Preparing your Test Questions for uploading into Blackboard' Pool Manager

Rather than tediously creating questions one-at-a-time in Blackboard, you can create up to 100 questions in a word document and make use of a free online Quiz Generator to "zip" the file for uploading into Blackboard's Pool Manager.

This *three-step process* is accomplished by:

- 1. Properly formatting your Multiple-choice and True / False questions.
- 2. Using the Quiz Generator to create a zip file
- 3. Importing the zipped file into Blackboard

1. Properly formatting your Multiple-choice and True / False questions.

Type the questions in the following format with the asterisk denoting the correct answer:

For Multiple-Choice (one answer):

- 1. Type your question here.
- a. first answer
- b. second answer
- *c. correct answer
- d. fourth answer, etc.

For Multiple-Choice (more than one answer):

- 2. Type your question here.
- *a. correct answer
- b. second answer
- *c. correct answer
- d. fourth answer, etc.

For True / False Questions (use T or F):

- 3. Type your question here.
- Т

TIP: **Be careful of extra space(s)** while formatting your document, especially between the asterisk, number, and period, or in your questions. **Errors will result**, for example:

Questions: Type: True/False (with an extra space indicated by _)

M-theory postulates a supersymmetric theory in eleven dimensions. **Result**: M-theory postulates a supersymmetric

The remaining text will be missing, and because of this break, the quiz generator will produce an Essay Type question (not a True/False).

Answers: Type: Multiple -choice with four answers (with an extra space indicated by _):

a.

_b. *c.

d.

Result: the quiz generator will create only one answer (a). For a multiple choice question, this will also produce an error – as there must be at least two answers.

2. Using the Quiz Generator to create a zip file

To convert your test questions into a zip file to upload into Blackboard using a Free Quiz Generator on the CSI website: <u>http://www.csi.edu/blackboard/bbquiz/Default.aspx</u>

- a. Name the Quiz
- b. Cut and Paste your formatted questions and answers into the text box.
- c. Make sure you provide a line space between the questions (see image).

d. Click Create Quiz - The information in the window will be the same, however you will notice at the bottom the generator will verify the number of test questions.

e. Click Here (Save as a Zip file) - By clicking Here you can download the zip file created by the generator. (Note - This button only appears AFTER you've clicked on Create Quiz.) The file download window opens - Click on Save, browse to where you want to save the file, and Name it. Your zip file will look like this:

3. Importing the zipped file into Blackboard Pool Manager

Open Blackboard and go to the course where you want to upload the quiz. **a. Click** on the course **Control Panel**> **Pool Manager** - click on **Import**

| Pool Manager | | | | | | |
|---|------------|---|--|--|--|--|
| Add and import Pools of questions for use in assessments. | | | | | | |
| 🗐 Add Pool | 🔊 🌳 Import | | | | | |
| | - | 1 | | | | |

b. Select **Browse** to locate the zip file on your computer.

| 0 | mport Question Pool | |
|-----|--|--------|
| T | Click Browse to locate a file to import. | |
| | Attach local file | Browse |
| | | |
| 9 : | Submit | |
| 1 | Click Submit to finish. Click Cancel to guit | t |

Once you've located the file - Click on **Open** to attach it.

c. Click Submit to upload it into Blackboard. If performed successfully you'll get the following message:

| 1 | Pool Import Complete |
|---|---|
| | The Pool has been imported. The log file is below. |
| | 2009-02-06 02:54:00 - Status: The operation import has completed. |

d. Click OK and you'll be returned to the Pool Manager. Your quiz should appear at the bottom (most recent entry).

| Pool Manager | | | | |
|---|-------------------|--------|--------|--------|
| Add and import Pools of questions for use in assessments. | | | | |
| Add Pool 🖾 🏾 Import | | | | |
| Add Pool | | | | |
