

Continuing Education Modules

AMTIE makes available several subject matter monographs, which can be used to obtain continuing education hours. The modules each consist of a number of STEP articles compiled by specific topic. Each volume includes articles that can generate anywhere between 8-33 CE hours. To earn the credit, simply read each article, complete the short test, and send to AMT for processing. Credits earned are accepted by the state of Florida and the state of California for MT and MLT licensure renewal purposes.
