Tournant[®] High-Performance Food Blender

The word Tournant comes from the title of Chef Tournant, or swing chef, one who can work all the stations in a professional kitchen. The Hamilton Beach[®] Commercial Tournant high performance blender lives up to its name.

Professional Results at Home

Hamilton Beach Commercial appliances are the first choice amongst professional chefs worldwide. Our commercial-grade blenders are only available to those in the restaurant and food service industry... until now. We are proud to offer our most powerful and versatile food blender to home chefs and food enthusiasts with a desire for fine cooking in their own kitchen. Make anything and everything with the Tournant high performance blender from Hamilton Beach Commercial. This is the blender expert chefs use to effortlessly make sauces, soups and dressings, or grind nuts, grains and spices. The exclusive chop function with speed control makes light work of preparing salsas, compotes or hummus and ensures piece consistency from the top of the 64-ounce jar to the bottom. Variable Speed and Pulse functions give home chefs complete control over their recipes for restaurant-quality results every time.

Unprecedented Power

Sporting a mighty 3 horsepower motor, the Tournant is one of the most powerful blenders of its type*. Grinding, blending, chopping and pureeing have never been easier. That's why Hamilton Beach Commercial products are the top choice for professional, aspiring and home chefs worldwide.

Features:

- 3 HP motor, all-metal drive coupling
- Patented Wave~Action[®] Blending System, stainless steel blades
- Adjustable Speed, Pulse, One-Touch Chopping with Speed Control Gauge for monitoring motor temperature
- 64-ounce break resistant polycarbonate container
