

We are proud to offer a series of classes designed to educate landowners on how to live more fully from the land.

The series will provide basic information and production options to possibly make a profit off of the land. It is designed to help first time producers and farmers as well as long time producers.

Upon completion of the series you will have a grasp of which products can be grown for personal use and which can be sold to the public. You will also leave with a greater knowledge of resources available to assist in planning, marketing, and crop production. You will be provided with resources to assist in decision making, and you should gain awareness of where to find additional information and assistance.

Virginia Cooperative Extension

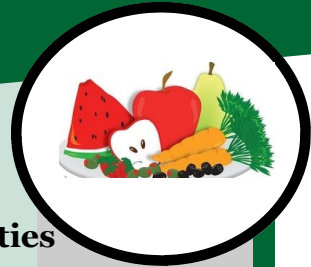

A partnership of Virginia Tech and Virginia State University www.ext.vt.edu
