

# Bison Wind

Bismarck, ND

## Owner

Minnesota Power

## Contractor

Minnesota Power

## Project Team

Project Manager: Bill Thibault

Superintendent: Doug Neumann

Project Assistant: Lea Michaud

## Project Facts

- 4,500 loads of Aggregate
- 15 acres Geotextile fabric

The project consisted of constructing 1-3/4 miles of roadway to county specifications as access to the Bison Wind Farm. The roadway construction included placing 8 inches of class 5 gravel over geotextile fabric, culvert installation and riprap placement. The contract also included site grading and placement of class 5 gravel over geotextile fabric for a 5 acre O&M building site and a 5 acre substation.
