

VIEW SCIENCE LIKE NEVER BEFORE

CENTURY OF AMAZING SCIENCE

Come explore the magnificent potential of science with us

It's your time—in this century of amazing science—to effect exponential change in the world. And it's our promise to empower you with innovations that help you do it faster. Don't miss this chance for a special glimpse of the world through science-colored glasses.

Date: Thursday, February 27, 2014
Time: 1:00pm-2:00pm EST
Location: IUPUI, Walther Hall (R3), Rooms 303/305
980 W. Walnut St., Indianapolis, IN 46202

Century of Amazing Science

Event details: ***Next Generation Genome Editing Tools***

At Life Technologies, we have developed a complete suite of products for the genome engineering workflow, from cell culture and sample preparation to genome modification, to detection and analysis of known genetic variants. The newest technologies, GeneArt Precision TALs and CRISPR, are the focus of today's presentation. Built on 20 years of industry-leading innovation, our comprehensive genome engineering portfolio can help you meet your research needs. Life Technologies provides genome engineering tools for editing and modulation for every lab, every budget, and every application.

Speaker: Tatiana Cirico, Technical Specialist Synthetic Biology
