Mesa Public Schools

Jane Chambers
Sierra Vista Public Schools

GeoLiteracy is a program of eighty-five K-8 lessons from the Arizona Geographic Alliance which integrate the Arizona geography standard with Arizona 's reading and writing standards. Each lesson contains assessment instruments that help students practice skills measured by state-mandated reading and writing examinations. These lessons have been used successfully in Arizona schools since 2002, and the program has been nationally recognized by the George F. Cram Company and the National Council for the Social Studies. In this day-long workshop, you will participate in break-out sessions for your grade level. The highly trained and energetic presenters will use hands-on activities to demonstrate lessons that may be used the next day. **Each participant receives a CD of all 85 lessons!** Also includes certificate for recertification training hours.
