Goods and/or Services to be purchased:

The Salt Lake City School District is seeking the purchase of a mobile digital video recording system for its 49 buses. Each bus will be equipped with two cameras: The front one must have the capability to provide three views: the door, the driver and immediate front area of the bus. The rear camera will provide a general view of the back half of the bus. The following features are required: see attached specifications:

Also provide the following information:

1. Cost to install the product in the 49 buses by a dealer certified installer:
2. Three references from School Districts comparable in size and in Utah or near by States.
3. How will problems with system be resolved?
4. What is the cost of software upgrades and how frequently does this happen:
5. What are the warranties of the system?
6. Is the system supportable by a local dealer? If so, list their information.
7. Is System Training provided and what is the cost?

The below specifications are based upon the school bus video security management system by 247 Security Inc. model 400 series. Equivalent or better product systems will be considered.

If you have any questions, call 578-8264. If you have an equivalent product call prior to bidding to verify that the item is acceptable to the end user.

Product evaluations will be based upon features, dependability, ease of use, references and cost.

We agree to furnish the services or products as indicated above to the Salt Lake City School District per their instructions and specifications.

PREFERRED SYSTEM SPECIFICATIONS

- Footprint not to exceed 10X10X4 inches. System should be able to be installed at any angle, in an easily accessible place.
- System status must be displayed using LED lights and these LED's must be visible to the driver
- Removable hard drive minimum 60GB. Hard drive must be a USB device. Video review to be accomplished with a PC and supplied software.
- System must have event marking capability.
- System must be equipped with a USB memory stick process to quickly remove marked events from the on-board system
- Video must be able to be secured from tampering.
- Cameras to be Infrared
- System to include two cameras, recording on individual channels, both with independent audio.
- Each camera will record up to 30 FPS
- Mpeg4 compression will be used
- Working temperature: extremes from -10 degrees F to +160 degrees F

Please identify exceptions to the above, if any, in your bid submission.
