FORM-II

Form of the Cost Audit Report

[See rule 2 and rule 6]

I/We, **Anil Sharma & Co.** having been appointed as Cost Auditor(s) under section 233B of the Companies Act, 1956 (1 of 1956) of **M/s Haryana Power Generation Corp. Ltd.**, having its registered office at **Urja Bhawan**, **Sector-6**, **Panchkula** (hereinafter referred to as the company), have audited the books of accounts prescribed under clause (d) of sub-clause(1) of section 209 of the said Act, and other relevant records in respect of the **Electricity** for the period /year ending **31**st **March,2011** maintained by the company and report, in addition to my/our observation and suggested in para2.

- 1. I/We have obtained all the information and explanation / which to the best of my/our knowledge and belief were necessary for the purpose of this audit.
- 2. In my/our opinion ,proper cost records, as per companies (cost audit report) rules,2011 prescribed under clause(d) of sub section (1) of section 209 of the companies act, 1956,have been maintained the company so as to give a true & fair view of cost of production/operation, cost of sales & margin of the product/activity groups under reference.
- 3. In my/our opinion proper return adequate for the purpose of the cost audit have been received from the branches not visited by me/us.
- 4. In my/our opinion and to the best of my /our information, the set books and records give the information required by the companies' act 1956 in the manner so required.
- 5. In my/our opinion The set books and records are in conformity with the cost accounting standard issued by the institute of cost and works accountants of India , to the extent these are found to be relevant and applicable
- 6. In my/our opinion Company does not has adequate system of internal audit of cost records which to my /our opinion is commensurate to its nature & size of its business.
- 7. Detailed unit wise & product/activity wise cost statements & schedules there to in respect of product groups/activities under reference of the company duly audited & certified by me /us are kept in the company.
- 8. As required under the provision of the companies (cost audit report) rules, 2011, i/we have furnished **performance appraisal report** to the company on the prescribed form.
- (2.) Based on our examination of the records of the company, we give **observations and suggestions** on the following –

(a) Cost Records:

(i) Cost Records: The Company has maintained Cost Record as per Cost Accounting Records (Electricity Industry) Rules 2001 for the product under reference considering the actual cost incurred.

We suggest that company should also maintained records for Steam generated and cost per kg of steam generated.

- (ii) *Inventory Valuation*: Inventory of stores, fuel and consumables are valued at actual Cost or Market Value which ever is low.
- (b) Matters which need further review/ attention:
 - a. **Depreciation:** Company has not charged Depreciation on additions made to Fixed Assets to the tune of **Rs. 41.93 crores** (schedule -6 balance sheet) during the year at different locations.

b. Others: at PTPP, Panipat

- Ratio of Fly Ash to Coal consumed is about 40%.
- **Diesel** (Performa-B2): It reveals that average cost of Diesel procured in Panipat has **reduced by 7%** (Rs. 30.60 per ltr. To 28.46 per ltr.).
- Cost of electricity per kwh generated at all the eight plants varies from 3.54 pu to 6.26 pu which needs a review.
- (c) **Related Party Transactions:** Company does not have any related party transactions.
- (d) Areas where Company is incurring Losses or declining in Profitability:

(i) Coal, Diesel and Furnace Oil:

- Coal, Diesel and Furnace Oil are major elements and constitute 76 % share of total Cost in Power generation. Hence need in-depth review of all activities related with procurement, quality policy, utilization vis-a-vis electricity generation, storage, process, unavoidable losses, transit losses and Claims settlement with railways and Insurance Companies.
- Overall cost of Per Unit of electricity generated has increased from Rs. 3.36 pu to Rs. 3.49 pu giving a increase of 3.87%. Overall loss has increased by 72% from Rs. 0.18 pu to Rs. 0.31 pu, where as sale price has increased by 3.69% from Rs. 2.71 pu to Rs.2.81pu.
- Increase in Cost of following Items has adverse impact on per unit cost of generation of Electricity:

Sr.No	Items	P/Y Rate Kwh (Rs.)	C/Y Rate kwh (Rs.)	Increased By(Rs.)	%	Remarks
1	Coal	2.43	2.42	-0.01	0.41%	reduced
2	Diesel	0.04	0.11	0.07	175%	
3	Furnace Oil	0.01	0.12	0.11	1100%	

Source: Performa-C of cost records.

- Company is suffering heavy losses on account of **Loss of Coal in Transit**. In current year company has booked expenses to the tune of **Rs. 23464.32 lakh** which is 4.69% **(P/Y** 2.35%) of total cost of Electricity generated and 7% (P/Y3.29%) of

total Cost of Coal Consumed. A detailed study to reduce such losses is required to be carried out and remedial actions should be taken.

- The quality of Coal and its results with respect to its calorific value and Price paid for the same require attention and Company should work out a strategy to buy better quality Coal.

(ii) Borrowing Cost:

- Company has paid Rs.68638.41 lacs (Rs.51703.83 lacs charged to operation cost & Rs. 16934.58 against Capital Projects) as Interest and other charges to borrow funds.

The total Borrowing Cost constitutes 13.74% (P/y 10.50 %) of total cost of electricity generated which needs a close monitoring.

- (e) Strengthen the company under the competitive environment: We suggest following points to strengthen the Company:
 - There is a need to strengthen the Costing Deptt. of the Company so that relevant data and information can be generated and analysed systematically.
 - As Coal is major constituent of total Cost and the volume of coal consumed is very high. Company may take necessary steps to have international suppliers and should take initiatives to get good quality Coal with better results.
 - o Considering the size of the company, systems and procedures should be in place especially with respect to Inventory for monitoring online to minimize the inventory.
 - o A system of Inter-state comparison of performance with respect to power generated and cost per unit of power generated must be introduced.
 - The Company should approach Haryana Electricity Regulatory Commission for recovery of Loss due to backing down from the distribution companies and also right to sale of power to third party in such instances to recover atleast its fixed cost.
 - The Company should install a mechanism to monitor the trippings with detailed analysis for avoiding its reoccurrence.
- **Export Commitments**: The Company is not engaged or under any liability to fulfill its export commitments.

Dated: 05/05/2012 (Anil Sharma) At Chandigarh

Signature & seal of the cost auditor(s)

Membership number(s): 15091

ANNEXURE TO THE COST AUDIT REPORT

(See rule 2 and rule 6)

1. GENERAL INFORMATION:

1. CIN OR GLN of the company: U45207HR1997PLC033517

2. Name of the company: HARYANA POWER GENERATION CORP. LTD.,

3. Registered office of the company: C-7, URJA BHAWAN, SECTOR- 6,

PANCHKULA-134109

4. Corporate office address: C-7, URJA BHAWAN, SECTOR- 6,

PANCHKULA-134109

5. E-mail address of the company:

6. Company's financial year to which 2010-11

the cost audit report relates:

7. Name, address, membership number: Anil Sharma & Co. and e-mail of the cost auditor(s) # 232 FF, SEC.-37A,

CHANDIGARH-160036

anil sharma01us@yahoo.com

8. SRN number and date of filing of form 23C with the central govt.

9. Date of board of directors meeting wherein the annexure to the cost audit report were approved:

10. No. of audit committee meetings held by the company, and attended by the cost auditor during the, NIL

2. COST ACCOUNTING POLICY:

(a) The company is maintaining Cost Accounting Records on actual basis. The company is engaged only in **Generation of electricity** from **Hydro-electric power** and **Thermal.**

HYDRO-ELECTRIC POWER:

The company utilise the water from the river Yamuna, by storing water at Tajewala Head-works and using its flow for moving the Turbines and Electric generator machines for generation of power, at 4 power houses having a total capacity of 62.7 MW. Besides this, 3 Micro units of 0.10 MW each at Kokroi, use flow of canal water for generation of power.

The Generation cost consists of Employee cost, Repair & Maintenance, Depreciation, Admn./General Expenses, Stores Consumables and Interest & Finance charges. There is no material or fuel cost, as only flow of water is utilised.

THERMAL POWER:

The company utilises Steam Coal and Furnace/HSD Oil for generation of Thermal power. Coal is transported from coal mines in West Bengal, Chattisgarh and Jharkhand area to thermal plants located at Faridabad and Panipat. Water is converted into Steam by burning of coal. The steam is used for propulsion of Turbines for generation of electricity through electric generator machines. The water is re-circulated for production of steam. The Ash produced by the burning of coal is mixed with water and moved to the ash pound. The Ash is also being disposed off in dry mode to the prospective users by charging administrative cost.

The cost of Thermal Power mainly consists of Procurement of Coal and HSD/Furnace Oil, besides Employee Cost, R&M, Depreciation, Stores Consumables Admn./General Expenses and Interest & Finance charges. Some power is used captively in auxiliaries of the company and is termed as auxiliary power consumption.

The power is sold at the generating point itself, to Haryana Distribution Companies (UHBVNL and DHBVNL) owned by Haryana Government, at the regulated price determined by Haryana Electricity Regulatory Commission.

(b) Identifications of cost centers/cost objects and cost drivers.

Cost Centre: All Thermal and Hydel plants i.e Panipat, Hissar, Faridabad and Yamunanagar have been identified as independent Cost centre and all the expenses incurred and allocated to them on actual basis.

Service Centre: At all the Plants/Units, there are service centre i.e Water Treatment Plant, Fly Ash Handling and Effluent Treatment Plants. At each units expenses incurred have been charged to these service centre on actual basis and later on allocated/apportioned to production on units of electricity generated.

(c) Accounting for material cost including packing materials, stores and spares etc, employee cost, utilities and other relevant cost components.

Coal is major items consumed to generate electricity and is taken at landed cost including all related expenses.

Stores and spares are available for each unit/plant and taken at Cost plus expenses and issued to production on weighted average price bases.

Actual salary and wages have been allocated to respective cost centre as company has center wise/unit wise salary details for all the employees.

- **(d) Accounting, Allocation and Absorption of overheads**: At all cost centre, Overheads have been accounted, allocated and absorbed, wherever possible on the actual basis other wise on generally acceptable basis.
- **(e)** Accounting for depreciation/amortization: Depreciation have been accounted and allocated on the basis of value of plant and machinery installed and capitalized at respective units. Depreciation

have been charged on Straight Line Method as per the norms of Central Electricity Regulatory Commission. Company has not charged depreciation on the assets acquired during the year for Rs. 41.93 crores. (schedule -6 balance sheet)

(f) Accounting for by products/joint products, scraps, wastage etc.: As there is no production loss or scrap is generated during production process. However, Fly ash emerged during coal burning process and the same is being sold out by the company. Sale of Fly ash has been treated as Non-Cost Items and has not been deducted from cost of generation of electricity and has been credited to separate head. (As per Notification dt 3.11.2009 from MO& EF).

Scrap generated from stores items or wooden boxes etc. have been treated as Non-cost items hence not deducted from Cost of production.

- **(g) Basis for inventory valuation:** Inventories of stores, fuel, spares and consumables have been valued at Cost or Market Value whichever is lower.
- (h) Treatment of abnormal and non-recurring costs including classification of other non cost items.: All abnormal and non-incurring costs have been identified and have been treated as Non-Cost items. Hence, have not been taken into account while working out the cost of generation of electricity.
- (i) The Company has not adopted IFRS during the year.
- (j) Cost accounting policies not specifically mentioned are consistent with Generally Accepted Cost Accounting Principles (GACAP).
- **(K)** There is no change in Cost Accounting Policies adopted by the company during the Financial Year as compared to previous year.
- (I) The budgetary control system is in vogue in the company and in our opinion, is adequate in relation with the size and nature of operation of the company and systems of annual budgets are in operation.

Sub: Performance Appraisal Report for the F/Y 2010-11

Dear Sir

On being appointed as Cost Auditors for the F/Y 2010-11, we have conducted Cost Audit and have submitted our report. During our Audit, we have observations on the following area and would like to have your attention on the same.

- 1. Capacity Utilization: The company worked at the capacity of 75.53 % excluding Hissar and Faridabad Units. Hissar unit was operational for two months during the year. We are of the opinion that if we enhance the utilization capacity of all the plants especially at PANIPAT we can reduce our cost of production to some extent. Further, Hissar units are now fully operational and is new one, we can use it to the maximum capacity without much break downs. We must study the cost PU of electricity generated for installed/actual capacity utilized, employees deployed and others factory & administrative expenses incurred during the year vis-a vis units generated at all the plants.
- 2. Productivity/Efficiency: While going through the data made available to us we found that fly ash content to the coal consumption is 40% approx. which seems to be on higher side. If we conduct a study and try to procure coal of better grade/quality we may be in position to reduce the ash content. It can save a lot.

- Further, as we are aware that Thermal plants are major source of air pollution in India, we need to be more cautious about it and be part of good corporate governance.
- 3. **Utilities**: We have Water, Water treatment Plants, Effluent Treatment Plants and Fly Ash Handling plants in utilities at all the plants and have spent Rs. 5824.50 lakh in totality.
- 4. Key Cost: Coal is our major element of cost and contributes up to 80% of the total cost. Thus, coal procurement, its quality, handling and consumption patterns needs a critical review at all the stages. As per the records provided to us, company has suffered a transit loss to the tune of Rs. 23464.32 lakhs, which is 7% of the total coal consumed. Process of settling the insurance claims needs to be checked and unavoidable losses due to theft, fire and loading and un-loading needs to be examined.
- 5. Working Capital and other borrowings: Company has borrowed both secured and unsecured loans from various institutions and has paid Rs. 50580.62 lakhs as interest on both terms loan as well as working capital loans which contributes approx. 11% to the total cost of Electricity generated. We are of the opinion that a close monitoring is required and realization of funds to be regularized in better manner.
- 6. Inventory Management: Apart from Coal, Diesel, Furnace oil and other stores and spares needs to be monitored on regular basis as these also contribute a lot to the cost. System of purchase, issue and consumption needs to be followed very strictly and valuation of inventory must be done on generally accepted cost accounting principles and practices. For inventory, we must introduce ABC analysis to define the inventory in better way. Any abnormal loss during the

production should not be charged to production and insurance claims must be settled on top priority.

7. Others: We must introduced a system of inter-company and

intera- company to compare the consumption patterns of all the

elements of cost and cost PU of electricity generated and

variances must be checked on regular basis. We must have

system of Standard Costing and internal audit of cost records in

place to have better decision making in the organization.

Further, we suggest that we should introduce the system of Activity Based Costing at all the plants and should work out the

cost PU of electricity at turbine level

Conclusion: To under stand the total operation of plants in better

way, it is necessary to maintain cost records as prescribed in Cost

Records (Electricity) Rules-2011 on regular basis and all the

expenses must be identified cost centre wise. MIS system on

daily/monthly accumulated basis (today/till date) must be

introduced at all cost centre to know the true and fair view of cost

records and will improve the decision making.

Thanking you

For Anil Sharma & Co.,
