

Clean Cities Coalitions Kansas City Region & Central Kansas

your resource for clean transportation needs

From up-to-date grant information to industry events, membership with Clean Cities puts you in the middle of the alternative fuel industry. Join us in our efforts to reduce air pollution, strengthen your local economy, and curb our dependence on petroleum. Metropolitan Energy Center (MEC) is a 501(c)3 charitable nonprofit organization that manages the **Kansas City Regional Clean Cities Coalition** and now the **Central Kansas Clean Cities Coalition**, based in Wichita.

If you care about reducing pollution from the transportation sector, there's no better way to show your support than joining Clean Cities today. MEC counts on the support of members and donors to make our Clean Cities programs possible, and we value the contributions of our members and partners.

Your support allows us to conduct much needed outreach and educational activities to area fleet managers, community leaders and citizens, as well as increase the number of alternative fuel vehicles and fueling infrastructure in our state. Your membership support gives us the resources we need to hold workshops and seminars, provide comprehensive educational materials, and work with area citizens and transportation professionals to develop and implement green transportation policies. Programs and working groups supported by Clean Cities memberships include the following:

The goal of **Mid-America Green Fleets** is to significantly improve the environmental performance of business and government vehicle fleets through diesel clean-up, alternative fuels implementation and other strategies.

The **Electrify Heartland EV Coalition** is made up of EV and EVSE industry as well as private citizens. Its mission is to further the adoption of EVSE and electric vehicles.

The **Midwest CNG Coalition** is made up of natural gas interests in the Clean Cities territories of Iowa, Nebraska, Kansas, Missouri, Oklahoma, and Arkansas. Members can network with industry professionals who have the knowledge and expertise on deploying CNG. The goal of this group is to further the adoption of CNG in the Midwest region.

The **Missouri-Kansas Propane Autogas Task Force** is made up of propane autogas interests whose goal it is to further the adoption of propane as a transportation fuel.

There are many membership levels available, including business and organizational memberships. Each contribution confers an annual membership in addition to any other associated benefits.

Benefits of Membership *

Individual Membership
