

# CHAPTER 4

## Completion of the Accounting Cycle

### ASSIGNMENT CLASSIFICATION TABLE

<u>Study Objectives</u>	<u>Questions</u>	<u>Brief Exercises</u>	<u>Exercises</u>	<u>Problems Set A</u>	<u>Problems Set B</u>
1. Prepare closing entries and a post-closing trial balance.	1, 2, 3, 4, 5, 6	1, 2, 3	1, 2, 3, *11	1, 2, 3, *9	1, 2, 3, *9
2. List the steps in the accounting cycle.	7, 8	4,			
3. Prepare correcting entries.	9	5	4	4, 5	4, 5
4. Prepare a classified balance sheet.	10, 11, 12, 13, 14	6, 7	5, 6, 7	2, 3, 6, *9	2, 3, 6, *9
5. Illustrate measures used to evaluate liquidity.	15, 16	8, 9	7, 8	6, 7	6, 7
*6. Prepare a work sheet (Appendix 4A).	*17, *18	*10, *11, *12	*9, *10	*8, *9, *10	*8, *9, *10
*7. Prepare reversing entries (Appendix 4B).	*19, *20	*13, *14	*11, *12	*11, *12	*11, *12

\*Note: All asterisked Questions, Exercises, and Problems relate to material contained in the Appendix to each chapter.

## ASSIGNMENT CHARACTERISTICS TABLE

<u>Problem Number</u>	<u>Description</u>	<u>Difficulty Level</u>	<u>Time Allotted (min.)</u>
1A	Analyze account data and prepare and post closing entries.	Moderate	15-25
2A	Prepare adjusting entries, adjusted trial balance, financial statements, and closing entries.	Simple	60-70
3A	Prepare financial statements, closing entries, and post-closing trial balance.	Simple	70-80
4A	Analyze errors and prepare corrections.	Simple	70-80
5A	Determine impact of errors on financial statements.	Moderate	40-50
6A	Prepare financial statements and liquidity ratios.	Moderate	30-40
7A	Calculate working capital and current ratio and comment on liquidity.	Moderate	25-30
*8A	Prepare work sheet.	Moderate	50-60
*9A	Prepare work sheet, classified balance sheet, adjusting and closing entries, and post-closing trial balance.	Moderate	70-80
*10A	Use work sheet relationships to determine missing amounts.	Moderate	70-80
*11A	Prepare and post transaction entries, with and without reversing entries.	Moderate	50-60
*12A	Prepare adjusting, reversing and subsequent cash entries.	Simple	40-50
1B	Analyze account data and prepare and post closing entries.	Moderate	15-25
2B	Prepare adjusting entries, adjusted trial balance, financial statements, and closing entries.	Simple	60-70
3B	Prepare financial statements, closing entries, and post-closing trial balance.	Simple	70-80
4B	Analyze errors and prepare corrections.	Simple	70-80
5B	Determine impact of errors on financial statements.	Moderate	40-50

## ANSWERS TO QUESTIONS

1. Closing entries are made at the end of an accounting period after preparation of the financial statements to:
  - a. transfer revenue, expense, and drawings account balances to the owner's capital account and
  - b. reset these temporary accounts to zero.
  
2.
  - (1) To close revenue accounts (assuming normal balances): Debit Individual revenue accounts and credit Income Summary.
  - (2) To close expense accounts (assuming normal balances): Debit Income Summary and credit individual expense accounts.
  - (3) To close Income Summary: If the Income summary has a credit balance, debit Income Summary for the balance in its account and credit Owner's Capital. If the Income Summary has a debit balance, credit Income Summary and debit Owner's Capital for the balance in the account.
  - (4) To close Drawings: Debit Owner's Capital and credit Owner's Drawings.
  
3. The Income Summary account is used to avoid having a lot of detailed entries on the permanent owner's capital account. The types of summary data that are posted to this account are the totals of revenue and expense accounts. If an Income Summary account was not used the owner's capital account would be credited when closing the individual revenue accounts and it would be debited when closing the individual expense accounts.
  
4. The drawings account is not closed with the expense accounts because it is not part of net income. Drawings represent a withdrawal of the owner's capital and are reported on the statement of owner's equity, not the income statement. However, it is also a temporary account and therefore requires a closing entry.
  
5. The balance in Income Summary, immediately before the final closing entry to transfer the balance to the owner's capital account, should equal the net income (or net loss) reported in the income statement. (2) All temporary accounts (revenues, expenses, owner's drawings, and Income Summary) should have zero balances. (3) The balance in the capital account should equal the ending balance reported in the statement of owner's equity and balance sheet.
  
6. The post-closing trial balance contains only balance sheet accounts. Its purpose is to prove the equality of the permanent account balances that are carried forward into the next accounting period.

**QUESTIONS (Continued)**

7.
  1. Daily: Analyze transaction and journalize transactions.
  2. Periodic: Post to ledger, prepare a trial balance, journalize and post adjusting entries, prepare an adjusted trial balance, prepare financial statements.
  3. Fiscal year end: Journalize and post closing entries, prepare a post closing trial balance.
8. Yes. The work sheet is a convenient and efficient tool for completing some of the steps (step 4 trial balance, 5 adjusting entries, 6 adjusted trial balance, and 7 financial statements) in the accounting cycle.
9. Correcting entries differ from adjusting entries because they (1) are not a required part of the accounting cycle if no errors have been made, (2) may be made at any time, and (3) may affect any combination of accounts. Adjusting entries are a necessary part of the account cycle, are normally made prior to the preparation of financial statements, and affect both an income statement account and a balance sheet account.
10. Classifying the assets and liabilities on the balance sheet provides users with more information. The classification provides the amount of assets and liabilities that will be realized and that come due in the coming year. This enables users to evaluate the company's liquidity and solvency. It also provides information on long-term assets and liabilities.
11. Current assets are cash and other resources that are reasonably expected to be realized in cash or sold or consumed in the business within one year of the balance sheet. Current assets are listed in the order of their liquidity.
12. Long-term investments are assets that can be realized in cash; however, the conversion is not expected within one year. They include shares and bonds of other companies. Both property, plant, and equipment, and intangible assets are resources that are used in the business and not intended for resale. The difference between the two is property, plant, and equipment have physical substance while intangibles do not.

**QUESTIONS (Continued)**

13. The major differences between current liabilities and long-term liabilities are:

<u>Difference</u>	<u>Current Liabilities</u>	<u>Long-term Liabilities</u>
Source of payment.	Existing current assets or other current liabilities.	Other than existing current assets or creating current liabilities.
Time of expected payment	Within one year.	Beyond one year.
Nature of items.	Debts pertaining to the operating cycle and other short-term debts.	Mortgages, bonds and other long-term liabilities.

14. (a) The owner's equity section for a  
 (1) proprietorship is called owner's equity  
 (2) partnership is called partners' equity  
 (3) corporation is called shareholders' equity  
 (4) income trust is called unitholders' equity.
- (b) The two accounts and the purpose of each are: (1) Common Shares (or share capital) is used to record investments in the business by the owners (shareholders). (2) Retained Earnings is used to record income retained in the business (that is, the net income earned minus any dividends distributed to the owners).
15. Liquidity is the ability of a company to pay its obligations that become due within the next year. One measure of liquidity is working capital, another is the current ratio.
16. Ratios should never be interpreted without considering certain factors: (1) general economic and industry conditions need to be considered; (2) other specific financial information about the company over time needs to be considered, and (3) the ratios should be compared to the ratios for other companies in the same or related industries.

**QUESTIONS (Continued)**

- \*17. To calculate the net income on a worksheet each of the financial statement columns must be totalled. The net income or loss for the period is then found by calculating the difference between the totals of the two income statement columns. If a company has net income the amount is then entered in the income statement debit column and the balance sheet credit column. If the company has a net loss the amount is entered in the credit column on the income statement and in the debit column on the balance sheet.
- \*18. It is still necessary to journalize and post adjusting entries that have been made on the worksheet because the worksheet is not part of the company's permanent accounting records. The general ledger and journal must contain all of the adjusting data. If this were not done the balance for the start of the next year would be incorrect.
- \*19. A reversing entry is the exact opposite, both in amount and in account titles, of an adjusting entry for an accrual. Adjusting entries are required, while reversing entries are an optional step in the accounting cycle. In some accounting systems, they simplify the recording of subsequent transactions related to the adjustments.
- \*20. It is helpful to use reversing entries for accruals because then the payment can be processed in the normal manner without having to check if there has been an accrual, i.e. all cash payments can be debited to the appropriate expense account. Reversing prepayments would not simplify the recording of subsequent transactions, which are required in prepayments. In addition, it is not appropriate to reverse estimates such as amortization.

## **SOLUTIONS TO BRIEF EXERCISES**

### **BRIEF EXERCISE 4-1**

**The permanent accounts are:**

- Accounts payable**
- Accounts receivable**
- Income taxes payable**
- Long-term debt**
- Prepaid expenses**
- Property, plant and equipment**
- Short-term investments**

**Note that these are all balance sheet accounts.**

**The temporary accounts are:**

- Amortization expense**
- General and operating expenses**
- Interest on long-term debt expense**
- Other revenues**

**Note that these are all income statement accounts.**

**BRIEF EXERCISE 4-2****(a)**

<b>Oct</b>	<b>31</b>	<b>Golf Fees Earned.....</b>	<b>160,000</b>

**BRIEF EXERCISE 4-3**

**MOSQUERA GOLF CLUB**  
**Post-Closing Trial Balance**  
**October 31, 2008**

---

	<u>Debit</u>	<u>Credit</u>
Cash .....	\$ 8,500	
Prepaid expenses.....	3,000	
Equipment.....	85,000	
Accumulated amortization—equipment .....		\$17,000
Accounts payable.....		12,000
Unearned golf fees .....		1,500
N. Mosquera, capital .....		66,000
	<u>\$96,500</u>	<u>\$96,500</u>

**BRIEF EXERCISE 4-4**

The proper sequencing of the required steps in the accounting cycle is as follows:

1. Analyze business transactions
2. Journalize the transactions
3. Post to the ledger accounts
4. Prepare a trial balance
5. Journalize and post the adjusting entries
6. Prepare an adjusted trial balance
7. Prepare the financial statements
8. Journalize and post the closing entries
9. Prepare a post-closing trial balance

Filling in the blanks, the answers are 9, 6, 1, 4, 2, 8, 7, 5, 3.

**BRIEF EXERCISE 4-5**

(a)	<u>Assets</u>	<u>Liabilities</u>	<u>Owner's Equity</u>	<u>Revenue</u>	<u>Expenses</u>	<u>Net Income</u>
1.	U	NA	U	U	NA	U
2.	U	U	NA	NA	NA	NA

(b)

1.	Cash .....	880	
	Service Revenue .....		880
2.	Office Supplies .....	1,850	
	Accounts Payable .....		270
	Equipment .....		1,580

**BRIEF EXERCISE 4-6**

- |  |   |
|--|---|
| 1 (a) Supplies                         | 5 (g) Unearned Revenue                      |
| 5 (b) Accounts Payable                 | 1 (h) Accounts Receivable                   |
| 3 (c) Building                         | 3 (i) Accumulated Amortization—<br>Building |
| 1 (d) Prepaid Insurance                | 4 (j) Patents                               |
| 6 (e) Note Payable<br>(due in 5 years) | 2 (k) Land Held for Resale                  |
| 4 (f) Goodwill                         | 2 (l) Note Receivable<br>(due in 3 years)   |

**BRIEF EXERCISE 4-7**

**Reuben Company**  
**Balance Sheet (Partial)**  
**December 31, 2008**

**Current assets**

---

<b>Cash.....</b>	<b>\$ 18,400</b>
<b>Short-term investments .....</b>	<b>8,200</b>
<b>Accounts receivable .....</b>	<b>12,500</b>
<b>Supplies .....</b>	<b>5,200</b>
<b>Prepaid insurance.....</b>	<b><u>3,900</u></b>
<b>Total current assets .....</b>	<b><u>\$48,200</u></b>

## **BRIEF EXERCISE 4-8**

**(\$ in thousands)**

**Working capital = Current assets - Current liabilities**

**2008: Working capital = \$165,211 – \$136,742 = \$28,469**

**2007: Working capital = \$190,548 – \$72,410 = \$118,138**

**Current ratio = Current assets ÷ Current liabilities**

**2008: Current ratio = \$165,211 ÷ \$136,742 = 1.21:1**

**2007: Current ratio = \$190,548 ÷ \$72,410 = 2.63:1**

**Cool Delight's liquidity was weaker in 2008. Working capital decreased in amount, and the current ratio decreased from 2.63:1 to 1.21:1.**

## **BRIEF EXERCISE 4-9**

**Working capital = Current assets - Current liabilities**

**Big: Working capital = \$1,000,000 - \$900,000 = \$100,000**

**Small: Working capital = \$200,000 - \$100,000 = \$100,000**

**Current ratio = Current assets ÷ Current liabilities**

**Big: Current ratio = \$1,000,000 ÷ \$900,000 = 1.11:1**

**Small: Current ratio = \$200,000 ÷ \$100,000 = 2.00:1**

**The working capital is the same for both companies but Small Company's current ratio is much stronger. The current ratio is more relevant.**

**\*BRIEF EXERCISE 4-10**

Net loss		<u>6,050</u>	<u>6,050</u>	
Totals	<u>35,800</u>	<u>35,800</u>	<u>62,200</u>	<u>62,200</u>

**\*BRIEF EXERCISE 4-13****(a)**

<b>Nov. 1</b>	<b>Salaries Payable .....</b>	<b>1,200</b>	
	<b>Salaries Expense. ....</b>		<b>1,200</b>
	<b>To reverse Oct. 31 accrual.</b>		

<b>4</b>	<b>Salaries Expense .....</b>	<b>2,000</b>	
	<b>Cash. ....</b>		<b>2,000</b>
	<b>To record Nov. 4 payment of salary.</b>		

**(b)**

<b>Salaries Expense</b>					
<b>Date</b>	<b>Explanation</b>	<b>Ref.</b>	<b>Debit</b>	<b>Credit</b>	<b>Balance</b>
<b>Oct 31</b>	<b>Balance after closing entries</b>				<b>0</b>
<b>Nov. 1</b>	<b>Reversing entry</b>			<b>1,200</b>	<b>(1,200)</b>
<b>4</b>	<b>Payment of salary</b>		<b>2,000</b>		<b>800</b>

<b>Salaries Payable</b>					
<b>Date</b>	<b>Explanation</b>	<b>Ref.</b>	<b>Debit</b>	<b>Credit</b>	<b>Balance</b>
<b>Oct. 31</b>	<b>Balance</b>				<b>1,200</b>
<b>Nov. 1</b>	<b>Reversing entry</b>		<b>1,200</b>		<b>0</b>

**The balances after posting the two entries are a debit of \$800 in Salaries Expense and \$0 in Salaries Payable.**

**\*BRIEF EXERCISE 4-14**

- (a) Jan. 1 Interest Revenue ..... 4,500  
                     Interest Receivable ..... 4,500  
                     To record reversing entry.
- 10 Cash ..... 5,000  
                             Interest Revenue ..... 5,000  
                             To record interest received.
- (b) Jan. 10 Cash ..... 5,000  
                     Interest Revenue ..... 500  
                     Interest Receivable ..... 4,500  
                     To record interest received  
                     and reversal of accrual.

- (c) The balance in the accounts will be the same under both approaches.

The interest receivable account will have a zero balance and the interest revenue will have a credit balance of \$500.

Under (a) Because of the January 1 reversing entry that debited Interest Revenue for \$4,500, Interest Revenue will have a credit balance of \$500, which equals the revenue for the current period. Under (b) the interest revenue will be the \$500 credited in the journal entry.

## SOLUTIONS TO EXERCISES

### EXERCISE 4-1

(a)	June 30	Service Revenue .....	16,100	
		Income Summary .....		16,100
	30	Income Summary .....	14,100	
		Salaries Expense .....		9,800
		Supplies Expense .....		1,300
		Rent Expense .....		3,000
	30	Income Summary .....	2,000	
		J. Roth, Capital .....		2,000
	30	J. Roth, Capital .....	2,500	
		J. Roth, Drawings .....		2,500

- (b) The ending balance in J. Roth's Capital account should agree with the capital account balance on the Statement of Owner's Equity and the Balance Sheet.

<b>Total liabilities and owner's equity .....</b>			<b><u>\$223,980</u></b>

## EXERCISE 4-7 (Continued)

- (b) **Working capital = Current Assets – Current Liabilities**  
**\$8,550 = \$37,150 - \$28,600**

**Current Ratio = Current Assets ÷ Current Liabilities**  
**1.30:1 = \$37,150 ÷ \$28,600.**

**Almost 50% of current assets are in the form of cash. The company's liquidity appears to be reasonably good.**

## EXERCISE 4-8

- (a) **Working Capital = Current Assets - Current Liabilities**

**2005: \$17,192,000 - \$4,639,000 = \$12,553,000**  
**2004: \$20,842,000 - \$4,996,000 = \$15,846,000**  
**2003: \$42,523,000 - \$7,132,000 = \$35,391,000**

**Current Ratio = Current Assets ÷ Current Liabilities**

**2005: \$17,192,000 ÷ \$4,639,000 = 3.71:1**  
**2004: \$20,842,000 ÷ \$4,996,000 = 4.17:1**  
**2003: \$42,523,000 ÷ \$7,132,000 = 5.96:1**

- (b) **Based on the both working capital and the current ratios Theratechnologies' liquidity in 2005 is below that of 2004 and 2003, with 2003 being the best year. However, it is still a very positive ratio, with sufficient current assets to cover current liabilities.**

**\*EXERCISE 4-9**

Dec. 31	Closing entry			96,400	96,400
31	Closing entry		9,300		87,100
31	Closing entry		87,100		0

**\*EXERCISE 4-11 (Continued)****(a), (b), and (c) (Continued)****Commission Revenue**

<b>Date</b>	<b>Explanation</b>	<b>Ref.</b>	<b>Debit</b>	<b>Credit</b>	<b>Balance</b>
<b>Dec. 31</b>	<b>Unadjusted balance</b>				<b>92,000</b>
<b>31</b>	<b>Adjusting entry</b>			<b>4,400</b>	<b>96,400</b>
<b>31</b>	<b>Closing entry</b>		<b>96,400</b>		<b>0</b>
<b>Jan. 1</b>	<b>Reversing entry</b>		<b>4,400</b>		<b>4,400Dr.</b>
<b>10</b>				<b>6,000</b>	<b>1,600</b>

**Interest Expense**

<b>Date</b>	<b>Explanation</b>	<b>Ref.</b>	<b>Debit</b>	<b>Credit</b>	<b>Balance</b>
<b>Dec. 31</b>	<b>Unadjusted balance</b>				<b>7,750</b>
<b>31</b>	<b>Adjusting entry</b>		<b>1,550</b>		<b>9,300</b>
<b>31</b>	<b>Closing entry</b>			<b>9,300</b>	<b>0</b>
<b>Jan. 1</b>	<b>Reversing entry</b>			<b>1,550</b>	<b>1,550Cr.</b>
<b>31</b>			<b>2,235</b>		<b>685</b>

**\*EXERCISE 4-12**

(a) It would be useful to prepare reversing entries for adjustment 1, 4, and 6.

(b)

(1)	May	1	Property Management Revenue..	600	
			Accounts Receivable .....		600

(4)	May	1	Interest payable.....	545	
			Interest expense .....		545

(6)	May	1	Property Tax Payable.....	3,912	
			Property Tax Expense.....		3,912

(c) Reversing entries are useful for these adjustments because it simplifies the recording of future transactions. The entire later payment can be debited to the expense account and credited to the revenue account. You will not have to remember what has gone before. The use of reversing entries does not change the amounts reported in the financial statements. It simply makes it easier to record future transactions.

## SOLUTIONS TO PROBLEMS

<b>PROBLEM 4-5A</b>
---------------------

(a)

	Income Statement			Balance Sheet		
Item	Revenue	Expenses	Net Income	Assets	Liabilities	Owner's Equity
1.	NE	O \$700	U \$ 700	U \$700	NE	U \$700
2.	NE	NE	NE	O \$600	O \$600	NE
3.	O \$350	NE	O \$350	O \$350	NE	O \$350
4.	NE	O \$270	U \$270	U \$270	NE	U \$270
5.	U \$80	NE	U \$80	U\$80	NE	U \$80
6.	U \$750	U \$750	NE	NE	NE	NE
7.	NE	NE	NE	U \$500	U \$500	NE
8.	O \$300	NE	O \$300	NE	U \$300	O \$300
9.	NE	O\$950	U\$950	NE	NE	NE
(b) Total	U \$180	O\$1,170	U\$1,350	U \$600	U \$200	U \$400

Note that the accounting equations stay in balance, in the total row. Revenues (U\$180) – Expenses (O\$1,170) = Net Income (U\$1,350). Assets (U \$600) = Liabilities (U\$200) + Owner's Equity (U\$400). The difference in net income (U \$ 1,350) and the owner's equity (U \$400) is item 9 which does result in an understatement of income but no net effect on owner's equity.

P. Cormier, capital .....	<u>48,500</u>
<b>Total liabilities and owner's equity .....</b>	<b><u>\$78,800</u></b>

**PROBLEM 4-6B (Continued)****(b)**

	<b>2008</b>	<b>2007</b>
<b>Working Capital</b>	<b>\$23,300 - \$16,300 = \$7,000</b>	<b>\$17,400 - \$22,300 = (\$4,900)</b>
<b>Current Ratio</b>	<b>\$23,300 ÷ \$16,300 = 1.43:1</b>	<b>\$17,400 ÷ \$22,300 = 0.78:1</b>

The working capital and current ratios both show an improvement in 2008 over 2007. In 2007, the working capital was negative and the current ratio less than 1, indicating that the company did not have sufficient current assets to cover current liabilities. In 2008, the company had a positive working capital amount of \$7,000 and a current ratio of greater than 1. Cormier Company's liquidity has improved.

<b>PROBLEM 4-7B</b>
---------------------

(a)

	2005	2004	2003
<b>Working Capital</b>	\$97,998 - \$71,887 = \$26,111	\$90,574 - \$60,823 = \$29,751	\$73,118 - \$55,512 = \$17,606
<b>Current Ratio</b>	\$97,998 ÷ \$71,887 = 1.36:1	\$90,574 ÷ \$60,823 = 1.49:1	\$73,118 ÷ \$55,512 = 1.32:1

(b) Working capital is positive for all years and the current ratios are all greater than 1, which indicates the company can meet its currently maturing obligations. There was a decline in both ratios from 2004 to 2005; indicating a weakening in the company's liquidity from 2004 to 2005. However, both the working capital and the current ratio increased from 2003 to 2004, and the 2005 amounts are still both better than 2003.

- (c) All of the account balances in (b) are the same as they were in (a). Reversing entries can be useful because they simplify the recording of cash transactions after the fiscal year end. It is not necessary to look at the previous year's adjusting entries to decide how to record a cash transaction after the year end.

**BYP 4-1 FINANCIAL REPORTING PROBLEM**

- (a) Forzani's balance sheet is classified based on the liquidity of the assets and liabilities. Classifications include current and long term assets, current and long term liabilities and shareholders' equity.
- (b) The current assets are listed in the order of liquidity and capital assets are shown in total before intangibles and other assets. Current liabilities appear to be listed in order of currency and long-term liabilities are listed before deferred items and future income taxes.

- (c) **Working capital = Current assets - Current liabilities**

$$2006: \$368,842,000 - \$249,428,000 = \$119,414,000$$

$$2005: \$366,247,000 - \$239,819,000 = \$126,428,000$$

$$\text{Current ratio} = \text{Current assets} \div \text{Current liabilities}$$

$$2006: \$368,842,000 \div \$249,428,000 = 1.48:1$$

$$2005: \$366,247,000 \div \$239,819,000 = 1.53:1$$

**Working capital and current ratio weakened slightly in 2006.**

**BYP 4-2 INTERPRETING FINANCIAL STATEMENTS**

- (a) (\$ in US millions)  
Overall increase  $(\$10,048 - \$7,387) \div \$7,387 = 36\%$   
Average increase per year  $36\% \div 4 = 9.0\%$
- (b) Gap's liquidity improved every year with the exception of 2005. Working capital and current ratio both provide a good indication of liquidity. Working capital provides more information in that it provides the dollar value. The change in the liquidity during the period could be explained by general economic conditions or by opening or closing of stores.
- (c) Creditors lend money to companies with the expectation that they will be repaid at a specified point in time in the future. In 2003 to 2005, the current ratio is more than 2 to 1 and the amount of working capital has been improving. There was one year in the five year period from 2001 to 2005 when the company had a working capital deficiency and a current ratio of less than 1. When the current ratio is less than 1, it indicates the company may have difficulty meeting its current commitments without obtaining additional financing. This may cause some concern with creditors but the overall positive trend and current strong liquidity should alleviate any concerns.
- (d) As a creditor in this situation I would request information on the company's plans for the upcoming year – such as a cash forecast. I would also ask for an explanation as to why it was negative.

**BYP 4-3 COLLABORATIVE LEARNING ACTIVITY**

**All of the material supplementing the collaborative learning activity, including a suggested solution, can be found in the Collaborative Learning section of the Instructor Resources site accompanying this textbook.**

**Re: Steps in the Accounting Cycle**

The required steps in the accounting cycle, in the order in which they should be completed, are:

1. Analyze business transactions.
2. Journalize the transactions.
3. Post to the ledger accounts.
4. Prepare a trial balance.
5. Journalize and post the adjusting entries.
6. Prepare an adjusted trial balance.
7. Prepare the financial statements.
8. Journalize and post the closing entries.
9. Prepare a post-closing trial balance.

The optional steps in the accounting cycle include preparing a work sheet and preparing reversing entries. If a work sheet is prepared, it is done after step 3 above, and it includes steps 4 and 6. The work sheet is a form used to make it easier to prepare the adjusting entries and financial statements. If reversing entries are prepared, they are journalized and posted after step 9, at the beginning of the next accounting period. A reversing entry is the exact opposite of a previously recorded adjusting entry, and simplifies the recording of subsequent transactions.

**BYP 4-5 ETHICS CASE**

**(a) The stakeholders in this case are:**

**You, as controller.**

**Eddy Lieman, president.**

**Users of the company's financial statements  
(particularly the banks and other creditors to whom the  
statements were issued).**

**(b) The main ethical issue is the continued circulation of significantly misstated financial statements. As controller, you have just issued misleading financial statements. You have acted ethically by telling the company's president. The president has reacted unethically by allowing the misleading financial statements to continue to circulate.**

**A second issue is the proposal to compensate for the original misstatement by “adjusting” (misstating) the current year’s financial statement.**

**(c) As controller, you should impress upon the president the consequences of having those misleading financial statements detected by some user or the regulatory body (especially if you are a public company). Also stress upon him that you have a professional obligation to correct the statements or to resign.**
