The Alberta Cancer Foundation is a leader in cancer care and research. Our scientists are making advances at an unmatched pace of discovery and our comprehensive clinical trials program means our patients are among the first to access new therapies years before they become the standard protocol. It means that we can use powerful diagnostic tools to unlock mysteries at the biological and genetic level. And when all other options have been exhausted, we can go one step further and offer hope and innovative treatments. We are defining cancer care.

In Alberta last year, the following estimated cases of cancer were diagnosed:

Prostate - 2,180 Colorectal - 1,705 Endometrium - 375 Bladder - 308 Ovarian - 196 Cervical/Uteri - 144 Testicular - 120

With more than 34% of new cancer cases diagnosed occurring below the waist, your participation is helping us kick statistics like these to the curb!
