Microsoft Office Project

Template ID:

Project is a project management program designed to help you plan, manage, and communicate your projects.

Whether you have a simple list of tasks or want to coordinate activities across multiple projects, Project makes it easy to get started and learn as you go.

This template has been designed to help you to get started in Excel, but when you need more like:

- * See your tasks in a Gantt Chart
- * Create links between tasks so one task starts after another task finishes
- * See how much work each person on the team has assigned to them

You can easily import this information into Project and keep working.
