The following additional filing submission requirements shall apply:

- (1) The actuarial memorandum submitted with the form shall include the following information:
  - (a) A description of the index or indices used as the basis for the interest credited to the contract, and all elements used in determining the credited rate from an index, including but not limited to, index-linked interest caps, participation rates, index allocations, interest allocations, periods, terms, floors, and margins. Any guarantees or ranges associated with these elements shall be included.
  - (b) An example showing the derivation of the credited rate based on an assumed value of each index and crediting method available under the contract;

Any change to the range filed for a guaranteed element requires a refilling for prior approval and shall be accompanied by a demonstration, if applicable, signed by a member of the American Academy of Actuaries, that the contracts issued within the new range comply with the NAIC Standard Nonforfeiture Law for Individual Deferred Annuities, model #805.
