HR & Payroll Add-ons for Microsoft Dynamics® GP

See what our customers are saying about Paycheck "What If" Calculator...

"**Paycheck 'What If' Calculator** is a great time saver! Having all the information you need on one screen makes running different scenarios so much easier, for example, grossing-up employee anniversary payments. We used to use an online payroll calculator and had to go back and forth between Dynamics GP and the web. No more wasting time by jotting down pay rates, deductions and tax information, then entering these amounts in an online calculator. Just select an employee and all the information is ready to go."

Landon Russel, The Money Box

"The payroll administrators at our sites love that **Paycheck 'What If' Calculator** gives them the ability to calculate various payroll scenarios for team members when asked without having to adjust the actual cards! No more adjusting the actual cards, running a test payroll to allow team member to view and then backing out those changes! Gross up situations were no fun before the 'What If Calculator' but can be done with ease now!"

Dawn Barber, IT Business Analyst, Poet

"We love the **Paycheck 'What If' Calculator**. It makes life so much easier during open enrollment when employees are electing their benefits and determine their filing status and exemptions. Thanks for providing such a great tool!"

Jill Underwood, Bedford County Public Service Authority
