

Dear Cooperators and Friends,

Since 1942, the St. John Valley Soil and Water Conservation District has assisted local land users, landowners, and other interested individuals and agencies with a variety of conservation programs and services. Our partnerships with U.S. Department of Agriculture personnel and other affiliates have allowed us to provide a consistent level of assistance and educational opportunities throughout the Valley.

District staff, directed by the local Board of Supervisors, has in the past provided technical assistance and educational opportunities in many areas including: agricultural sustainability, water quality, forest management, livestock production, and natural resource conservation. The District would like to continue to provide such conservation services throughout the Valley.

We are all aware of these difficult economic times which include continuing budget cuts at the local, state, and federal level. Therefore, we are even more appreciative of the support of our local cooperators. This support enables us to continue our high level of service for the benefit of all. Your tax-deductible contribution makes it possible for us to carry out our mission to, *“Provide local land users, landowners, and other interested individuals and agencies with the information, education and technical assistance needed to protect, enhance, and develop the wise use of Maine’s natural resources.”*

We would like to thank you in advance.

Sincerely,

*Sigrid Houlette*

Sigrid Houlette, District Coordinator  
St. John Valley SWCD
