<i>Total hours:</i>	<i>134</i>			<i>Total charge:</i>		<i>€5,360</i>

A software consultancy firm hires out staff to a bank on an hourly rate. Each staff member has a name and a grade. Each grade has a specific hourly rate. Every financial period, each staff member fills in a timesheet and submits it to the firm for payment. This is a copy of Pat O’Gorman’s time sheet for period 10 in the financial year 2004-2005. Each project has a number and a title. The staff member may apply different skills to the same project, as required.
