The	formula for financial response	sibility is as follows:				
	Check the total amount financed of supervised loans in 2012. If you have a single license, this figure is your answer to Question on the Annual Report. If you have multiple locations, these amounts financed are listed for the master and each branch license of Schedule A of the Annual Report. In the event the licensee has engaged in other types of supervised lending and has completed a separate annual report, please use the cumulative totals for each location. Compare this total to the chart below to determine the amount of financial responsibility needed:				and each branch license on ading and has completed a
