Using Flip PDF Service

Start Flip PDF Services Settings program, you will be presented with the below interface:

I. Set Monitor Detail

Click "Add Folder" button to enter into Monitor Detail Setting window:

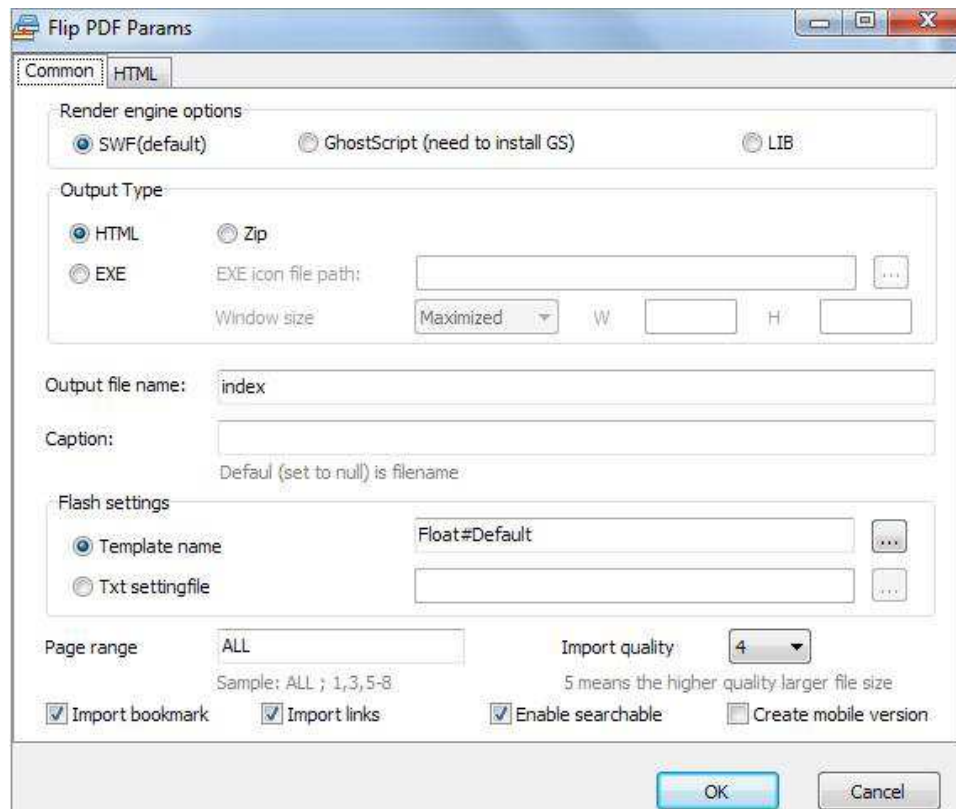

1. Folders Setting

- Monitor Directory: set directory to monitor, even Include Sub-Directory.
- Output Directory: set output directory to store converted flip books.
- Log File Directory: Log files will be saved as .log format, and all processing details will recorded in log files, such as when to monitor, which files have been processed, whether converting successfully or not.

2. Flip Setting

(1) Output Type

i. HTML

HTML type is for uploading created page-flipping ebook onto websites. You can define HTML keywords, description and other properties in "HTML" setting panel:

Common HTML

HTML key words

flip, book, 3d, digital, publish, convert, service, flippage

HTML description

FlipBook Service is a windows services program which can run in the background to convert PDF files to page-flipping eBooks automatically. You can use the service to batch build flip books with ease. FlipBook Services can watch multiple folders at the same time, using different templates, different eBook features and formats.

HTML javascript

```
<script type="text/javascript">
//put your javascript code below
</script>
```

ii. ZIP

ZIP format is for compressing the created files into an integral ZIP package which can be sending out as attachment directly. Your recipients just need to uncompress the ZIP file and then they can view the HTML flipbook instantly (you can also define HTML Settings):

iii. EXE

EXE type is for outputting flipbook as a single executive file, easy storing and easy viewing:

You can define Icon and Opening Window Size:

EXE EXE icon file path: E:\Programs\Flipping Book\Flip PDF Service\default.icr ...

Window size FullScreen W H

(2) Output File Name and Caption

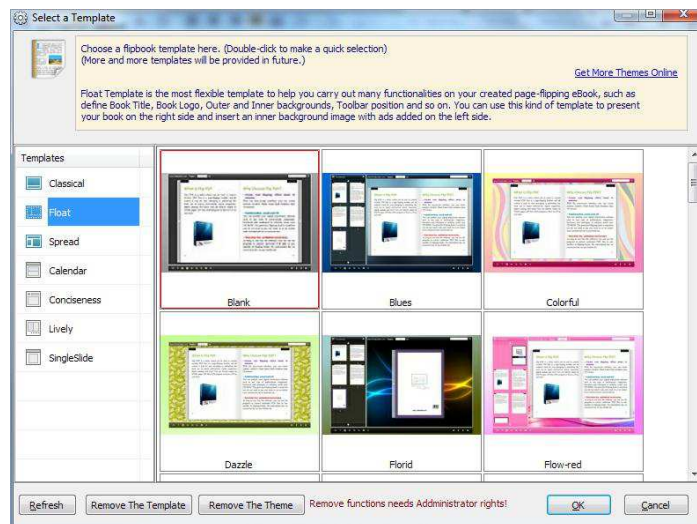

After choosing output type, define file name for your books, the default name is "index", so the file name could be "index.html", "index.exe" or "index.zip". The caption is the book title of your HTML file, and the default value is the same as the File Name.

(3) Flash Settings

i. Template Name

There are different pre-designed templates in the Service program, you can enter into "Select Template" interface to choose a proper one for your books (different monitor folders can use different templates):

ii. TXT setting file

Or if you have other Flip GUI program installed, you can create more themes in different templates, and export the template settings in TXT format, and then use in the Service program.

(4) Import Settings

i. Page Range

You can convert all pages of PDF files, or choose some pages to convert, just input page numbers like this: 1,2,5-10.

ii. Import Quality

There are five levels of "Import Quality":

- 5 - Higher Quality Larger File Size
- 4 - High Quality Large File Size
- 3 - Middle Quality Middle File Size
- 2 - Low Quality Small File Size
- 1 - Lower Quality Smaller File Size

iii. Other Settings

Import bookmark If your PDF file contains bookmarks, check this option to use in output page-flipping eBook

Import links If your PDF file has links, check this to enable in flipbook;

Enable search Check this option to enable search functionality in created flipbook.

Create mobile version You can even output Mobile Version while choosing HTML or ZIP format at the same time. After creating mobile versions, you just need to output all files online (including HTML, SWF, "files" and "mobile" folders), then you can visit the flipbook page through your mobile browser.

II. Folder Settings

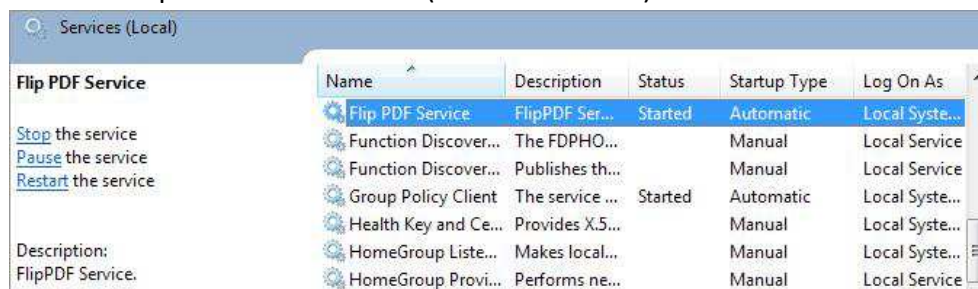

In Flip PDF Service program, you can define different folders to monitor at the same time, with different flip settings, just click "Add Folder" to add the second or more monitor folders.

Or you can edit existing monitor task, remove some task or clear all tasks.

III. Start & Stop Flip PDF Service

In the Settings program, you can click "Start" or "Stop" to start or stop the Service. By default, the installed service will be started automatically when you reboot the computer. You can also start and shutdown the service from the Control Panel using the Services icon. When the service is started, it will create all the processes you defined in the settings one by one. When the service is shutdown, it will terminate each of the processes it created (in reverse order).
