(It should be noted that slow response could occur if the BSS system does not have sufficient capacity to handle high AMS/3 market data broadcast rate of price updates that could reach 1,000 stock page updates per second during the peak of the Volume Test. BSS users should also be prepared to submit associated OG logs to HKEx to facilitate diagnosis of the reported problem.)

4. Did you encounter any error or problem for trading activities (e.g. order/trade input, securities enquiry, etc.) conducted outside the two Volume Test Sessions?
 No. Yes, please specify : _____
