## Section 58-9-2200

- (1) 'Telecommunications service' means the provision, transmission, conveyance, or routing for a consideration of voice, data, video, or any other information or signals of the purchaser's choosing to a point, or between or among points, specified by the purchaser, by or through any electronic, radio, or similar medium or method now in existence or hereafter devised. The term 'telecommunications service' includes, but is not limited to, local telephone services, toll telephone services, telegraph services, teletypewriter services, teleconferencing services, private line services, channel services, Internet protocol telephony, and mobile telecommunications services and to the extent not already provided herein, those services described in Standard Industrial Classification (SIC) 481 and North American Industry Classification System (NAICS) 5133, except satellite services exempted by law.
- (2) 'Retail telecommunications service' includes telecommunications services as defined in item (1) of this section but shall not include:
