

Highland Lakes Veterinary Clinic Surgical/Anesthesia Release Form

Owner: _____ Pet's Name: _____
 Address: _____ Today's Phone # _____

As the Owner or Agent of the Owner of the above animal, I hereby give my consent to Highland Lakes Veterinary Clinic to perform the following procedures: _____.
 I understand that during the performance of this procedure, unforeseen conditions may be revealed that necessitate variance in the procedure(s) set forth above. I expect Highland Lakes Veterinary Clinic to use reasonable care and judgment in performing the procedure(s). The nature of the procedure(s) and risks involved have been explained to me, and I realize results cannot be guaranteed. I am also aware that unforeseen events resulting from the procedure(s) will not relieve me from my obligation to all reasonable costs incurred regarding this animal.

ALL ANIMALS ADMITTED MUST BE CURRENT ON THEIR VACCINATIONS AND MUST BE FREE OF EXTERNAL PARASITES. ANY ANIMAL FOUND TO HAVE FLEAS OR TICKS WILL BE TREATED AT THE OWNER'S EXPENSE.

LABORATORY TEST WAIVER

If your pet is to be anesthetized, advances in anesthesia and surgery have made routine procedures relatively safe with a low rate of complications. Nevertheless, occasional problems can arise due to pre-existing conditions not evident during routine pre-anesthetic examinations. In an attempt to avoid these problems and insure the best possible care of your pet please read the following options.

- **Pre-Operative Blood Screen** Anesthetics are metabolized and eliminated through the body's organs, primarily the kidneys and liver. A pre-operative blood screen allows for the use of the correct and safest anesthesia for each individual pet. For pets over 7 years of age a urinalysis is run to assess renal function and screen for disease.
- **Intravenous Catheter** A catheter placed prior to anesthesia allows the administration of I.V. fluids to maintain hydration and kidney function during anesthesia. It also allows faster administration of emergency medicines should the need arise. Epecially recommended for all pets over 7 years of age.
- **Surgical Laser** Minimizes pain and bleeding and may improve healing.
- **EKG Pre Surgical Screen** An electrocardiogram checks for cardiac abnormalities.

Please initial below to indicate your choice for today's procedure on your pet.

These fees are **IN ADDITION TO** the surgery fee.

	<u>Pets Under 7 years</u>	<u>Pets 7 years & OVER</u>
Level 1: Pre-Anesthetic Bloodwork + IV Catheter+Laser+EKG	___ \$215.00	___ \$265.00
