General Aluminum Manufacturing Co.

Production Part Approval Process Checklist

AIAG PPAP manual guidelines require completion of al items and documents prior to submission to customer (Additional explanation of each item can be found in the PPAP Manual). This checklist is used to indicate which documents and items are included with the submission to the customer. The checklist is used for submissions from GAMCO to customer and for submissions from Supplier to GAMCO. The required column is checked to indicate what is needed, the complete column is checked to indicate included and N/I column is checked when document is required, but not available for submission.

	Attention to:	Customer:			
	Part Name:	B/P Date:			
	Part Number:				
	GA Submission to Customer	Supplier Submission to GA	Required	<u>Complete</u>	<u>N/l</u>
(1)	All customer and supplier design records (e.g., part drawings, specifications) including detail drawings. Drawing with each characteristic numbered and referenced in the dimensional evaluation. Copies of all material and performance specifications.				
(2)	Any authorized engineering change documents not yet incorporated in the design record but incorporated in the part. (If Any)				
(3)	Customer engineering approval on the customer's part drawing or specification. (If Required)				
(4)	Design FMEA. (Required if General Aluminum is design responsible)				
(5)	Process flow diagram.				
(6)	Process Failure Mode and Effects Analysis.				
(7)	Control Plan				
(8)	Measurement System Analysis Studies (Gage R&R)				
(9)	Dimensional results referenced to the part drawing and specific cavities.				
(10)	Material performance test results. (Chemistry, mechanical, etc.)				
(11)	Initial Process Study results showing conformance to customer requirements for significant characteristics and/or in-house designated special characteristics. ☐ Cpk ☐ Ppk				
(12)	Qualified laboratory documentation.				
(13) (14)	Appearance Approval Report for parts with color, grain, or surface requirements. (AAR), if applicable Required only if the part has been designated by the customer as an "appearance item". Sample product				
(15)	Master sample parts by cavity are retained in-house.				
(16)	Checking aids (fixtures, models, templates, mylars, etc.) used in inspecting or testing.				
(17)	Checking aids are retained in-house. Records of compliance with customer requirements.				
(18)	Part Submission Warrant (PSW) – Separate	e PSW for each part #			
	The following documents are i	included as determined by the Quality Manager or PPAP Coordinator			
(19)	IMDS Data Entry / MSDS				
(20)	Run @ Rate results.				
(21)	Acceptance/inspection standard.				
(22)	Certified Weight Casting Machine / Assembled				
(23)	Photos of customer owned tooling
