailed in Section 1 which covers important topics such as classification of defects, baseline data and systems interface testing. There will also be useful information provided on evidence of maintenance and responsibilities of technicians and service providers as well as avenues for training and accreditation.

Each of the speakers have been exposed to the development of the updated Standard and offer their expertise and experience through the presentation material. A panel session will provide the opportunity for direct engagement with the speakers about the subject material.

The material in this series is mostly technical in nature and targeted primarily at personnel and maintenance end users, however building owners and facilities managers would benefit greatly from understanding the changes to the Standard. Managers and business owners will gain useful insight surrounding the changes to frequency and how this will affect their scheduling and resources.

Who Should Attend?

- Personnel who undertake maintenance activities on:
 - Delivery Layflat Fire Hose
 - Fire Hose Reels
 - Portable & Wheeled Fire Extinguishers
 - Fire Blankets
- Facility Managers
- Property Owners and Managers
- System End Users
- Fire Brigade personnel
- Regulators
- Design Consultants

Each of the speakers have been exposed to the development of the updated Standard and offer their expertise and experience through the presentation material.

Program

08:00	Registration Open
08:30	Welcome
08:35	Objectives & Overview
08:55	Scope and General
09:20	Portable & Wheeled Fire Extinguishers
10:10	Fire Blankets
10:30	Morning Tea
10:50	Fire Hose Reels
11:10	Delivery Layflat Fire Hose
11:25	Reporting & Recording of Activities
11:45	Training & Accreditation
12:00	Panel Session
12:30	Conclude

Future AS 1851-2012 Seminars

- Water based fire protection (part 2)
- Fire and smoke control features of mechanical services
- Complex maintenance activities for systems and equipment generally undertaken at longer frequencies.

The speakers

Bob Goninon Learning & Development Specialist
FPA Australia

Bob has extensive experience in many facets of the fire protection industry. He has worked, with suppression systems and all types of portable fire fighting equipment.

He commenced the Fire Equipment Maintenance program while in his role as a volunteer fire fighter with the Country Fire Authority in Victoria, prior to undertaking contracts to service and test equipment in remote indigenous communities and Defence installations across Australia's top end.

He holds the ODS&SGG qualified persons EAHLs 1 to 5 and is a qualified trainer and assessor who holds Certificates II and III in Asset maintenance (Fire Protection) and Certificate II and III in Fire Protection Inspection and Testing.

Bob has worked as a trainer and assessor with the Association for the past two years, travelling into all states conducting training and assessment workshops across the broad range of fire protection equipment. Bob is a volunteer fire fighter and ambulance officer in his home town in rural Victoria.

Beau Hannan Learning & Development Specialist
FPA Australia

Beau has experience in many facets of the fire protection industry. He has worked servicing a variety of fire protection equipment, provided extensive information on fire protection in a variety of workplaces and has been closely involved with the Country Fire Authority in Victoria for many years.

He is a qualified trainer/assessor; as well as holding his qualifications in both Asset Maintenance (Fire Protection Equipment), and Fire Protection Inspection & Testing.

Currently he conducts refresher training and assessment workshops throughout Australia with FPA Australia providing employees from a variety of service provider companies with the knowledge and skills required to work effectively in the fire protection industry. Beau will present in New South Wales.

Chris Wyborn Senior Technical Officer
Fire Protection Association Australia

Chris joined FPA Australia as a Senior Technical Officer in October 2011 after 10 years with the Country Fire Authority in Victoria, a role that included managing a team responsible fire safety in the building, planning and dangerous goods areas. This included the auditing of fire safety measures in buildings to determine compliance with installation and maintenance requirements.

Chris has experience in the maintenance of fire protection systems and equipment as the former owner and manager of a small fire protection maintenance company. One of Chris' key roles is to provide technical support on the maintenance of fire protection systems and equipment.
