

Algebra 2

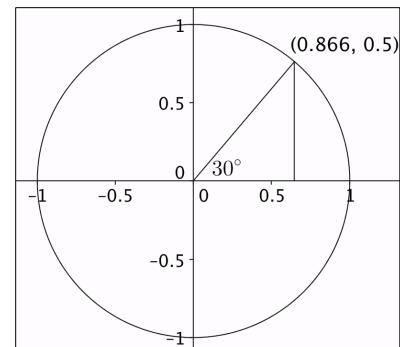

Name: _____

For each problem below, you are given the value of θ .

- Draw the angle in the unit circle,
- state the Quadrant in which the angle terminates, and
- calculate the values of the sine and cosine.

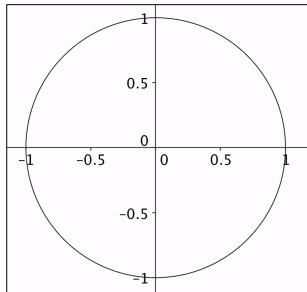

Example: If $\theta = 30^\circ$

- See the diagram.
- Quadrant I
- $\cos \theta \approx 0.866$ and $\sin \theta = 0.5$.
