## BUDGET CALCULATOR

You can use this form to help you draw up your household budget. Decide whether you want to use weekly or monthly figures and stick to that basis throughout. This means you'll need to multiply quarterly bills by four and divide by 12 to find the monthly amount, or multiply by 4 and divide by 52 to find the weekly equivalent.

| Income | £ |
| :--- | :--- |
| Take-home pay (earnings after tax and other deductions) <br> from a job or self-employment |  |
| Sick pay |  |
| Pension from occupational or company schemes and/or <br> personal pensions |  |
| State Pension |  |
| Tax credits |  |
| Other state benefits |  |
| Travel cost refunds |  |
| Income from grants | A |
| Income from insurance policies |  |
| Income from savings |  |
| Other income |  |
| TOTAL |  |
