Chapter 4 - Business Plan

This chapter will describe Toast's integrated strategies which will generate a competitive and innovative value. We specified the strategies of our Marketing, Operations, Human Resources, and Financial Plan as the respond to the new challenging competition game in the market industry that will enable Toast to be perceived as the "Solution for Excellence Ideas" consultant.

4.1 TOAST ROOM Canvas Business Model

Nine Building blocks which we use to describe our business model creations is summarized as above picture. It describes of how Toast Room do the business, how they deliver the services, who is their target market, how they get the revenue, what becomes the cost structure. This picture also describes

who become the key partners of the company and mention things which conclude as their value propositions.

Business Model Creation is about the way it operates and how it creates value for the stakeholders. We constructed Toast's realized strategies by considering the competitive environment of SMEs industries in Indonesia, the investment opportunities in Indonesia, Toast's strategic positioning in the industry, and the potential threats which Toast will be challenged by in the future. Those aspects integrated in Toast's Marketing, Operations, and Human Resources Strategy.

Drivers such as globalization, deregulation, or technological change, just to mention a few, are profoundly changing the competitive game. To survive and keep growing in this new environment, Toast try to take advantage of these structural changes to compete "differently" and innovate in a best business model concept.

We provide new services as the solution for bank getting the potential SMEs and complete proposal which include feasibility studies for the business ideas and analyze whether they are bankable enough or not to be funded by bank.

Toast Room benefits for the SMEs would the connection service which we provide for them once they submit their business concept to be analyzed and compile it to be review by bank, open the cannel for the SME presenting the business concept directly to the bank and get the loan once it approved.

We are targeting to have potential banking partner which has credit/ loan as their product's portfolio, support the SME's growth in Indonesia, easily accessible in Indonesia, especially in big cities, can offer competitive loan rate, and concerned for SME's economic growth

For the prospective SMEs candidates would be at least they have established the business for 2 years, have a good tracking record for the financial aspects and passionate to enlarge and grow the business.

Our service quality will strengthen by business analyst, strong brand's activations and simple operations process with maximum output.

4.2 SALES AND MARKETING PLAN

4.2.1 Marketing Objectives & Goals

4.2.1.1 Marketing Objective

- To create brand awareness
- Increase the interest and preference of our target market in developing the Small Medium Enterprise growth.
- To create the demand from banks to give loan for SME business.
- To create the SME's demand on connecting services.
- To contribute to company's profitability.

4.2.1.2 Sales Objective

- To get many feasible projects to be funded by the bank to bring
 positive results for Toast revenue based on certain percentage
 depend on the agreement between Toast and bank as the
 customer for each credit approval.
- Maintain the relationship with existing SMEs which funded by the bank and knowing their business growth after getting the loan from bank. This is related to another opportunity that might occur if the SME needs another loan. If the business growth is positive and their credit payment is good, Toast can propose it again to the bank to have the second loan.
- Involvement on SME's growth in Indonesia will bring positive impact in the end for Toast Room.

4.2.1.3 Marketing Goals

- To develop the business and brand awareness in about 20% of SME's business owner in Indonesia by the end of the first year project established, through company's promotion activities.
- To develop the interest of target market in using company services at the first year by 500 projects and create the growth for 10% at the second year, until reach 15% of growth per year, by the end of year five.

- To get in about 25 SME's project at the first year to be funded by the bank.
- To create the sales at first year and increase the sales volume by 20% from year to year. By the end of year three we are hoping to get positive net marketing contribution.
- To annihilate the SME's anxiety in getting fund for their business ideas or their business expansion.

4.2.2 Marketing Strategy

4.2.2.1 Segmentation, Targeting, Positioning

The key marketing strategy in our decision making depends on how we divide up markets into meaningful customer groups who share common needs (market segmentation). That market segment subsequently become the candidates of the customer groups we choose to serve (target marketing) whose characteristics will affect the way we deliver our services. And in the long run, how we serve that target market will be directed by Toast's marketing offers that best serve our customers (positioning).

Segmenting Market

Segmenting a market means analyzed the market based on its wants and needs then choose the most prospective segment that can be targeted. The importance of doing

segmentation is to get the marketing strategy more focus on the right target. Markets can be segmented based on the factors including age, gender, location, geographic factors, demographic characteristics, and family life cycle, desire for relaxation or time pressures.

Considering the market study result that we observed and analyzed in our previous chapter (chapter 2), we determined Toast Room's market segment as follows:

Bank, who has credit / loan as their product portfolio and would like to provides some loan for the SME.

In term of getting the potential SMEs to be funded we need to choose at least SMEs, which having their business for 2 years establishment with good record financially and bankable enough to get loan from the bank.

Targeting

The market segment above also reinforced by the Phillip Kotler theory about the characteristics of effective market below:

Measurable

We divide the market segment into banks with considerationits size, key characteristics, and

preferences. Currently many banks offer credit Small and Medium level, but many of them are using permanent employee, so the probability that might happen is bank gives credit only using standard analysis and not analyze it more deeply. This condition can cause a credit loss, which in the end impact to the increment of Non Performing Loan (NPL) Ratio for banks.Based on data which we get, we choose the bank with the NPL Ratio above 2.5% as the potential customer for Toast Room.

A Non PerformingLoan (NPL) is any loan in which: interest and principal payments are more than 90 days overdue; or more than 90 days' worth of interest has been refinanced, capitalized, or delayed by agreement; or payments are less than 90 days overdue but are no longer anticipated. (financial-dictionary.thefreedictionary.com, 2012)

Based on BI data, Non Performing Loan on Commercial Bank based on type of use is coming from three sectors, which are working capital, investment and consumption. Here on table below, we can see the highest contribution for the NPL is coming from working capital loan.

This condition might happen of the unsuccessful business from the credit given by the bank, which caused delay or incapacity of the debtor to repay the loan.

Below is data of NPL Ratio from some major banks in Indonesia, based on ICRA Indonesia in 2011.

NPL of Top 10 Banks (minus BCA, Bank Mandiri and Panin)

| in million Rp | | | 7 | 95 | | | 9 |
|------------------|-------------|----------------|-------------|-----------|------------|---------------------------|-------------------------|
| | Current | Spc mention | Substandard | Doubtful | Loss | Gross NPL (cat 3-5) | Gross NPL (cat 5) |
| BDMN | 77,839,821 | 7,497,685 | 458,162 | 1,020,258 | 882,210 | 2.69% | 1.01% |
| BNGA | 114,369,494 | 5,318,799 | 613,826 | 257,770 | 2,400,953 | 2.66% | 1.95% |
| BII | 59,276,831 | 2,236,024 | 146,821 | 166,411 | 981,829 | 2.06% | 1.56% |
| BNI | 155,692,025 | 5,279,134 | 342,946 | 638,098 | 1,581,220 | 1.57% | 0.97% |
| BRI | 261,697,430 | 18,698,719 | 752,016 | 847,057 | 3,411,035 | 1.76% | 1.20% |
| BTN | 54,466,562 | 7,533,775 | 177,545 | 196,103 | 1,189,699 | 2.46% | 1.87% |
| PERMATA | 63,853,799 | 1,923,325 | 423,850 | 168,833 | 809,835 | 2.09% | 1.21% |
| TOTAL | 787,195,962 | 48,487,461 | 2,915,166 | 3,294,530 | 11,256,781 | 2.05% | 1.32% |

From data given above (icraindonesia.com, 2012), we are targeting to choose 3 potentials bank

which can be our customer. The category is bank which has Gross NPL Ratio above or close to 2.5%, which are:

- Bank Danamon, which has 2.69% NPL Ratio in
 2011
- Bank CIMB Niaga, which has 2.66% NPL Ratio in
 2011
- Bank Tabungan Negara, which has 2.46% NPL
 Ration in 2011

• Substantial

The bank who would like to provide for the SMEs and aim to reduce the credit loss by having partner which can help them to provide potential SMEs and the complete analysis is a segment that has a large interest to be profitably served, so it fulfills the substantial characteristic of effective segment.

• Accessible

There is no point in segmenting if we know in advance that there is no practical way to access a segment's members. To get real, we select the banks which easily accessible by the SMEs in Indonesia, especially in big cities.

• Differentiable

Segments must respond differently to different marketing programs. If there is no difference in their responses, then there is no effective segmentation. Bank which own credit/ loan as their product portfoliocategorize as a responsive segment in the market.

Actionable

By utilizing our website and joining national exhibition we approach the prospective SMEs and banks with effective cost. We also can be visited in our office and attract bank as our customer by directly proposing the feasible and bankable of SMEs business to the bank.

Based on thesegmentation that has been specified above, and theservices profile been outlined in the previous chapter, we briefly describe the target market desired for the Toast Room's services.

Demographic:

| Bank Characteristics | SME's Characteristics |
|------------------------------------|-------------------------------------|
| Bank which own credit/ loan as | • Minimum 1 year business |
| their product's portfolio. | establishment with a good cash flow |
| Bank which can be access easily in | • SES: C |

Indonesia, especially big cities.

- Offer competitive loan rate.
- Bank with NPL Ratio above 2.5%
- Small Medium Enterprises with yearly revenue below 2 Billion
- Monthly net income above 30 Million Rupiah
- Total employee 10 300 persons.

Geographic:

Considering that different areas may display certain characteristics and behavior, we also divide the market based on the geographical area. We are targeting the most potential areas where the SME concerns on to get credit/ loan to funding their business expansion, also the quite potential areas for banks to give credit/ loan to the SMEs. The targeted areas will be six (6) big cities (Start with Jakarta and Bandung at the first year, the other cities will be added continuously –i.e. Surabaya, Bali, Medan, Makassar.

Psychographic:

This type of segmentation divides the market into groups according to customers' lifestyles. It considers a number of potential influences on buying behavior, including the attitudes, expectations and activities of consumers. In order to be appeal more specifically to the motivation of SMEs to submit their loan application and banks as our target customer, we customized our services and marketing campaigns based on their

behavior. This table below explains about the characteristics required from the banks and SMEs.

| Bank Characteristics | SME's Characteristics |
|------------------------------|-------------------------|
| Concerned for SME's | Strong goal orientation |
| growth in Indonesia | • Struggle |
| Concern of unemployment | • Confidence |
| problem in Indonesia which | • Strong will to expand |
| quiet high | |
| Aim to get a better economic | |
| growth in Indonesia | |

Positioning

Positioning is about how we want to be perceived by the customer we are targeting. The importance of set a positioning for a company is to get a *defined by consumers* on important attributes—the place of the service occupies in consumers' minds relative to competing services.

We want to be perceived as a company that giving "Solution for Excellence Ideas", which indicates our goal is to become the solution for ideas that come out from everyone. Provide the connection between the SMEs as our partner to banks as our customer; aligned the SME's business concept

which feasible and bankable and combine the whole aspects of the business model into a proposal, to be funded by the banks.

Tactical

7 P – Marketing Mix

To build the strong competitive advantage and fulfill our client needs, Toast Room try to combine 4 important variables in marketing mix which cover Product, Place, Price and Promotion. Lately, the marketing mix has wider coverage which consists of the other 3 variables to help the brand satisfy the client needs. We try to include the 3 variables; People, Process and Physical evidence in our marketing mix strategy. These whole variables used to be known as 7P-Marketing Mix. We breakdown the whole aspects of our 7P as below details:

1. Product

Our product is categorized as intangible items, which giving service by providing the potential and bankable SMEs which we assess and analyze for the business ideas to be funded. All aspect will be presenting into a formal business proposal to the bank as our customer, which cover below aspects as below:

- SME Owner and Company Profile
- New Business Ideas or Concept

- Financial reports analysis
- Feasibilities studies for the project and assessment result.
- Other analysis, such as business location,
 company culture, social community involvement
 and leadership.
- Company prototype
- Creative output, such as the video presentation which describe the SME's business model and also the proposal packaging.

Once the project proposal is ready to be presented, ToastRoom will submit the formal business submission and arrange the SME to present their business concept to the banks. Once the bank approve, next step would the agreement signing process between the SME and bank. Right after the credit being transfer to the SME, bank will pay the success fee to Toast Room at certain percentage base on the loan given.

2. Place

To get people aware of our brand and products, we are using certain channels in order to help running the business as below details:

- Office
- Toast Room website
- Toast Room Social Media
- Banking partner website and their social media
- Expo and booth at SME's Building (i.e. SMESCO)
- Activation place
- Campus and education organization

3. Price

Price is one of variable in our business which having flexibility. In other words, our price can be adjusted based on the project. We can have different percentage success fee from banks of each SME's loan approval. However, we have standardized our core services based on percentage as below:

| Investment paid by the bank | Success fee for Toast |
|-----------------------------------|-----------------------|
| | Room |
| Rp 50.000.000 – Rp 250.000.000 | 5% |
| Rp 250.000.000 - Rp500.000.000 | 4.5% |
| Rp 500.000.000 – Rp 1.000.000.000 | 2.5% |

4. Promotion

Promotion plan will be running aggressively at the beginning of the business establish at the market. Several tactical programs we put in our promotion strategic strengthening the brand. We define into 3 main parts of marketing activities Sales supports, Public Relation and Interactive activity.

Marketing Activities

| Sales Supports | Public Relation | Interactive | | | | |
|----------------------------------|------------------------|---------------------|--|--|--|--|
| Programs/ Tools | Programs/ Tools | Programs/ Tools | | | | |
| Campaign | Press Release | Web portal activity | | | | |
| Branding | Special Events | Online community | | | | |
| Advertorial | Sponsorships | Affiliate | | | | |
| POP Collateral | | programs | | | | |
| Web advertisement Activations | | | | | | |

Source: Toast Room Marketing Calendar (Appendix 1)

5. People

We are involving our people to build the business and empower them with whole aspects that aligned with the company visions. The employees we higher should understand what the company looking for in order to grow the business and the client wants. Key people in toast room are Marketing Team and Business Analyst.

6. Process

Several actions needed to run the business. The overall process will cover whole aspects of the company, which cover the operation, marketing, human resources, and financial.

7. Physical Evidence

This is a variable that we need to support our brand look; we need to provide customer experience once they see our brand feasibilities. From the website up to the physical office look (i.e. unique meeting room) or our marketing collateral, all need to be aligned refers to the brand guideline. Our physical evidence must preview our quality services to create the brand image.

4.2.2.2 Marketing Programs & Communications

Push Strategy

This is a strategy which will be consisting of our various activities in order to deliver our message to our future clients. The Marketing team will take control for every message needs to be delivered to the clients, how it is seen by the clients, when and where to be placement.

From this strategy will be related to our direct marketing activity, which related to our process to meet the customer directly, visit, inform, and do the presentation to the clients, up to the formal business plan submission.

Pull Strategy

Pull strategy is consist of our marketing activities which encourage the future clients to see our brand value and perceive it as the brand which offer best value services. This strategy will use the law of attraction, which combine all the elements of our brand, in order to attract and retain the clients.

The pull marketing activities are building the interactive activities, which can include our tactical program such as:

• Brand expertise partnership

To support the awareness of our activation in getting the SMEs application, we are tie up with some banks and campus to support our activations.

BANK

We tried to gain partnership with banks which supporting the SMEs development in Indonesia. Here, we proposed the bank to give some sponsorship in order

to do the events or pay the source which gives contribution on events.

CAMPUS

We ask campus (i.e. BINUS University) to support us in providing the place for the activations. By having partnership with campus, will not only bring benefit in term of venue facilities, but also help us to reach potential young people which interest to develop their own business or even young people who already start their business at the first year.

OUTSOURCE

By having those two major partners as above, we then looking forward for outsource who can help us give contribution in our events.

Here, we are choosing some expertise people that help us doing the activation. These 2 persons below, are the expertise people that currently known by the people as motivator and young coach which success on their field. They will help us in giving insight and coaching about the finance and career.

Seminar

We are targeting to have the seminar events 3 times per year, which will be held at the beginning, middle and end of the year. For this seminar we can seek for affiliate partners who can support the activity or education institution which still have aligned program. It is possible for seminar activations sponsored by our banking partner to get the potential SMEs.

Advertorial

We are posting advertorial about our company at some print Ad medium or other media which still possible to build our brand awareness. Marketing collateral to be placement at some place which we think can be fit to attract our future clients, i.e. Advertorial in magazine which targeting SMEs as the reader.

4.2.3 Marketing Calendar & Budget

Marketing Calendar

Every year, starting from the Quarter 3, each division will be encouraged to prepare the business plan for the next year. Including the Marketing Division which prepares the calendar consist of monthly or quarterly activities and campaign. From the sales goal, key date and events and breakdown all the tactical and action plans are stated at our

Marketing calendar on yearly basis. The detail of our first year marketing calendar and annual activations 2013 can be found as below detail (see appendix 1)

4.3 **OPERATIONAL PLAN**

Operations reflect what company offers, while operational is about the process in delivering the products or services into the market. In other words, operations function plays factor in satisfying the market; therefore it requires the best strategy to win the competition among the market. Companies compete in different ways; some may compete primarily on cost, others on the excellence of their products or services, others on high levels of customer

service, others on customizing their products and services to individual customer needs, and so on.

Toast's operations strategy in the essence will provide the capabilities which allow it perform in appropriate manner to satisfy the requirements of its clients (banks), the SMEs.

Toast's operational plan explain how Toast operate its business between Toast, its clients and the inside circle of Toast itself. It explains how much cost required, the business flow, and operational capabilities. On daily operation, Toast's employee except the marketing and business specialist will operate in the office. Marketing and Business development often spend outside the office to find or monitor the ongoing SME's project.

4.3.1 **Operational Objective**

General strategic for operation in Toast Room is "customer intimacy", where we are focus to give good service quality to our customer with competitive price. Build the volume, get higher market share and increase accessibility would be our focus at the beginning of our company. Objective:To producevalid (fact), accurate, and dependable analysis of SME for every project.

4.3.2 **Operational Strategic**

In general, there are five basic operations performance objectives(Slack, 2011), where company has to decide which objective

to be prioritized which are quality, speed, dependability, flexibility, and cost. We would like Toast Room to focus on three priorities objectives, which are:

- Quality (Focused on quality advantage)
 - We are obliged to provide valid information and thorough analysis about debtor's business development and its financial situation.
- Flexibility (facing SMEs in any industry)
 - Toast would want to be able to analyze SME's financial aspect in many industries' type.
- Dependability
 - Toast will complete the project on time based on how complicated the SME's business run.

4.3.3 **Operational Goals**

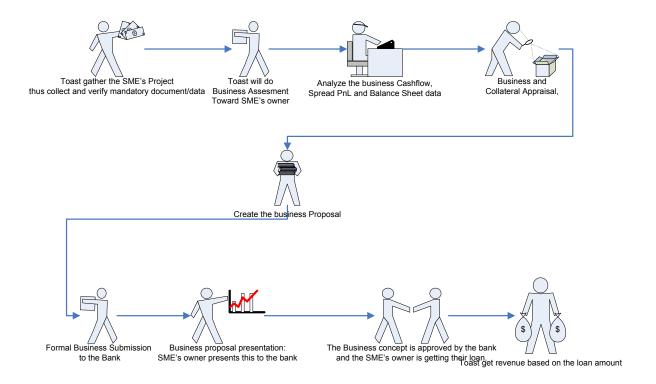

Beside the operational objective, Toast Room also set the goals which needed as a management guideline. We breakdown the goals as below:

- Increase the productivity of the company 5% per year, can be measured from success story of our SME's.
- 2. To control our service quality in order to minimize the failure project (less than 1% per year).

4.3.4 **Operational Flow**

- Toast gather the SME's Projectthus collect and verify mandatory document/data
- Toast do the business assessment toward SME's owner using business management tools/ framework (see subsection 4.4.2) and sign some agreement
- Analyze the business cash flow, Spread Profit and Loss and Balance
 Sheet data
- Business Development and Collateral Appraisal
- Summarize all the analysis and Create the Business Proposal(See Prototype chapter 5)
- Final Submission business to bank
- Business proposal presentation: SME's owner presents this to bank
- Business concept is approved by the bank and the SME's owner is getting their loan.
- Toast will get revenue based on the loan amount.

The Operation Flow will be looked like the picture below:

4.4 **Operational Tactic**

Maximizing Value Added in Operations

1. Input

Three types of input's resources that will be transformed are:

Data

For the very first, Toast gathers all the data(Financial Statement, Profit and Loss statement, Bank Account Transaction, and Balance Sheet) from the SME who submit their project ideas which then become the inputs used up in the process of creating our services.

• Client's information

In this phase, SME have to provide mandatory document (NPWP, SIUP, Owner identity card).

• Owner's knowledge

Owner's knowledge about his business also be questioned in our business assessment form. It will become our based information how good the owner's knowledge about his running business.

• Industry's knowledge

We have to know the industry's type of the SMEs who want to get its loan to determine industry's attractiveness and how well is the SMEs positioning in this kind of industry.

2. Transformation Process

Transformation process is a group of activities that takes all the inputs mentioned above, transforms and adds value to them, and finally provides outputs for the clients. We do the first screening process on the prospective SME's project, analyze the data(Financial Statement, Profit and Loss statement, Bank Account Transaction, and Balance Sheet), and appraise the collateral and business development related to the business owner.

3. Output

The output will be the business proposal that will be presented to the bank. If the proposal accepted, SME's owner will get his loan to fund their next project.

4. After Sales Service

The after Sales Service is the last but not the least phase to concern. The after Sales Service for Toast is monitoring our previous client who got his loan accepted. We make sure their business is still running according to our analysis and able to repay the loan.

4.4.1 **Operational task**

Toast Work Hour is eight hour per day. Toast's employee has an obligation to spend 40 hours per week. With 12 Annual leaves per year therefore within a year, an employee will be spending 1984 hours.

Toast Operational is verified per project. Every project contains 1 SME's business concept that needed to be analyzed thoroughly. For each business concept we need one person handling the concept's financial analyst, and one person to analyze the business development

and its feasibility, and also creative team helps the team to involve in design the new SME's needed creative design output.

One Financial analyst may handle up to four to five SME's Project (preferable in the same industry). A Business Developmentanalyst has an obligation to visit the SME's place to monitor their business development and to appraisal how the business running according to their financial statement.

4.4.2 Business Management tools and Framework

4.4.2.1 STANDARD OPERATIONAL PROCEDURE

I. <u>Data Gathering</u>

At the first phase of the SME selection, we are required the SMEs to submit data as below:

- a) Business Proposal
- b) Legality documents: SIUP, TDP, NPWP, Akta, KTP (Management, shareholder and assurance)
- c) Financial documents: Bank account statement for the last 6
 months, Financial Statement for the last 2 years.
- d) Collateral documents: House certificate, PBB, IMB
- e) Supporting documents: Purchase Order to Supplier, Delivery
 Order to Buyer

II. SME's character and business assessment

Second phase, Toast Room will invite the SME to do certain steps:

- a) SMEs deep interview with Toast Room Business Analyst
 Objective:
- To know the SME's character in running business.
- This interview will guide us to know how the SME conduct the business.
- The business integrity before the credit given.
- b) SMEs need to fill in the Business Assessment form below to help us understand the SME's business knowledge.

BUSINESS ASSESSMENT FORM

1. Knowledge of the business

How much do you know about the business area?

 Will there be any additional expenses or investment to take just to learn the business field?

Do you need additional partner to run the business due to the lack of knowledge?

| 2. | Experien | ce in | the | business | field |
|----|----------|-------|-----|-----------------|-------|
| | | | | | |

Have you owned or worked for this kind of business?

How far is your responsibility and capacity to this kind of business before?

3. Skills to support the business

In what level do you know for the uniqueness skills, and if you
need to learn or explore more, how long the learning process will
take?

4. Ease of entry

 How much is the cost of starting or entering the business? Please breakdown.

• Who is your competitor or similar business which currently existing? Please mention competitor name, products/ services they offer, competitor price, and current market share.

5. Uniqueness

 How unique the idea is? What makes the business different from the other competitor or similar business?

III. Business Analysis

a) Business Knowledge

During the filtering process we will use some checklist review or assessment that needs to be filled by the SME's in the business assessment form. Next step would be the scoring by our business analyst to see appraisal result. Score will be from scale 1-4 depends on the contents. Several aspects in the business assessment form which we scoring is representing as below checklist:

| Questions | | Sco | ore | |
|---|---|-----|-----|---|
| Questions | 1 | 2 | 3 | 4 |
| 1. Knowledge of the business | | | | |
| • How much the SME know the business area? | | | | |
| Will there be any additional expenses or investment to take just to learn the business field? | | | | |
| Does the SME need additional partner to run the business due to the lack of knowledge? | | | | |
| 2. Experience in the business field | | | | |
| Have the SME owned or worked for this kind of business? | | | | |
| How far the SME's responsibility and capacity to this kind of business before? | | | | |
| 3. Skills to support the business | | | | |
| In what level they know the unique or specific skills which related to the business? If they are lack of skills, and they need to learn or explore more, how long the learning process will take? | | | | |
| 4. Ease of entry | | | | |

| • Cost of starting or entering the business. | | |
|--|--|--|
| Competitor or similar business which currently existing. | | |
| 5. Business Uniqueness | | |
| How unique the idea is? What makes the business different from the other competitor or similar business? | | |

b) Financial analysis

Objective:

- Measure the debtors capacity repay the loan
- Establish credit requirements based on actual cash flow
- Enable us to fully evaluate and understand the SME creditworthiness

Toast Room financial analysis will cover aspects of:

- Income Statement
- Projection Income Statement in 5 Years
- Balance Sheet
- Projection Balance Sheet in 5 years
- Cash-flow

Objective:

The importance of cash flow analysis is related to the fact cash flow would be the first source of loan repayment

Cash flow analysis will cover main aspects as below:

- a. Operation flows
- b. Financing flows
- c. Investing flows
- Projection Cash Flow in 5 years
- Bank Statement Analysis
- Key Ratios from 4 main aspects, which are:
 - 1. Liquidity
 - a. Current Ratio

Current assets available to pay current obligations

b. Quick Ratio

Current liquid assets available to pay current obligations

2. Efficiency

- a. Account Receivable Days on Hand
 Management's ability to collect its receivables
- Inventory Days on Hand
 Management's ability manages the inventory
 efficiently. Low ratio is good.
- c. Accounts Payable Days on Hand

Calculate financing provided by trade creditors to company and management paying habits.

d. Return On Assets (ROA)

Measures return on investment represented by the assets of the business

e. Return On Investment (ROI)

Measures rate of return on owner's equity.

3. Profitability

a. Operating Profit Margin

Represent the percentage of profits retained from sales.

b. Net Operating Margin

Represent the ability of the business to generate profit from sales.

c. Direct Cost and Expense Ratio

Indicates the percentage of sales used to fund the expenses.

4. Leverage

a. Debt

- Debts to Assets

Represent the degree to which assets are funded by external creditors

- Debts to Net Worth

Calculate how many Rupiah of outside financing for each Rupiah of owner's equity.

b. Interest Coverage

Degree of each earning can declined without affecting company's ability to meet the annual interest costs.

c. Debt Coverage

Measures the degree to which earnings plus non cash expense can decline without affecting the company's ability to meet current payments on long-term debt.

- c) Business Development analysis, will cover all aspects below:
- Operation Strategy
- Marketing Strategy
- Human Resource Strategy
- Competitive Mapping Analysis
- d) Collateral Appraisal, consist of collect all data below:
- All assets own by debtor
- All shares in the company own by the debtor
- All shares as supporting guarantee

IV. Recommendation

Summarize the business concept, credit objective, business feasibility, industry analysis as supporting data and overall business projection at minimum 5 years.

V. Creating Final Business Proposal

All data to be compiled from company profile, SMEs profile, and all appraisals needed as mentioned above, also recommendation from Toast Room as the examiner.

VI. Final Business Proposal submission to the bank

After all business proposal done, then we need to repackage into visual aspect which help our customer (bank) to understand and can see the creative output that represent the SMEs brand.

VII. Business proposal presentation

This is the time for the SME to present the business concept to the bank, while Toast Room will present all the analysis which stated at the business proposal as the appraisal result of all steps above.

VIII. Business concept approval

Once bank approves the business proposal, next step would be the signing process for the agreement between Toast Room and SMEs.

IX. Payment transfer

After the signing process between Bank and SMEs, our accounting will issue an invoice to Bank for the success fee payment for the SMEs credit approval.

4.4.2.2 *5C's of Credit*

In preparing the proposal to obtain the loan for the SME from a bank, it needs collateral appraisal to assess the various risks that can impact on the repayment of loan. 5 Cs of credit are judgmental factors which in theory bankers used to evaluate the quality of a personal or small business loan application(businessdictionary.com). There are certain elements to be assessed in SME's creditworthiness. As a common reference in banker's analysis, the variables play factors in SME's creditworthiness assessment are covered in "The 5C's of credit".

The 5 C's such as the following:

• Capacity.

A company should generate enough CASH FLOW to repay the requested debt, and it will be shown in its historical and projected cash flow. The data should be able to give the bank visibility to future performance.

• Collateral

This is an element that fascinates bank since it will be a secondary source of repayment should the company fail. In generally, the bank wants the loan amount to be exceeded by the amount of the company's collateral. In case the SME unable to repay the loan at some point in the future, the collateral should be able to recover its loan by being liquidated and be proceed to pay off the loan.

Capital

When it comes to capital, the bank is essentially looking for the company's owner to have sufficient equity in the company. A bank will not interest in giving loan for company's losses, so they will ensure that there is enough equity to rehabilitate itself. There is no exact measure or amount of "enough capital", but it is specifically in the situation and the owner's financial profile. Commonly, the bank will look at the owner's investment in the company relative to their total net worth, and they will compare the amount of the loan to the amount of equity in the company – the company's Debt to Equity Ratio, and banks typically like to see Debt to Equity Ratios no higher than 2 to 3 times.

Condition

The other key factor of 5 C's Credit is the overall condition surrounding the company and within its industry that could affect its business. The condition considered to determine the key risks facing the company. Even if the company's historical financial performance is strong, the bank wants to be sure of company's future survival ability.

Character

Without scoring high marks for character, a banker will not approve a loan request. The character in this term is the general impression of the borrower that is relatively subjective to determine that the borrower is trustworthy to generate a return on funds. Character that is going to be reviewed is about the owner and management educational background and experience in the business industry. After all, it is an intangible matter.

4.4.2.3 SME's feasibility assessment

Outcome

Identify strengths and weaknesses in SME business as compared to a model business.

Overview

This assessment identifies the major criteria that can make or break the success of a business. By evaluating SME's business concept against these criteria, there will be facts show the level of risk it might be taking in running the SME business. The criteria can also be used to develop benchmarks for improvement in the product/service, the market, and the financial aspects of the business.

The Assessment Process:

Step 1: Review the Business Concept Feasibility Assessment – Criteria Descriptions.

Review the criteria and descriptions. For each criterion, choose the description that most closely matches the SME situation. Mark that description's number (1 through 5) on the Scoring Page.

Step 2: Total the score.

On the Scoring Page, total the points for SME business concept.

NOTE: The model, or perfect, business would score a "5" on every criterion, for a total of 100 points.

Step 3: Evaluate SME business.

Generally, for SME business concept to be feasible it must achieve at least one-half of the possible points overall and at least one-half of the possible points in any of the three feasibility areas—product or service, market, and

financial. A score of less than 3 for any individual criterion indicates a weakness in the business concept, which requires further consideration.

Business Concept Feasibility Assessment – Scoring

For help with rating, see the criteria explanations on the following pages.

| PRODUCT OR SERVICE FEASIBILITY | 1 | 2 | 3 | 4 | 5 |
|---|---|---|---|---|---|
| Customers understanding about the importance of product as their need | | | | | |
| Product readiness (going to the market) | | | | | |

| FINANCIAL FEASI | BILITY |
| | |

Funding is easily obtained.

- 1. The SME owner is going to have to invest a huge amount, maybe more than he/she is willing to risk.
- 2. The SME owner not really sure how much funding his/her business will require.

| | 3. The SME owner needs to invest quite a bit of money, but he/she can afford to risk it. |
|-------------------------------|--|
| | 4. The SME owner need to invest a moderate amount of money, he/she can afford to risk it. |
| | 5. The SME owner doesn't have to invest much money at all; He can |
| | comfortably risk it. |
| Revenue stream is continuous. | SME owner never know what's going to come in because of seasonality, large contracts, etc. |
| | 2. Monthly sales will fluctuate significantly but are somewhat predictable. |
| | 3. The product's sales vary somewhat from month to month due to sales cycles and products offered. |
| | 4. Most of the time, sales will be steady from month to month. |
| | 5. The steady sales always countable from month to month. |
| Money is collected prior to | 1. SME send out a bill for products/services and wait over 30 days for customers to pay. |
| sales. | SME sends out a bill for products/services and the typical customer pays within 30 days. |
| | 3. SME's customers pay at the time of service or when they receive the product. |
| | 4. SME's customers make an upfront deposit that covers the direct costs of the product/service. |
| | 5. The entire price of the product/service is paid prior to delivery. |
| Hiring and retaining | Turnover will be high. The cycle of hiring and training will be continuous. |
| employees is easy. | 2. SME will spend lots of time and money hiring and training employees. |
| j | 3. For a moment, the owner can control labor costs by using |
| | subcontractors as the company grows. |
| | 4. SME owner has well-qualified employees and expect a low turnover rate. |
| | 5. There is zero turnover rate! |
| Legal problems | 1. SME got problems, it is already facing legal action |
| do not exist. | 2. SME will have problems. It has multiple business owners, high liability products, leasing issues, or products that must be legally protected. |
| | 3. It concerned about protecting its personal assets from legal liability. |
| | 4. Legal problems do occur in this industry, but most can be anticipated and managed with proper planning. |
| | 5. Few lawsuits or legal harassments occur in this entire industry. |
| | |

4.5 Location Strategy

Location : jl Wijaya, South Jakarta

Type : Office Building/ShopHouse

Ownership : Rent

Fee : Rp 35.000.000,- / year(Rumah 123)

We choose this location because the Rent fee is not as high as the Jakarta Office center area (Sudirman, Thamrin, Kuningan) but not far from that area.

The picture above we take from reference website (www.rumah123.com) which offer shophouse rent in Jalan Wijaya area. The house's condition is unfurnished, and it needs renovation and fixture finishing for the office layout including furniture and office equipment inside the building.

4.5.1 **Operational Fixed Expense**

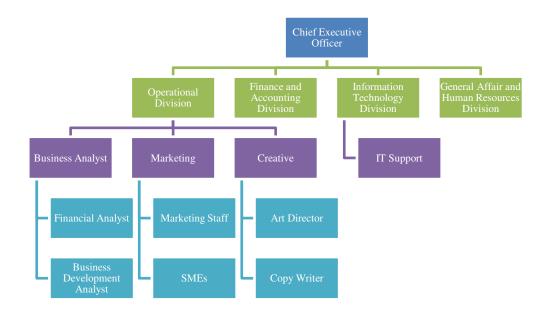

| Operational Fixed E | | | | | | | | | |
|---------------------------------|---------------------------------------|----------------|--|--|--|--|--|--|--|
| | monthly | yearly | | | | | | | |
| Electricity and water | 2,500,000.00 | 30,000,000.00 | | | | | | | |
| Postage | 250,000.00 | 3,000,000.00 | | | | | | | |
| Transportation | 3,000,000.00 | 36,000,000.00 | | | | | | | |
| Phone Allowance | 1,100,000.00 | 13,200,000.00 | | | | | | | |
| Office Utilities | 100,000.00 | 1,200,000.00 | | | | | | | |
| Internet | 4,000,000.00 | 48,000,000.00 | | | | | | | |
| Total Operational Fixed Expense | 10,950,000.00 | 131,400,000.00 | | | | | | | |
| Operational Yearly E | xpense | | | | | | | | |
| Office Rent (1 year) | | 35,000,000.00 | | | | | | | |
| Legal and Professional Fees | | 14,000,000.00 | | | | | | | |
| Operational Initial Expens | Operational Initial Expense(Year one) | | | | | | | | |
| Rennovation | | 100,000,000.00 | | | | | | | |

The picture above explains how human resource arrangement has to be aligned with our marketing plan to achieve our Sales target the first year.

4.7 Financial Plan

Finance is one of the important things to be planned in aiming our business objective. In this sub-chapter, we will use assumptions which several of them are already mentioned in our previous sub-section (Marketing, Operation, and Human Resource). We decide using owner equity instead of using loan as our fund's source.

4.7.1 Sales Assumption

Based on our Marketing subsection we define our core services separated by the amount of loan given to the SMEs. We divided our revenue streams based on the SME's loan accepted by the bank. Range of percentage will be 2% to 5%. We choose this range because it is the acceptable amount of percentage since the bank will receive 11 - 13% for 1 billion loan. We assume 2 - 5% will be an ideal deal between us both parties. Loan to be given to SMEs started from 50 million and the highest would be 1 billion rupiah. Scale of percentage will be lower as the loan amount increase.

We assume the sales breakdown as below:

Sales Assumption

| MINIMUM | MAXIMUM | Success Fee Percentage | Average loan * Success Fee percentage |
|-------------|---------------|------------------------|---------------------------------------|
| 50,000,000 | 250,000,000 | 5.0% | 7,500,000.00 |
| 250,000,000 | 500,000,000 | 4.5% | 16,875,000.00 |
| 500,000,000 | 1,000,000,000 | 2.5% | 18,750,000.00 |

The table shows 50 million to 250 million loan will be charged at 5% or on average we will get 7.5 million per project. And for the loan between 250 million and 500 million, the percentage will become lower (4.5%) while on average will generate 16.875 million per accepted loan. 500 million until 1 billion loan will be charged at 2.5 % or the average loan in rupiah will be 18.75 million.

For every business proposal will have the Cost of Sales for printing at 500 thousand per business proposal. Aligned with our marketing calendar, we are mapping our business proposal acceptance assumption as below:

| Sales Assumption | | 2013 | | Business | Proposal . | Accepted A | Assumption | | | | | | |
|------------------|---------------|------|-----|----------|------------|------------|------------|------|-----|------|-----|-----|-----|
| MINIMUM | MAXIMUM | Jan | Feb | Mar | Apr | May | June | July | Aug | Sept | Oct | Nov | Dec |
| 50,000,000 | 250,000,000 | | 1 | 2 | 3 | 4 | 6 | 5 | 6 | 6 | 7 | 7 | 5 |
| 250,000,000 | 500,000,000 |] | 1 | 1 | 3 | 3 | 4 | 4 | 5 | 5 | 5 | 4 | 5 |
| 500,000,000 | 1,000,000,000 | | 1 | 1 | 3 | 3 | 3 | 4 | 4 | 4 | 3 | 3 | 7 |

As previewed on table above, on January 2013 our business proposal has not yet been accepted since our marketing team just started the activation such as expo, seminar. We are optimist we will get our business proposal accepted in February from our activation on January.

Along with all activation which breakdown in our marketing calendar, the number of business proposal accepted is rising according to our marketing calendar. In total, we are targeting to get 128 loan (business proposal) accepted with total sales of 1.74 billion which preview in our income statement below. And we also assume our sales growth 20% per year according to our optimistic marketing goals.

4.7.2 Office Startup Summary (Initial Investment)

Toast Room's startup cost will include the office building rent fee, Office asset (Furniture, Computer equipment), Legal and Accounting fees, Building renovation.

Computer Equipment(Bhinneka.com):

- 1. Computer Server: IBM System x3200M3-IIH @ IDR 11,850,000
- 2. Laptop : HP ProBook 4430s (8-3PA) @ IDR 5,251,400
- 3. Designer PC: Apple iMac [MC813ZA/A] @ IDR 18,439,200
- 4. Printer : HP PJ2050 @ IDR 2,400,000
- 5. Peripheral products(Network infrastructure) @ IDR 7,000,000

Furniture(Toko Furniture Simpati)

| 1. | Table Mahogani | (13 pcs) | @ IDR | 695,000 |
|----|----------------------------|--------------|-------|-----------|
| 2. | Office Chair | (13 pcs) | @ IDR | 460,000 |
| 3. | Safe | (1 pc) | @ IDR | 883,000 |
| 4. | Other Furniture and Office | ce utilities | @ IDR | 5,000,000 |

Assumption the computer and furniture Depreciate in straight five years

Legal and Professional Fees

Toast will be established in a PT (Perseroan Terbatas), so legal and accounting Fees will be included in the Start-up investment.

Office Renovation

When we decide to rent office building, the building condition is in the unfurnished condition. We need some amount of money to renovate the office and make it a comfortable workplace.

Working Capital (Cash on Hands)

When we established Toast Room, we need cash on our hands as the our money source to cover our first three months expense including employee's salaries, operational expense, and marketing expense.

Start-up Investment breakdown is explained in the following table:

| Start-Up Investment Table | | | |
|--------------------------------|--------|------------|-----------------|
| Initial Investment | | | Amount |
| Asset | amount | | |
| Computer Equipment | | | 121,145,400 |
| Laptop | 12 | 63,016,800 | |
| Mac | 2 | 36,878,600 | |
| Server(Email) | 1 | 11,850,000 | |
| Printer | 1 | 2,400,000 | |
| Other(Network and Tools) | | 7,000,000 | |
| Furniture | | | 20,898,000 |
| Office Table | 13 | 9,035,000 | |
| Office Chair | 13 | 5,980,000 | |
| Safe | 1 | 883,000 | |
| Other Office utilities | | 5,000,000 | |
| Total Asset | | | IDR 142,043,400 |
| Operating Capital | | | |
| Working Capital(Cash on Hands) | | | 713,380,000 |
| Total Operating Capital | | _ | IDR 713,380,000 |
| Total Required Funds | | | IDR 855,423,400 |

4.7.3 **Investment Opportunity**

Toast Room plan to increase their income through investment.

The investment will in form of Bank Deposits. Using rate 5% per year,

Toast Room have a plan to invest portion of money in year two until

year five.

| | Investment Opportunity | | | | | | | | | |
|--------------------|------------------------|-------------|-------------|-------------|-------------|--|--|--|--|--|
| | 2013 | 2014 | 2015 | 2016 | 2017 | | | | | |
| Annual Deposits | 1 | 100,000,000 | 120,000,000 | 150,000,000 | 200,000,000 | | | | | |
| 5% Interest Income | • | - | 5,000,000 | 11,250,000 | 19,312,500 | | | | | |
| Deposit per Year | 1 | 100,000,000 | 125,000,000 | 161,250,000 | 219,312,500 | | | | | |
| Deposit Total | | 100,000,000 | 225,000,000 | 386,250,000 | 605,562,500 | | | | | |

Assuming we will have a lot of cash asset on hand, we will allocate a portion of our cash into certain investment (e.g deposits using 5% interest). Investment start in year 2 and we will re-invest interest generated from previous investment.

4.7.4 **Dividend Share**

Toast also shares its dividend to its owner. We allocated 60% of our retained earnings to be shared to the owners. Starting in year one, 60% of retained earnings will be allocated as the dividend shared and same rules applied in the following year.

NPV \$249,194,670.55 Payback Period 4.5

Using Discount rate 15% and tax rate 25%, we can see from the table above given positive cash flow in the first year and showing the positive NPV result for this project. While using payback period method, this business creation will get the payback before we pass year five.

4.7.6 Financial Result

In this part, we project financial statements to see how ToastRoom business performs financially. Our financial statement projection is made for only the first five years of project's life. Capital

budgeting shows the annual cash flow starts to be positive in the first year and keep increasing on the next year.

The projected financial statements that we developed here consists the followings:

- o Income Statements
- o Cash Flow Statements
- o Balance Sheets

| Toast Room | | | | | | | | | | | | | |

At the first year, we reach the revenue IDR 1,740,000,000 from the simulation of getting SME's approved business proposal by 128projects at the end of the year. This arrangement is based on 52 SME's projects valued average between (IDR 50 million – IDR 250 million), 40 projects for average IDR 250 million to 500 million, and 36 projects for loan applied between IDR 500 million to IDR 1 billion. Toast will charge banks with certain percentage (according to Financial Assumption subsection).

Our cash flow in a year does not always result in positive manner. There are certain months where the cash flow is negative (i.e in January, February, and March). It is because we just launch the company in January and do the activation on January and get the impact on March. After March and the upcoming months we will generate positive cash flows.

4.8 **Summary**

Based on our Business Model planning we discussed above for sales, marketing, operational, human resources, and financial planning, we can summarize some conclusions below:

- The business model concept is feasible and attractive
- This business is intended to focus on generating new ideas and sales target. Many competitors will show up with the same model but the intangible asset (ideas, knowledge) is hard to be imitated in the early of establishment.

 Toast Room as a similar consulting service type industry which have operation margin more than 50% per monthly revenue will get.

4.8.1 **Business development plan**

Due to excessive operating cash balance in the end of year five, Toast will have further expansion plan which are:

- Expand the business across the Indonesia; make a partnership with local media, local organization, and local bank to promote the economic growth surround the area.
- Create a community consists our previous or ongoing client and became a place for SME gathering in the future. A place to discuss innovative project and feasible project to be shared.
- Expand extensively the number of our human resources to handle our client.
- Chance to have partnership with venture capital as our new customer segment.
- Mentorship Service will be considered as our next revenue stream as our number of client who needs to be educated increased.
