

SRICI Testing Center Application Guidelines

To applicants:

I. <Certification for the Safe Transport of Chemical Goods > & < Certification for Dangerous Properties of Chemical Goods> sample sending notes:

1. Sample amount needed: solid 30~50g; liquid 50~70ml. The client will be informed if additional test is needed (for example: 1kg for self-heating test, 200g for oxidizing properties test, 3.5L sample for metal corrosion test). The name of the goods and Application Company should be indicated on the packaging of the sample. For check requirements, our center will reserve all samples. (If valuable or special samples need to be returned, please note in the remarks column.)

2. Our testing center will not accept the application until the application company guarantees that the sample is the same as the transport goods. The clients should bear the related charge, law responsibilities and other consequences for any non-conformity.

II. <Certification for the Safe Transport of Chemical Goods > & < Certification for Dangerous Properties of Chemical Goods> Application form notes:

1. The exact substance of the goods should be filled in ,instead of single code, type or specification code, and etc.

2. For battery products (or containing batteries), the name of the goods should be filled in with its type (for example: Zinc-Manganese battery, Nickel-hydrogen battery, Nickel-Cadmium battery, Lead-acid battery, lithium battery and etc.) and the model of the batteries.

3. For organic pigment (except propylene pigment for painting use) , applicants should provide the commodity name of the dye. For organic dye, applicants should provide the commodity name and its intensity.

4. Please provide the actual manufactory and the application agency of the goods. The certification can not be modified after issued.

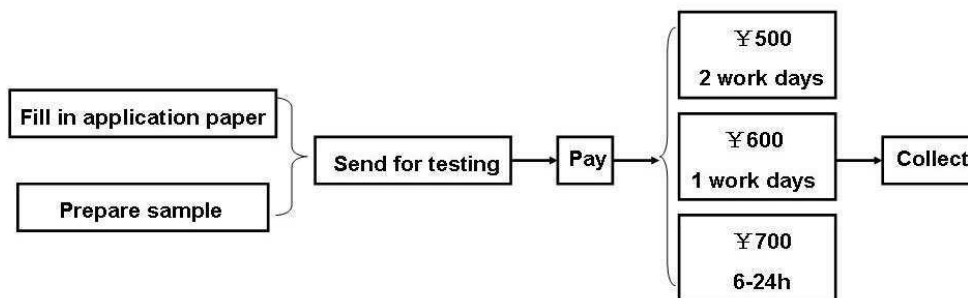

5. If possible, please provide the Material Safety Data Sheet (MSDS) of the sample.

6. The clients should bear the collection delay, certification error and extra charge due to the information none or wrongly provided.

7. For "Certification for the Safe Transport of Chemical Goods", "Transport Mode" in the application form shall be filled in. For none selection, the default selection will be by air and not allowed to change. The clients shall bear the collection delay or certification error and extra charge due to this reason.

III. charge and time needed:

1. Normal application flow:

The collection time will be individually informed if the sample needs extra test through initial determination.

Notes: If the client need our center to take a picture of the battery and dealing with the image, extra ¥100 is needed.

2.To guarantee the appraisal of the related technical data, for those uncertain data or doubtful data (for example, Rat/Mouse oral toxicity data LD50、self-heating substance, and etc..), our center has rights to carry out other tests (extra tests), and the applicants shall bear the related testing charge, Details on our website.

3. Due to the different criterion of the transport mode, each certificate will only display one transport mode. If the same sample for multi-transport modes, the charge is: ¥500 for 1 transport mode (urgent charge not included), ¥800 for 2 transport modes (urgent charge not included), ¥1000 for 3 transport modes (urgent charge not included), ¥1200 for 4 transport modes (urgent charge not included). Collection after 24hours needs ¥100 urgent charge. Collection within 24hours needs ¥200 urgent charge.

IV. <Certification for the Safe Transport of Chemical Goods > & < Certification for Dangerous Properties of Chemical Goods> Valid date and reissue.

1. The certification is valid within the year. Within the valid date, the original certifications of origin date can be reissued by the copy of the original certification with the seal of the application agency, or by collection proxy of the application company (including certification No. & collector & the seal of the application company. ¥100 for each certification. For those reissued certifications, the applicant should guarantee that the transport goods is the same as the origin sample.

2. Mailing the certification: The client shall mark "mailing the certification" in the application remarks, if the client cannot go to our center to take the certification. (Reissuing certification does not provide mailing business). ¥20 for each mailing. The mailing will be 3 work days after the receipt of the mailing application due to the large amount of the mails. Our company cannot afford the loss due to the delay or losing of the mailing because we cannot control the mailing procedure of the express company. We suggest that the clients collect the certification by themselves or ask the express company collect the certification in our center with the collection proxy.

V. Other cautions:

1. Due to the annual renew of the regulations of the dangerous goods transport, the conclusion may be different every year.

2. To prevent the miss or wrong collection of the certifications, the collector shall provide the application receipt of our center or collection proxy of the application company (including certification No. or name of the goods, collector and other necessary information with the seal of the application company) to take the certification (Details on our website) .

3. If for the lithium battery, besides the items above, please pay attention to the bulletin of lithium battery testing information on the website.

4. If for the magnetized material testing, please read the magnetized material testing application cautions and charge carefully.

5. If the applicants cancelled the application during the test, ¥300 testing charge should be paid.

6. The client should send the right sample to our center and pay ¥300 testing charge, if the applicants send the wrong sample or fake sample.

7. For battery products (or products containing battery), electronic file images of samples are needed, specific requirements are as follows:

A. Size requirements: W: L (4:3 or 3:4) clear JPG documents (no more than 8 pictures)

B. The client shall provide the front and rear view photo of the battery (if not clear enough, the enlarged local figure photo must be provided). The front and rear view photo of the equipment is also needed if it is with the battery.

Special conditions:

1. Both front and rear view photos of the batteries are required if the equipment containing two batteries.

2. The client shall provide the logo or literal content with the picture if it is required to be on the picture in the certification.

We suggest merge these pictures into one (3:4 or 4:3) JPG document.

If the provided photographs are not clear, then the commission can not be accepted

Online application is proposed, e-file pictures would be uploaded as attachments during online application. See details on our website.

VI Work time, contact, address and bank account

1. Work time: Monday – Friday (8:30 – 16:30)

2. Contact method:

Contact person: Ms. Sun Dan and Ms. Zhao Jian

Address: Reception Hall, Testing Center, West entrance, 345 East Yunling Road, Shanghai

Postcode: 200062

Traffic: Bus No.551, Get off at SRICI station;

Tel: 021-52802587/52815377-0713/0714/0717/0718

Fax: 021-52815377-0716/0745

Website: www.msds.gov.cn

Email: msds123@gmail.com

3. Bank remittance:

RMB Account:

Name: 上海天科化工检测有限公司

Bank: 中国建设银行上海怒江路支行

Account No.: 31001547840050002326

1. Our Center offers Magnetized Testing business, please contact

021-52815377-1742

2. Our centers offers Product Safety Data Sheet (MSDS) documentation business

MSDS is the passes in the chemical exports and domestic sales

MSDS is a must in international corporate security, occupational health,

environmental science and management requirements

Applied to exports, cargo transportation and the state registration of the

management of dangerous goods

For more information, welcome to contact: 021-52815377-1712 1710 1725
