

Thank you for joining
us...the webinar will
begin shortly

February 3rd -28th

Connecticut SchoolSpeedTest Month

*Using the **SchoolSpeedTest** to Assess Internet
Readiness For Digital Learning*

Thursday, January 23rd

The Digital Learning Opportunity

Enhance Teacher Effectiveness & Productivity

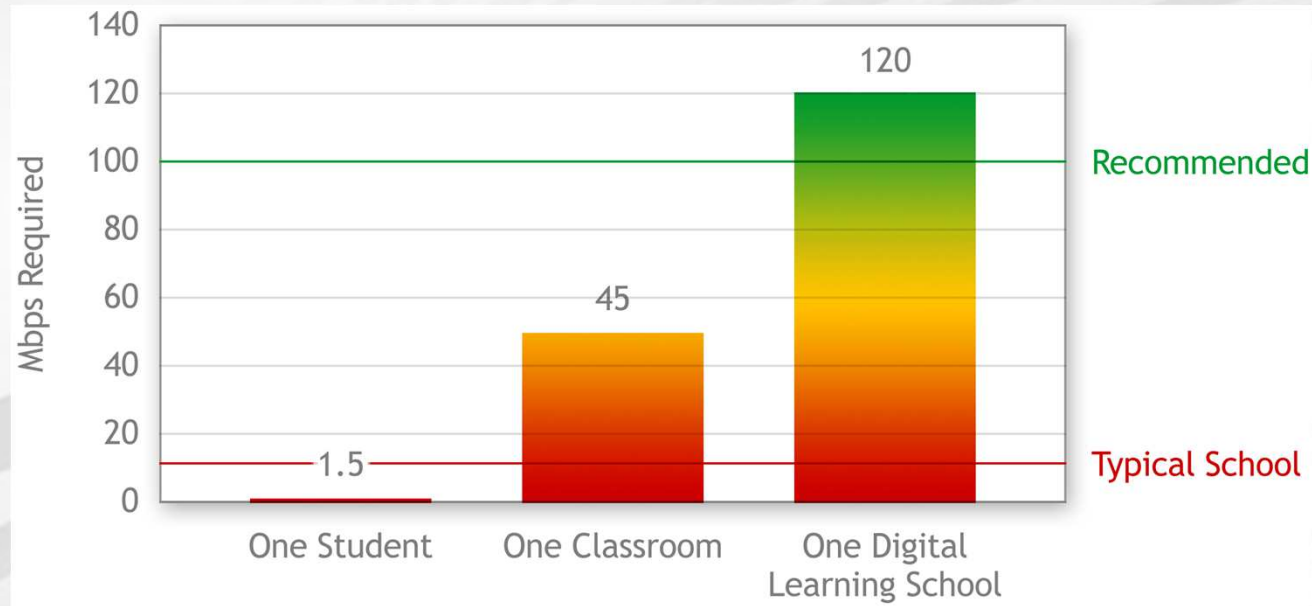

- Potential to differentiate content and personalize learning
- Open up time and space for more 1:1 and small-group teaching
- Reduce administrative time
- Increase opportunities for professional development

Build Equity & Student Engagement

- Bring experts and targeted content into the classroom.
- Enrich collaborative learning.
- Expand learning beyond the classroom.

Digital Learning Demands High Speed Internet

Bandwidth For Streaming Video

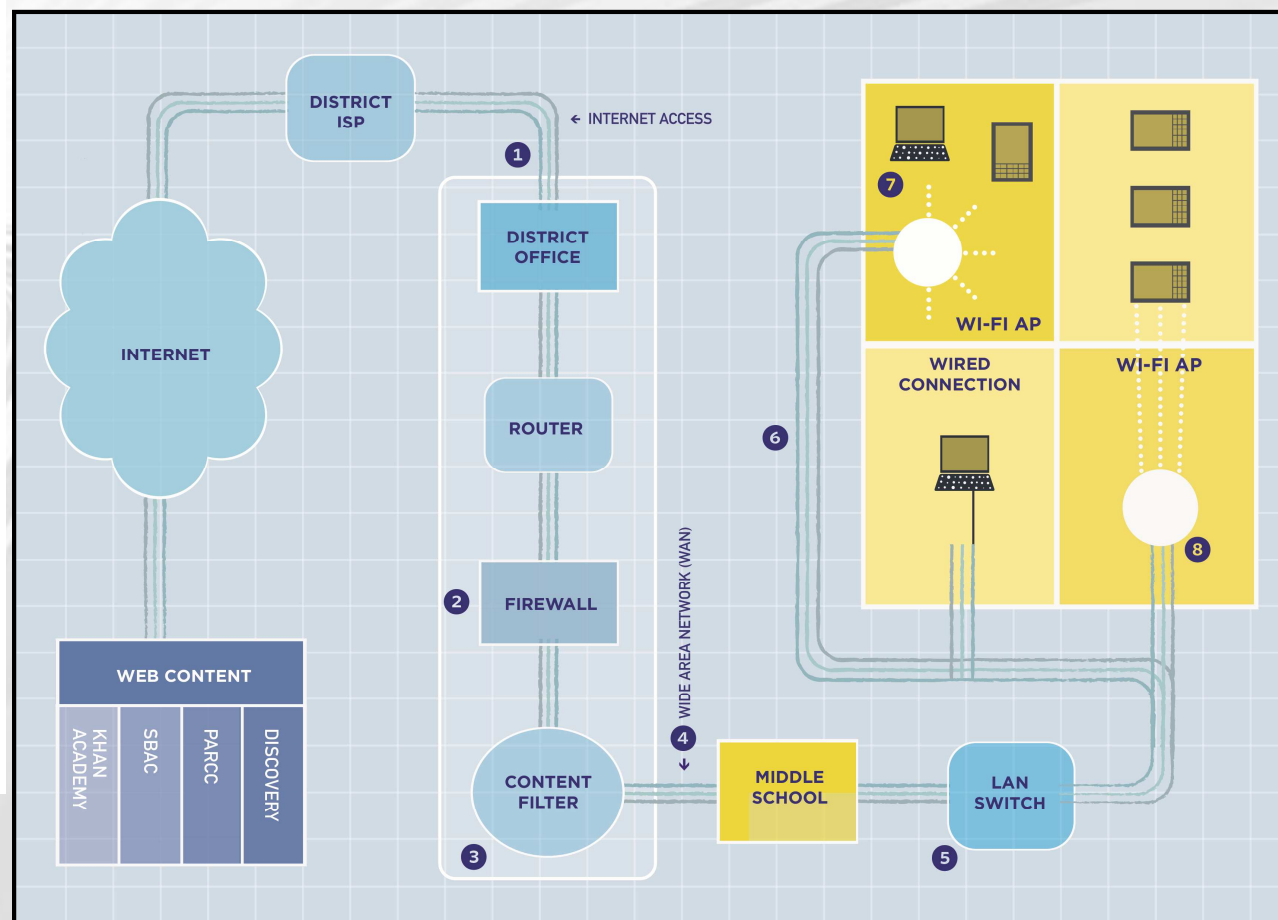

| Assessment | Recommendation |
|--|------------------------------|
| State Education Technology Directors Association (SETDA) | 100 kbps/student recommended |

Typical School has 10-15 Mbps

How Much Bandwidth Can You Count On?

Policy makers have little information on bandwidth available *in the classroom*, because available speed-to-device varies with:

1. *ISP Connection Size*
2. *Firewalls*
3. *Content Filters*
4. *WAN Connectivity*
5. *Local Area Network*
6. *Wiring*
7. *Wi-Fi Network*
8. *Current Usage*

Need for Performance Data

We need **performance data on Internet connectivity** speeds in the classroom to meet these basics for learning today.

- Deploy **online tools that run reliably** at school
- Demonstrate need and build priorities for **upgrades**
- Prepare schools for **2014-2015 online assessments**

Connecticut SchoolSpeedTest Month

Test Dates: **February 3rd-28th**

Our Goal

Measure connectivity speed at every K-12 school in Connecticut.

Create an apple-to-apples state wide inventory of Internet connections for planning + advocacy.

Test Your School In Less Than a Minute

Anyone connected to school's wired/Wi-Fi network can run the test.

- Teachers, students, tech coordinators, classified staff

Goal: Get 10 staff members to take 1 minute to run the test

- Run at least 10 tests at every school site
- Test at different times of the day and days of the week.
- Results will vary depending on network activity
- More tests = more accurate measure of available Internet

Testing a School: Step 1

Go to <http://partners.schoolspeedtest.org/connecticut.html>

Enter the zip code or city/state of your school.

TEST MY SCHOOL

School ZIP Code **OR** School City State

Find Schools

Test your school in four easy steps:

1. Enter the ZIP code or city & state your school is in and press Find Schools
2. Select your school by typing the first few letters of your school name. If you don't see your school in the list, check to be sure you entered the correct location information or press New School to enter the name of your school.
3. Confirm that you are at school and connected to your school's network so we know you are testing the speed of your school's Internet access.
4. Select your role, enter your e-mail address (optional) and press Start Test.

In less than a minute you'll know the speed of your school's Internet access!

Testing a School: Step 2

Select your school from the drop down list, then confirm you are on the school network.

TEST MY SCHOOL

School ZIP Code **OR** School City State

Find Schools

School Name Type or Select

New School

Are you at school? Yes No Location/Room?

Are you connected to your school network? Yes No

Your Role Your Email Address

Start Test

SchoolSpeedTest Operation

- Operates over HTTP (any browser capable device)
- Tests ping (latency), upload/s, filtering on specific sites, device support for Java and Flash
- Collects the tester's IP address, OS, and browser type
- Validates tester's U.S. location
- Checks JavaScript and Flash—enabled or not

SchoolSpeedTest Operation

1. Transfer test runs in the background—downloads small binary files that estimate the connection speed.
2. Based on this data, the browser-based test engine determines which file size to use for the test and selects one that can download in 15 seconds. Stores the files in multiple locations.
3. JavaScript running in the browser downloads these files.
4. Test engine records the download time. Test engine calculates download speed.
5. Upload speed test launches and sends the data through an http post.
6. Test engine pings specific sites, and tests the user's browser for Java and Flash support.

SchoolSpeedTest Reporting

The Data

- Upload and download speed of your school Internet connection in the classroom at different times during the school day
- Browser type and operating system each tester used

Results

Testers: upload & download speeds

District: online access to raw data and graphs of tests

State: raw data + graphs of tests in state; state summary

Results & Reports

Tester Gets First Results

Tester gets immediate feedback: upload/download speed

Reports Aggregate District, State, & National Data

- All test data records to the EducationSuperHighway database.
- Reports and raw data detail *available bandwidth* — maximum, minimum and average — during school hours
- ESH analyzes the data to produce state and national reporting

To View Your District Data Online

Go to:

<http://www.schoolspeedtest.org/stats/district.html>

1. Select **Connecticut**
2. Select your **District name**
3. Enter this password – **haifiduk**

Online Reporting

The screenshot shows a web browser window with the URL `schoolspeedtest.org/stats/districtdetail.php`. The page title is "Detailed results for NEW BRITAIN SCHOOL DISTRICT". Below the title is a button labeled "Download District CSV". A table displays the following data:

| School Name | Number of Tests |
|--|-----------------|
| NEW BRITAIN SCHOOL DISTRICT | 1 |
| ALTERNATIVE CENTER SCHOOL | 0 |
| CHAMBERLAIN SCHOOL | 0 |
| CLIMB | 0 |
| DILORETO MAGNET SCHOOL | 0 |
| GAFNEY SCHOOL | 0 |
| HOLMES SCHOOL | 0 |
| HOUSE OF ARTS LETTERS AND SCIENCE (HALS) ACADEMY | 0 |
| JEFFERSON SCHOOL | 0 |
| LINCOLN SCHOOL | 1 |
| NEW BRITAIN HIGH SCHOOL | 0 |
| NEW BRITAIN TRANSITION CENTER | 0 |
| NORTHEND SCHOOL | 0 |
| PULASKI MIDDLE SCHOOL | 0 |
| ROOSEVELT MIDDLE SCHOOL | 0 |
| SLADE MIDDLE SCHOOL | 1 |
| SMALLEY ACADEMY | 0 |
| SMITH SCHOOL | 0 |
| VANCE SCHOOL | 0 |

Online Reporting

The screenshot shows a web browser window with the address bar containing the URL: www.schoolspeedtest.org/stats/schooldetail.php?school=90267000515&access_login=CT&datepicker=. The browser's bookmark bar includes folders for 'Apps', 'ESH', 'Hobbies', 'SST', 'ESH News', 'News', 'Fun', 'Fin', 'NECA & USAC Data', 'My Drive - Google D...', 'Volunteer, work, int...', and 'Social Change Anyti...'. The main content area displays the title 'Detailed of results for LINCOLN SCHOOL (90267000515)' and a table of test results.

| IP Address | on net | at school | Location | date/time | browser | OS | Download | Upload | Burst | Ping min | Ping max |
|-------------|--------|-----------|----------|----------------------|-------------------|------------|----------|--------|-------|----------|----------|
| 72.10.98.15 | yes | yes | 004 | 10/31/2012 15:38 GMT | IE 8.0/Windows XP | Windows XP | 10.79 | 20.55 | 27.08 | 0.109 | 0.188 |

Online Reporting

How to Use Your Data

- **Compare your SchoolSpeedTest results** to expected device speeds to identify bottlenecks.
- **Make the case for more investment** in broadband and network infrastructure in your district and across Connecticut.

Connecticut SchoolSpeedTest

How to Get Ready:

- Whitelist www.SchoolSpeedTest.org in your content filter
- Talk to other district leaders about the Connecticut SchoolSpeedTest
- Forward launch emails and follow up with school leaders to get the best testing data for your district
