

Dictionary of Chemical Names and Synonyms, Electronic Edition

Description: The goal of this software product is to reduce the inordinate amount of time spent on identifying a chemical by one of its many common names, its synonyms, or CAS number. Contains 25,000 chemicals and 150,000 synonyms with full text search and dynamic indexes for instantly locating chemicals by generic name, synonym, trade name, CAS number, SMILES formula, and chemical formula.

Dictionary of Chemical Names and Synonyms Electronic Edition will be of special interest to:
Chemists - Chemical Engineers - Chemical Formulators - Plant Managers - Government Regulators - Safety Officers - Market Researchers - Environmental Engineers - Patent & Trademark Specialists - Purchasing Agents - Chemical Brokers - Industrial & Technical Libraries - Consultants - Students

New revised edition contains:
More than 4000 new chemicals
More than 20,000 new synonyms
More than 25,000 chemicals
More than 150,000 synonyms

Instantly locate chemicals by:
Full-text Search
Browseable Keyword indexes BY:
Names or Synonyms
CAS Registry Numbers
SMILES notation

Contents: PART I—CAS-Registry-Number-Ordered Base Records
Basic individual chemical records that are ordered by CAS Registry Number and contain the chemical formula, molecular weight, the SMILES (Simplified Molecular Input Line Entry System) chemical structure notation [7] when available, a preferred name (usually the 9th Collective Index [9CI] or common name), and a list of chemical synonyms in alphabetical order. (Please note that all lengthy fields, such as a base record with many synonyms are presented in two-columns. For easier reading in a computer environment, sort order is ROW MAJOR, i.e., sorted items read from left to right and then down to the next line.)

This is the primary section in the software version since the Keyword Indexes and/or Search will automatically direct you to the correct base record if, for example, a synonym, molecular or SMILES formula, or CAS number is entered.

Software features:
Full-text Search with Boolean operator support
Keyword Indexes: Comprehensive Index, Chemical Synonyms Index, CAS Registry Index, Chemical Formula Index, SMILES Formula Index
Click and Go Table of Contents: Left Pane Explorer-like icons enable you to instantly go to a section of this Title or any other installed Synapse Chemlib product

PART II—Chemical Synonym Index
An index of over 150,000 chemical synonyms arranged in alphabetical order that indicate the corresponding CAS Registry Number.
The pages of this section are maintained for your browsing and printing needs. All of the CAS-number references have been converted to hypertext to facilitate jumps to the appropriate base records. Either the Comprehensive or Chemical Synonyms keyword indexes replace the original function provided by this section.

Software features:
Full-text Search with Boolean operator support
Keyword Indexes: Pages: Chemical Synonym Index

Hyperlinking: Chemicals to Base-Record Entry in Part I

Part III—Chemical Formula Index

An index of chemical formulas ordered by the Hill system (number of carbons, number of hydrogens and then alphabetical by element) that also indicates the corresponding CAS Registry Numbers.

The pages of this section are maintained for your browsing and printing needs. All of the CAS-number references have been converted to hypertext to facilitate jumps to appropriate base records. Either the Comprehensive or Chemical Formula keyword indexes replace the original function provided by this section.

Software features:

Full-text Search with Boolean operator support

Keyword Indexes: Pages: Chemical Formula Index

Hyperlinking: Formulas to Base-Record Entry in Part
