

Certified Payroll

The Certified Payroll Report is an optional form for use by contractors and sub-contractors on federally financed or assisted construction contracts in attesting that laborers and mechanics were paid prevailing wages and fringe benefits in accordance with requirements of the Davis Bacon and Related Acts (DBRA) and the Copeland "Anti-Kickback" Act. The properly completed form may be used to provide required payroll information to contracting agencies for review.

The Process

The certified payrolls system follows this simple process to deliver a Davis-Bacon compliant WH-347 report for each project tracked by the system.

Certified Payroll Setup and Payroll Process
