THE SCIENCE, **NATURAL** PHILOSOPHY AND TIME-TESTED ART OF CHIROPRACTIC COMBINE TO MAKE IT ONE OF THE MOST **REWARDING** AND FASTEST-GROWING HEALTH CARE PROFESSIONS IN THE **WORLD.**

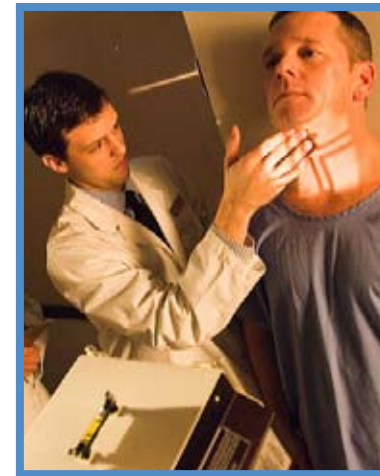

OVERVIEW

WHO WE ARE, PART ONE

For more than eight decades, Cleveland Chiropractic College, with campuses in Kansas City and Los Angeles, has been the place to learn the science, philosophy and art of chiropractic. More than one in every 10 chiropractors practicing in North America is a Cleveland graduate. A career in chiropractic gives you the freedom to determine how, where and in what specialty areas you will practice — Cleveland gives you the balanced, flexible and practical education to excel at chiropractic. And we also offer undergraduate and pre-professional programs that can accelerate your career in health care. Do you want an inspiring, rewarding career you can truly love? Look no further than Cleveland Chiropractic College of Kansas City. This is where you can put health in your own two hands.

WHAT CHIROPRACTIC IS

Chiropractic health care focuses primarily on spinal function and its relationship to the nervous system and good health. Doctors of chiropractic emphasize that the body is a self-regulating and self-healing organism. The chiropractor's goal is

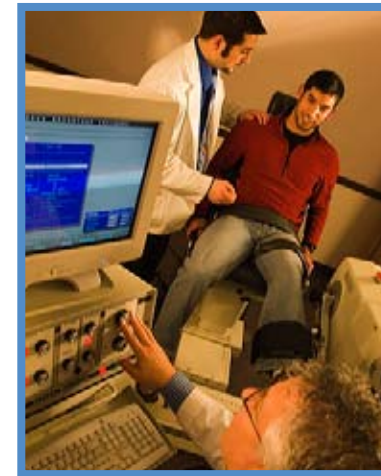

to use spinal and extremity adjusting techniques, along with advice regarding diet, exercise and positive lifestyle choices, to help the body help itself. And chiropractic is a profession in which you control your destiny — where you live, the hours you work and the people you work with are for you to decide.

MOVE AT YOUR SPEED

Cleveland offers a four-year, 12-trimester Doctor of Chiropractic degree, as well as an accelerated program covering the same curriculum in just 10 trimesters. If you are a quick learner with exceptional study skills you can graduate months earlier and get right into your career. The accelerated Bachelor of Science in Human Biology can be earned concurrently or separately from the DC degree.

SUPERB TEACHING

Your Cleveland Chiropractic College education is enriched by faculty members who bring experience, expertise, research accomplishment, compassion and commitment to their teaching. Because on average there is one faculty member for every 13 students, you will have exceptional access and support in small classes. In addition, our success strategies program will help you build on your passion and education, giving you practical information to create opportunities for yourself as you prepare for life after graduation.

BALANCED CURRICULUM

At Cleveland Chiropractic College, students are educated not only to manage conditions, but also to care for people; not only to adjust the spine, but also to make recommendations about exercise, diet and lifestyle. Our curriculum strikes a balance between chiropractic philosophy and science, tradition and innovation.

MORE HANDS-ON EXPERIENCE

From your first trimester, you get hands-on adjusting experience. The College's Health Center is a primary source of health care for many people in the Kansas City area, with thousands of patient visits each year — meaning you benefit from a wealth of clinical experiences. You will have the opportunity to apply for internships at our unique Wellness Center at nearby Truman Medical Center, which provides an exceptional hospital-based learning and networking environment to power your career.

AN IDEAL LOCATION

The Kansas City metropolitan area, with more than one million residents and a multitude of exciting restaurants, entertainment, the Kansas City Chiefs and Royals, concerts, theater, museums, parks and much more, offers fun and relaxation for singles and families. The nationally known Country Club Plaza features upscale shopping amongst Spanish-style architecture, imported statuary and fountains, horse-drawn carriages and sidewalk cafés.

A STUNNING NEW CAMPUS

Cleveland Chiropractic College, one of the oldest non-profit chiropractic colleges in America, has become the newest — on a stunning 34-acre campus in Overland Park. More than 80 years of Cleveland Chiropractic College history, tradition, knowledge and achievement have gone into the development of these state-of-the-science classrooms, labs and patient care facilities. It's all just minutes from the heart of Kansas City in Overland Park, Kansas, an attractive, vibrant, and safe suburban city recently rated by *Money Magazine* as one of the top ten most livable cities in America.

WHO WE ARE, PART TWO

Students on the Kansas City campus come from every region of the US and several countries. While the mean age of our students is 24, they represent many age groups and backgrounds, and all share a desire to help people maintain good health and active lives. Thousands of alumni practice as licensed doctors of chiropractic in 50 states and 21 countries, forming a network that can be an invaluable resource in your practice and your career.

WHERE TO CLICK

More information on everything you see here, including academics, admission requirements, scholarship opportunities and how to apply, is available at www.cleveland.edu.

COME AND SEE

You owe it to yourself to take a closer look. We invite you to tour our campus and talk with students about their education. You can schedule a personal visit by e-mailing us at kc.admissions@cleveland.edu or calling 800-467-2252. You can also check out upcoming campus events at www.cleveland.edu. We look forward to seeing you soon.
