Full access reclosing system

Exclusive to the HSV series of vertical packaging machines is the "Grand Opening Zipper" pouch, which Velteko invented and patented for "F" bags (also available for C and D bags). This new zipper reclosing system is the largest opening in the industry and allows for convenient and unrestricted access to the FULL contents of the bag. Customers are now given the means to scoop out whatever product quantity they require easily and effectively. Application of this zipper system does not decrease packaging speed and can be implemented on Velteko HSV 101 Series and HSV 360 Series.

A perfect opening/reclosing system for:

- Big piece products
- Cereals
- Snack food
- Pasta
- Pet Food
- Frozen food

Viable alternatives to Tin Tie on VFFS

Velteko HSV machines now offer customers two new tie systems for C, D, and F bags that are viable alternatives to the TinTie reclosing system. The newly patented Velteko "Cross Tie" and "Roll Tie" reclosing systems require **just 3 steps to open and reclose**. Access to bag contents, and their consequent reclosing, is now more convenient and trouble-free than ever. Installation of either reclosing system is inexpensive and available on Velteko HSV 101 Series and HSV 360 Series.

Perfect for:

- Coffee and Tea
- Cereals
- Snack food
- Pasta
- Pet food

Evolution of Versatility

HSV 280 Vertical Packaging Machine

The new Velteko HSV 280 vertical packaging machine (available in the 4th quarter of 2014) is an evolution of the HSV101B, which lifts the well-known Velteko versatility to new heights of form and function. In addition to its ability to produce 16 variations of doy-style stand up pouches, it also creates 55 different bag types, handles bag widths up to 280mm, and has speeds up to 200 bags/min. With the introduction of this new evolutionary model, Velteko reinforces its position as "Vertical Packaging Machine Experts".

Main Features:

- ❑ 55 different types of bags
- ❑ 16 variations of the doy-style stand up pouches
- ❑ Maximum bag width of 280 mm
- ❑ 5 - 45 minute changeover time between bag types
- ❑ Up to 200 bags/min.

16 variations of doy-style stand up pouches

Created on the HSV 280, HSV 360 and HSV 440 Vertical Packaging Machine series

One side sealable film solution available for all variations

Virtual motion packaging

Velteko brings packaging to a higher artistic level with its newly patented "Pirouette Pouch". The distinctly unique twisting package for A/C bags breathes new life into the presentation of your products. Created exclusively on the Velteko US 100 packaging machine, it was designed to safely hold your fragile products, as well as other food and non-food items. Its immediately noticeable and fun shape captures the imagination of both children and adults alike, while offering a large space for your marketing message. Do more than just have your packaging stand out from the crowd, give it the means to DANCE its way into consumers' hearts!

Versatility to the max

US 100 „Create and Close” Packaging Machine

The US 100 "Create and Close" Series represents the ultimate in versatility by creating 91 different bag types on one machine. This is in addition to featuring every type of top seal folding and 5 types of reclosing systems. The versatility of the US 100 was designed to address all of your current and future packaging needs, making it a smart investment and "future-proof" solution.

Main features:

- Up to 91 different bag types
- Every type of top seal folding
- 5 types of re-closing systems, including TinTie
- Packages fragile products with a tender touch
- Allows you to create your own product mixes
- Engineered solution according to your specific product, output and packaging needs
- 12" color touch screen and Velteko software translated in your local language.
